

## Waste Site Reclassification Form

<b>Date Submitted:</b> 1/16/2001 <b>Originator:</b> J. Golden <b>Phone:</b> 376-6961	<b>Operable Unit(s):</b> 200-SW-1 <b>Waste Site ID:</b> 600-223  <b>Type of Reclassification Action:</b> Rejected <input checked="" type="radio"/> Closed-Out <input type="radio"/> No Action <input type="radio"/>	<b>Control Number:</b> 2001-08
--	---	--------------------------------

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

**Description of current waste site condition:**

Fence posts and barbed wire are visible on the northwest corner of the pit. The fencing debris at the top end may have been used to mark the site during military operations, but was left when the anti-aircraft site was decommissioned. While the presence of the tumbleweeds made determining if other debris was present impossible when the site was discovered, the July 2000 fire showed that the pit is empty. A plastic orange fence surrounds the pit to warn of falling danger.

**Basis for reclassification:**

There is no evidence of spills or other hazardous material in the pit.
