Change Title Extend target ^{milestone} dates for M-16-07B, M-16-08B, and M-16-26B. Establish milestones for 100-FR-1, 100-FR-2, 100-HR-1, and 100-KR-1 remediation.

Description/Justification of Change

In FY96 interim milestones were established for Remediation and Backfill of the original 37 liquid waste sites listed in the 100 Area ROD in the 100-BC-1, 100-DR-1, and 100-HR-1 Operable Units (OU's). The predicted volumes of contaminated material at 100-BC-1 and 100-DR-1 have increased substantially and the 100 Area ROD had been amended to include additional liquid waste sites in 100-BC-1, 100-DR-1, and 100-HR-1, plus sites in 100-BC-2, 100-DR-2, 100-FR-1, 100-FR-2 and 100-KR-1, requiring the existing interim milestones to be modified and the target dates to be extended to include the additional scope of work. In addition new interim milestones are being established for completion of liquid waste site remediation for 100-HR-1 and initiation/completion of liquid waste site remediation for 100-FR-1 and 100-FR-2. A new interim milestone is established to initiate waste site cleanup at 100-KR-1 OU.

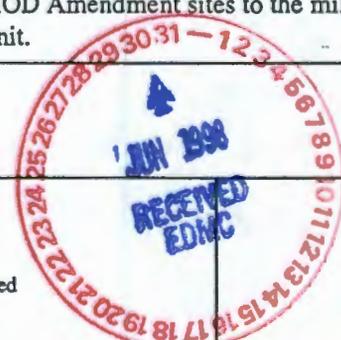

Modify target dates for M-16-07B, M-16-08B, and M-16-26B, add M-16-26C, M-16-13A, M-16-13B, and M-16-10A (strikethrough indicates text to be removed, shading indicates text to be added)

M-16-08B	Complete Remediation and Backfill of 15 10 ¹⁵ Liquid Waste Sites and Process Effluent Pipelines in the 100-BC-1 and 100-BC-2 Operable Unit as defined in the Remedial Design Report/Remedial Action Work Plan for the 100 Area.	1/31/99 9/30/99
M-16-13A	Initiate Remedial Action in the 100-KR-1 Operable Unit	1/31/99
M-16-07B	Complete Remediation and Backfill of 15 22 ¹⁵ Liquid Waste Sites and Process Effluent Pipelines in the 100-DR-1 and 100-DR-2 Operable Unit as defined in the Remedial Design Report/Remedial Action Work Plan for the 100 Area.	9/30/99 4/30/99

Impact of Change Contaminated volumes have increased from the time the milestones were established, while the rate of remediation (250,000 more tons to ERDF by the end of FY98) have also increased. The addition of the 100 Area ROD Amendment sites to the milestones will ensure all liquid waste sites are remediated prior to demobilization from an Operable Unit.
