Mr. Douglas R. Sherwood  
 Hanford Project Manager  
 U.S. Environmental Protection Agency  
 712 Swift Boulevard, Suite 5  
 Richland, Washington 99352

Dear Mr. Sherwood:

**TRANSMITTAL OF HANFORD FEDERAL FACILITY AGREEMENT AND CONSENT ORDER (TRI-PARTY AGREEMENT) MILESTONE M-93-05, 105-B REACTOR MUSEUM FEASIBILITY ASSESSMENT (PHASE II) PROJECT REPORTS**

This letter is to report that Tri-Party Agreement Milestone M-93-05, 105-B Reactor Museum Feasibility Assessment (Phase II) and Supplemental Cost Estimate report has been met. Attached are copies of BHI-01384 and BHI-01385, Hanford B Reactor Museum Feasibility (Phase II) reports, for your review.

The Phase II Study (including supplement) is an evaluation for mitigating the hazards identified in BHI-01282, Rev. 0, Hanford B Reactor Building Hazard Assessment Report (Tri-Party Agreement Milestone M-93-04, submitted in June 1999). The Phase II Study is a follow-up to the Phase I Feasibility Study Report (1995) which concluded that the use of B Reactor as a tour facility is feasible but there were improvements needed to assure public safety.

The information contained in these reports will serve as a basis in the decision process for determining future plans for B Reactor.

If you should have any questions, please contact Chris Smith, Environmental Restoration Division, on (509) 372-1544.

Sincerely,

George H. Sanders, Program Manager  
 Office of Regulatory Liaison
