Mr. David B. Jansen, P.E.
Hanford Project Manager
State of Washington
Department of Ecology
P.O. Box 47600
Olympia, Washington, 98504-7600

Dear Mr. Jansen:

UNDERGROUND STORAGE TANK 3000-12 CLOSURE

Enclosed are the Temporary Closure Checklist and Permit Application for underground storage tank 3000-12.

This tank, located in the 3000 Area of the Hanford Site, is a carbon steel tank of approximately 1000 gallons capacity and was previously used to store waste oil. It has no piping or other equipment associated with it. Since the tank has no planned future use, it will be permanently closed by removal within the 12-month temporary closure period. The required notifications will be provided to the State of Washington Department of Ecology (Ecology) when the removal schedule has been finalized.

Temporary closure has been completed in accordance with Chapter 173-360-380 WAC and as indicated on the checklist.

If you have any questions or require additional information, please call me or Ms. Annabelle L. Rodriguez at (509) 372-0277.

Sincerely,

R. D. Izatt, Program Manager
Office of Environmental Assurance,
Permits, and Policy

UNDERGROUND STORAGE TANK

Temporary Closure Checklist

The purpose of this form is to certify the proper temporary closure of underground storage tank (UST) systems. Temporary closure must be conducted in accordance with Chapter 173.360 WAC. Tanks may be temporarily closed for a maximum of one year. An extension may be granted by Ecology under certain conditions specified in the UST rules.

This Temporary Closure Checklist shall be completed and signed by a Licensed Decommissioning Supervisor. The supervisor shall be on site when all tank temporary closure activities are being conducted. The firm which employs the licensed supervisor shall also be licensed by the Washington State Department of Ecology as a Service Provider. If any of the activities listed below have been supervised by a different licensed supervisor, a separate checklist must be filled out and signed by the licensed supervisor performing those activities.

For further information about completing this form, please contact the Department of Ecology UST Program.

A separate checklist must be completed for each UST system (tank and associated piping), except that UST systems at one site may be reported together by completing page 2 of this form separately for each system. The completed checklist should be mailed to the following address within 30 days of the completion of the temporary closure.

Underground Storage Tank Section
Department of Ecology
Mail Stop PV-11
Olympia, WA 98504-8711

1. UST SYSTEM OWNER AND LOCATION

Site Owner/Operator: U. S. Department of Energy Field Office, Richland

Owners Address: 825 Jadwin 550
Street P.O. Box
Richland WA 99352
City State ZIP-Code

Telephone: (509) 376-7387

Site ID Number (on invoice or available from Ecology if tank is registered): 012763

Site/Business Name: U.S. Department of Energy Field Office, Richland

Site Address: 825 Jadwin P.O. Box 550 USA
Street County
Richland WA 99352
City State ZIP-Code

2. TANK TEMPORARY CLOSURE PERFORMED BY:

Firm: Westinghouse Hanford Company License Number: S001592

Address: 2355 Stevens Drive 1970
Street P.O. Box
Richland WA 99352
City State ZIP-Code

Telephone: (509) 376-7053

Licensed Supervisor: Brian J Dixon Decommissioning License Number: W000649

3. TANK CLOSURE INFORMATION

- 1. Tank ID Number (as registered with Ecology): 3000-12
- 2. Year installed: 1983
- 3. Tank capacity in gallons: < 1000 gallons
- 4. Last substance stored: used oil
- 5. Temporary closure period: From May 28, 1992 To April 2, 1992
- 6. Local permit(s) (if any) obtained from: None

Always contact local authorities regarding permit requirements.

Any UST system temporarily closed for 3 months or more must be tightness tested by a licensed tightness testing supervisor prior to bringing the UST system back into service.

4. CHECKLIST

Each item of the following checklist shall be initialed by the licensed supervisor whose signature appears below.

	Yes	No	NA*
1. Has all liquid been removed from product lines?			✓
2. Have all vent lines been left open and functioning?	✓		
3. Have all other lines been capped?			✓
4. Have the pumps and other ancillary equipment been removed or secured?			✓
5. Have all materials been removed from the tank so that no more than one inch of residue or 0.3 percent by weight of total capacity remain in the system?	✓		

NOTE: If item 5 is not complied with, release detection shall continue to be operated and maintained.

*Item not applicable

I hereby certify that I have been the licensed supervisor present on site during the above listed temporary closure activities and to the best of my knowledge they have been conducted in compliance with all applicable state and federal laws, regulations and procedures pertaining to underground storage tanks.

Persons submitting false information are subject to penalties under Chapter 173.360 WAC.
