Mr. R. D. Hanson, President
Fluor Hanford, Inc.
Richland, Washington 99352

Dear Mr. Hanson:

CONTRACT NO. DE-AC06-96RL13200 - RESOURCE CONSERVATION AND RECOVERY ACT (RCRA) ASSESSMENT - A&E 00-ASS-073

RL's Analysis and Evaluation Division (A&E) conducted an assessment of 242-A Evaporator Facility during the month of October 2000.

Enclosed for your information is a copy of the report detailing the results of this assessment. The assessment's itemized scope breakdown, which is listed below, focuses on FHI's compliance with the Hanford Site RCRA permit requirements for treatment, storage, and disposal of mixed waste.

- Facility records;
- facility contingency plan;
- personnel training and qualifications;
- waste analysis plan;
- operating log and logkeeping practices;
- shipping manifests;
- facility security; and
- management and independent assessments.

This assessment completes the review of the three facilities that comprise the "Liquid Waste Processing Facilities" at Hanford. This assessment was abbreviated in an effort to reduce duplication of review of procedures and programs that were evaluated in September 2000.

The contractor's compliance with the RCRA Permit requirements was considered Satisfactory. There were no findings and one observation. No response from FHI is required. The assessment is rated as "green" - meets requirements.

If, in my capacity as a Contracting Officer's Representative (COR), I provide any direction which your company believes exceeds my COR authority, you are to immediately notify the Contracting Officer and request clarification prior to complying with the direction.
