Mr. Roger F. Stanley, Program Manager  
State of Washington  
Department of Ecology  
Mail Stop PV-11  
Olympia, Washington 98504-8711

Dear Mr. Stanley:

REVISION TO THE HANFORD SITE DANGEROUS WASTE PART A PERMIT APPLICATION  
(WA7890008967) (T-3-1)

Enclosed is the Dangerous Waste Part A Permit Application Form 3, Revision 4, for the 300 Area Solvent Evaporator (ASE). The 300 ASE and associated facilities were used for the storage and treatment of radioactively contaminated spent solvents.

The Form 3, Revision 4, for the 300 ASE has been revised to include placement of the evaporator tank on a portion of the concrete storage pad adjacent to the 334-A Building. Radioactively contaminated spent solvents contained in U.S. Department of Transportation-specification steel drums also were stored on a portion of the open air concrete storage pad adjacent to the 334-A Building. Process Code S01 (container storage) was added to address the storage of spent solvents in steel drums. The estimated annual quantity of waste was increased from 6,000 to 7,700 pounds based on new information regarding waste constituents of the solvent evaporator.
