Dear Mr. Klein:

Re: Portable and Temporary Source at the High Bay Testing Facility (336 Building, 300 Area)

The Washington State Department of Ecology (Ecology) recently received a notification and request for exemption of a new source review for the referenced temporary source at the 336 Building. After a thorough review of the source and associated estimates, Ecology has concluded that this source is exempted from new source review pursuant to Washington Administrative Code (WAC) 173-400-035 and 173-400-110(5).

This temporary source is permitted to operate for up to one year. Although no specific conditions for operation are set by Ecology, the applicant shall still comply with WAC 173-400-040, general standards for maximum emissions. Any questions regarding this letter should be directed to Oliver Wang at 372-7932.

Sincerely,

Ron Skinnarland
Waste Management Section Manager
Nuclear Waste Program

Oliver Wang, PE
Environmental Engineer
Nuclear Waste Program
