

START**Meeting Minutes Transmittal - Approved**

Unit Managers Meeting
 105-DR LARGE SODIUM FIRE FACILITY
 Federal Bldg., Rm 784-B
 Richland, Washington

Meeting Held July 18, 1995
 From 2:00 pm to 3:30 pm

The undersigned indicate by their signatures that these meeting minutes reflect the actual occurrences of the above dated Unit Managers Meeting.

Ellen Mattlin Date: 8/28/95
 Ellen M. Mattlin, Unit Manager, RL

Not Present

Date: _____
 Daniel L. Duncan, RCRA Program Manager, EPA Region 10

Scott E. McKinney Date: 8-10-95
 Scott E. McKinney, Unit Manager, Washington State Department of Ecology

105-DR LSFF, WHC Concurrence

Fred A. Ruck III Date: 8/23/95
 Fred A. Ruck III, Contractor Representative, WHC

Purpose: Discuss Permitting Process

Meeting Minutes are attached. The minutes are comprised of the following:
 Attachment 1 - Agenda
 Attachment 2 - Summary of Discussion and Commitments/Agreements
 Attachment 3 - Attendance List
 Attachment 4 - Action Items

Unit Managers Meeting
105-DR LARGE SODIUM FIRE FACILITY
Federal Bldg., Rm 784-B
Richland, Washington

Meeting Held July 18, 1995
From 2:00 pm to 3:30 pm

Summary of Discussion and Commitments/Agreements

1. Approval of Past UMM Minutes

Unit Managers Meeting minutes for May 24, 1995, have been approved and are awaiting signatures. The June 20, 1995, minutes are out for review.

2. Status Action Items

No open action items.

3. Status Closure Activities

-Status of Sampling and Analysis Activities

WHC (ZC Knaus) stated that sampling activities are progressing well. Soil samples were taken on the morning of July 18, 1995. Two soil samples for closure determination were obtained, as well as three authoritative samples at the WHC Field Team Leader's (RC Roos) discretion. He felt that the three authoritative samples would add to the information gained from the other soil locations.

It had been planned to sample the gravel scrubber on this day as well. A portable saw was to be used to gain access into the gravel scrubber. However; the walls of the scrubber were too thick for the portable saw, so the work was stopped. It was decided to use a welder to cut the steel walls of the scrubber. Work was planned to continue on July 20, 1995, to allow for time to rewrite the Radiation Work Permit to include a welder and also to organize all extra equipment necessary to complete the welding job.

Other closure activities: the procurement process for ordering equipment necessary to remove carbonates is continuing. Work on carbonate removal will begin after the arrival of this equipment, which is are anticipated to begin sometime in August or September, 1995. Sandblasting of the vessel that was used to burn the lithium-lead alloy is scheduled to begin the first or second week of September, 1995.

4. New Business

Deviations from the Sampling and Analysis Plan

ZC Knaus reported that there would be a deviation from the activities discussed in Section 4.0, Waste Sampling and Removal. The text of the

Sampling and Analysis Plan states that the gravel will be sampled as it is removed from the scrubber. A different approach will be taken as follows: 1.) the gravel will be sampled in place, 2.) analyze gravel samples, 3.) evaluate results, 4.) dispose of gravel appropriately. Ecology (SE McKinney) did not have any problems with this deviation from the Sampling and Analysis Plan.

5. Set Next Meeting Date

The next UMM will be held via video conference on August 10, 1995, Federal Bldg., Richland, Washington.
