Re: Department of Ecology approval of *Sampling and Analysis Plan for the 241-U-361 Settling Tank within the 200-UW-1 Operable Unit, DOE-RL-2006-34, Revision 0, and the Waste Control Plan for the Video Monitoring and Sampling of the 241-U-361 Settling Tank within the 200-UW-1 Operable Unit, DOE-RL-2006-68, Revision 2* 0072658  
0072659

Dear Mr. Charboneau:

The Department of Ecology approves enclosures 1 and 2. The Washington Department of Health (WDOH) provides technical support to Ecology in the area of environmental health physics, including air quality. We are providing the following for your consideration, based on WDOH review of the documents:

- Field activities should be temporarily ceased and the area should be placed in a safe configuration if contamination control measures are not adequate, based on site conditions (e.g., excessive wind).
- We expect WDOH representatives to observe the sampling activity on our behalf. Please provide us advance notice of sampling activities.
- At the end of the sampling activity, please provide WDOH (or to Ecology to transmit to WDOH) with the completed field radiological surveys and the results from any additional monitoring information gathered during the activity.

If you have any questions, contact Mandy Jones at 509-372-7916, or Les Fort at 509-372-7984.

Sincerely,

John B. Price  
Environmental Restoration Project Manager  
Nuclear Waste Program
