<b>Document Number/Title:</b> 300-FF-2 Waste Site 300-10 Verification Package (BHI-01134)		<b>Date Document Last Issued:</b> N/A
<b>Originator:</b> Charlie Johnson		<b>Phone:</b> 373-6372
<b>Summary Discussion:</b>  Remediation of waste site 300-10 was completed in accordance with the <i>300-FF-1 Remedial Design Report/Remedial Action Work Plan (RDR/RAWP)(DOE/RL-96-70)</i> . Waste site 300-10 is part of the 300-FF-2 Operable Unit (OU). During preparation of the RDR/RAWP, a decision was made to include the waste site with 300-FF-1 remediation activities because of its close proximity to the 300 Area Process Trenches and its small size. Contaminated soil was removed from the site and sent to the Environmental Restoration Disposal Facility (ERDF). Analysis of verification samples showed that remaining soil within the area is below the 300-FF-1 cleanup standards. The waste site no longer poses an unacceptable threat to human health or the environment as demonstrated in the referenced verification package.		
<b>Justification and Impact of Change:</b>  This form documents agreement among the parties listed below to classify the subject waste site from the TPA solid waste management unit listing as closed out. Final removal from the NPL will occur at a future date.
