

## WASTE SITE RECLASSIFICATION FORM

Operable Unit: 100-DR-1

Control Number: 2019-011

Waste Site Code(s)/Subsite Code(s):

100-D-10

Reclassification Category:     Interim                       Final

Reclassification Status:     Closed Out                       No Action                       Rejected  
                                           RCRA Postclosure                       Consolidated                       None

Approvals Needed:                       DOE                                       Ecology                                       EPA

**Description of Current Site Waste Condition:**

*(what is the current physical state of the site? what activities have been performed?)*

The 100-D-10 waste site is a depression in the river embankment on the upriver (western) side of the 100-D Area. The 100-D-10 waste site was classified as "not accepted" in 1997 on the basis that it was a discharge for stormwater from the 183-DR/190-DR Clearwell Pit. It was subsequently determined that the stormwater catch basins in the 183-DR/190-DR Clearwell Pit were plumbed to an outfall at the separate 100-D-8 waste site located nearby. Due to this inconsistency, the Remedial Investigation/Feasibility Study for the 100-DR-1, 100-DR-2, 100-HR-1, 100-HR-2, and 100-HR-3 Operable Units (DOE/RL-2010-95) initially identified the 100-D-10 site for further investigation and remediation, as warranted.

**Basis for Reclassification:**

*(how does the site meet the reclassification status?)*

During development of the Record of Decision, Hanford 100 Area Superfund Site, 100-DR-1, 100-DR-2, 100-HR-1, 100-HR-2 and 100-HR-3 Operable Units (100-D/H ROD), it was determined that the 100-D-10 location is a former embankment cut from placement of a river crossing for telecommunication cables at the location. The telecommunication cables are addressed as the 600-235 waste site and have been reclassified as "(final) no action." Therefore, the selected remedy for the 100-D-10 site in the 100-D/H ROD is no action. This site meets the criteria for unrestricted land use.

The site is being changed from a "not accepted" classification to a "(final) no action" reclassification status to align with the 100-D/H ROD.

**Project Manager Comments:**

**Waste Site Controls:**

	Yes	No		Yes	No		Yes	No
Engineered Controls	<input type="radio"/>	<input checked="" type="radio"/>	Institutional Controls	<input type="radio"/>	<input checked="" type="radio"/>	O&M Requirements	<input type="radio"/>	<input checked="" type="radio"/>

If any of the Waste Site Controls are checked "Yes", specify control requirements including reference to the Record of Decision, TSD Closure Letter, or other relevant documents:

N/A
