Mr. David B. Jansen, P. E.
Hanford Project Manager
State of Washington
Department of Ecology
Olympia, Washington 98504-7600

Dear Mr. Jansen:

STATUS REPORT ON CORRECTIVE ACTIONS FOR SINGLE-SHELL TANKS 241-C-105 AND 241-C-106

- Reference: 1. Letter; J.P. Hamric, DOE-RL to R.F. Stanley, State of Washington... 2. Letter; Steve Wisness, RL, to Paul Day, EPA, and David B. Jansen... 3. Letter; David B. Jansen, Ecology, to Steve Wisness, RL...

During discussions with your staff on July 22, 1992, a number of technical initiatives were agreed to regarding 241-C-105 and 241-C-106. These were documented in reference 1. Those initiatives were formally incorporated into proposed Tri-Party Agreement milestones submitted to you in reference 2. In reference 3, Ecology rejected the proposals in reference 2. This rejection notwithstanding, The Department of Energy, Richland Field Office (RL) has continued to implement the actions outlined, and the status of these is discussed herein.

One initiative was to implement monthly psychometric measurements at Tanks 214-C-105 and C-106, while the exhauster for these tanks is in operation, commencing in October 1992, (proposed milestone M-05-13-T01). The second initiative was reduce the logging speed used for the gross gamma probe when monitoring all drywells associated with Tanks 241-C-105 and C-106 to 8 feet per minute (1.5 inches per second) commencing in October 1992, (proposed milestone M-05-13-T03). Both of these initiatives were completed in October 1992.

Mr. David B. Jansen
