Jill / Rod -

My apologies for the delayed response regarding any remaining Yakama Nation's concerns for the 100 DH Area. ERWM staff and contractors have had followup discussion since the December 13th meeting and there are a couple of technical items that we needed to discuss and resolve internally. And as you are aware, the cultural concerns have been relayed previously and were not discussed during the meeting on the 13th.

A fuller response on any remaining technical issues will be provided by the end of this week.

Thank you for your continued patience.

Rose,

I am following up on the meeting we had on December 13th in Richland with yourself, Tom Zielman, Erik Buer, Brian Barry, and Rose Ferri.

At the conclusion of the meeting it seemed that we had worked through the issues that had been identified.

EPA committed to a 6 month stay in order to work through Yakama Nation concerns on the 100 D&H Proposed Plan.

We are nearing the end of the 6 months.

If there are any remaining concerns, I would like to get them identified and a meeting scheduled.

I would like to brief EPA management on any remaining concerns the Yakama Nation may still have.

Thank you for working with us to get these issues addressed.
