Subject: RE: LDR PMM MINUTES 12-04-2014.docx

Mike and Dalena,

Here is the table of IMUSTs that we would like to have assessed as I mentioned during the LDR PMM today. They are all from Table 1-4 in the latest LDR report.

From the original list in Table 1-4, I selected facilities based on the following criteria:

1. Some IMUSTs potentially belong to OUs such as IS-1. The OUs need to make decisions about if any of their facilities are TSDs. An evaluation will create information that will help with that decision.
2. Tank farm closure will include ancillary equipment such as IMUSTs. A separate evaluation is unnecessary.

The table below contain some extra columns such as Location and OU which are mostly for my benefit. However, please pay attentions to some of the items in the Notes column as some of them might need some clarification.

- Is 242-TA-R1 correct or is 241-TA-R1 correct?
- Is 241-SX-302 part of SX farm WMA? If it is part of SX farm, no evaluation is needed (see point 2. Above).
- 231-W-151 and 241-Z-8 are assigned to WRPS. Is this correct?

Facility Number	Location	OU	Notes
200-W-7	NW of SY Farm		
231-W-151	Close to 231Z	WA-1?	Why is this assigned to WRPS?
240-S-302	Close to REDOX	WA-1?	
241-A-302B	Close to A Farm	IS-1?	
241-B-302B	E of B Plant	IS-1?	
241-BX-302B	B Plant, S side		
241-BX-302C	SE of 218-E-9	IS-1?	
241-ER-311A	W of B Plant	IS-1?	
241-SX-302	Inside fence of SX Farm		Is this part of SX farm WMA?
241-TX-302BR	W of Site Services	IS-1?, WA-1?	
241-Z-8	E of 2345Z		Why is this assigned to WRPS?
242-T-135	Near 242-T		
242-TA-R1	Near 242-T		Listed as 241 instead of 242 in Table 1-4.
216-TY-201	Near trench 216-T-26	IS-1?	

Thanks,
