

WASTE SITE RECLASSIFICATION FORM

Operable Unit: N/A

Control No.: 2015-012

Waste Site Code(s)/Subsite Code(s):

118-KW-1

Reclassification Category: Interim Final

Reclassification Status: Closed Out No Action Rejected

RCRA Postclosure Consolidated None

Approvals Needed: DOE Ecology EPA

Description of current waste site condition:

(What is the current physical state of the site? What activities have been performed?)

WIDS sitecode 118-KW-1 is the 105-KW Reactor building, excluding the 100-K-43 Fuel Storage Basin. The 118-KW-1 site is the structure only and does not include any contaminated soil. The contaminated soil adjacent to and beneath the structure is accounted for in sitecode 100-K-82.

Basis for reclassification:

(How does the site meet the reclassification status?)

This waste site is being Reclassified to Rejected because it does not meet the WIDS database scope, as described in Section 2.0 of TPA-MP-14, Rev. 2. Section 2.0 states that WIDS does not document buildings or facilities that do not contain TSD units. It further states that, after buildings are demolished, the footprint will be evaluated for potential soil contamination. If present, the soil contamination will be added to WIDS as a Discovery Site.

WASTE SITE RECLASSIFICATION FORM

Operable Unit: N/A

Control No.: 2015-012

Waste Site Code(s)/Subsite Code(s):

118-KW-1

Project Manager comments:

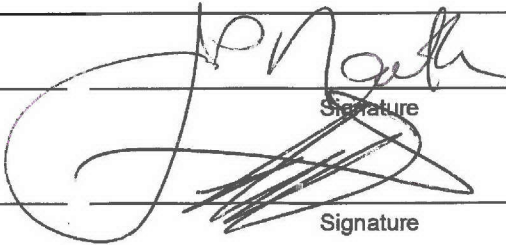

Waste Site Controls:

Engineered Controls: Yes No Institutional Controls: Yes No O&M Requirements: Yes No

If any of the Waste Site Controls are checked Yes, specify control requirements including reference to the Record of Decision, TSD Closure Letter, or other relevant documents:
