3. Comments:

The PFP above grade structures were removed to "slab on grade" status. In 2020, a contamination control soil cap was placed over the area where the 234-5Z, 242Z and 236Z demolished building slabs are located and given the WIDS Sitecode 200-W-255. The soil cap is approximately 6 inches thick and posted as an Underground Radioactive Material Area.

4. Is the site a Solid Waste Management Unit?

Yes No

Any discernible location at the Facility where solid wastes have been placed at any time, irrespective of whether the location was intended for the management of solid or dangerous waste, and includes any area at the Facility at which solid wastes have been routinely and systematically released (*for example through spills*), and includes dangerous waste treatment, storage, and disposal units.

5. Does the site need to be addressed under a regulatory program? Check the first item that applies.
