3. **Comment:**

DOE/RL-88-11 states the 200-W-110 (Miscellaneous Stream #393) storm water drain is located on the back side (eastern most corner) of 222-U. It states the source has been abandoned. No drain structure has ever been found at the coordinates provided in DOE/RL-88-11. The coordinates suggest a drain should be located approximately 180 feet east of the 222-U building.

However, the location description and process description for 200-W-108; Miscellaneous Stream #687 is extremely similar. 200-W-108 also received 222-U stormwater runoff. The coordinates for 200-W-108 map it at the northeastern corner (back side) of the demolished 222-U building.

It is believed 200-W-110 is a DUPLICATE of 200-W-108.

DOE/RL-88-11 text for 200-W-110 says - 222U Building - Storm water. LOCATION: back side, eastern most corner.

DOE/RL-88-11 text for 200-W-108 says - 222U Building - Storm water runoff.

Therefore, 200-W-110 is not an Accepted WIDS site because it is a duplicate of 200-W-108.

4. **Is the site a Solid Waste Management Unit?**  Yes  
 No

Any discernible location at the Facility where solid wastes have been placed at any time, irrespective of whether the location was intended for the management of solid or dangerous waste, and includes any area at the Facility at which solid wastes have been routinely and systematically released (for example through spills), and includes dangerous waste treatment, storage, and disposal units.

5. **Does the site need to be addressed under a regulatory program? Check first item that applies.**
