

WASTE SITE RECLASSIFICATION FORM

Operable Unit: N/A

Control No.: 2014-077

Waste Site Code(s)/Subsite Code(s):

293-S

Reclassification Category: Interim Final Reclassification Status: Closed Out No Action Rejected RCRA Postclosure Consolidated None Approvals Needed: DOE Ecology EPA **Description of current waste site condition:**

(What is the current physical state of the site? What activities have been performed?)

The 293-S Off Gas Treatment building is an aboveground structure adjacent to the Redox Canyon. The building contained absorption towers and a valve pit. The structure is internally contaminated.

**Basis for reclassification:**

(How does the site meet the reclassification status?)

This waste site is being Reclassified to Rejected because it does not meet the WIDS database scope, as described in Section 2.0 of TPA-MP-14, Rev. 2.

Section 2.0 states that WIDS does not document buildings or facilities that do not contain TSD units. It further states that, after buildings are demolished, the footprint will be evaluated for potential soil contamination. If present, the soil contamination will be added to WIDS as a Discovery Site.
