**Change Notice for Modifying Approved Documents/ Workplans
In Accordance with the Tri-Party Agreement Action Plan,
Section 9.0, Documentation and Records**

Change Number	Document Submitted Under Tri-Party Agreement Milestone	Date:	
TPA-CN-197	N/A	December 18, 2007	
Document Number and Title: <i>Remedial Design and Remedial Action Work Plan for the 100-HR-3 and 100-KR-4 Groundwater Operable Units' Interim Action (DOE/RL-96-84, Rev. 0)</i>		Date Document Last Issued: September 1996	
Originator: Julie Robertson		Phone: 376-8162	
<p>Description of Change: The Supplement to the 100-HR-3 and 100-KR-4 Remedial Design Report and Remedial Action Workplan for the Expansion of the 100-KR-4 Pump-and-Treat System (DOE/RL-2006-75, Revision 0) is a companion document to the Remedial Design and Remedial Action Work Plan for the 100-HR-3 and 100-KR-4 Groundwater Operable Units' Interim Action (DOE/RL-96-84, Rev. 0). This companion document supports the expansion of the pump-and-treat system remediating the hexavalent chromium plume associated with the 116-K-2 Trench. The Declaration of the Record of Decision for the 100-HR-3 and 100-KR-4 Operable Units at the Hanford Site (Interim Remedial Actions) defines the regulatory performance criteria for cleanup of the chromium plume in the 100-KR-4 Operable Unit (OU).</p> <p>For purposes of this change notice, the attached Supplement to the 100-HR-3 and 100-KR-4 Remedial Design Report and Remedial Action Workplan for the Expansion of the 100-KR-4 Pump-and-Treat System (DOE/RL-2006-75, Revision 0) is considered a change to the already approved Remedial Design and Remedial Action Work Plan for the 100-HR-3 and 100-KR-4 Groundwater Operable Units' Interim Action (DOE/RL-96-84) that was issued in 1996..</p>			
<p><u>D Brockman</u> and <u>L Gadbois</u> agree that the proposed change modifies an approved RL Lead Regulatory Agency</p> <p>workplan/document and will be processed in accordance with the Tri-Party Agreement Action Plan, Section 9.0, <i>Documentation and Records</i>, and not Chapter 12.0, <i>Changes to the Agreement</i>.</p>			
<p>Justification and Impacts of Change: The expansion of the pump-and-treat system remediating the hexavalent chromium plume associated with the 116-K-2 Trench will satisfy a requirement of <i>The Second CERCLA Five Year Review Report for the Hanford Site</i> (DOE/RL-2006-20): Action Item 5-1. Implementation of the expansion requires prior approval of the attached Supplement to the 100-HR-3 and 100-KR-4 Remedial Design Report and Remedial Action Workplan for the Expansion of the 100-KR-4 Pump-and-Treat System (DOE/RL-2006-75, Revision 0). This document establishes a new group of compliance wells for the hexavalent chromium plume associated with the 116-K-2 Trench and establishes two milestones for expanding the subject pump-and-treat system. The purpose of this change notice is to obtain Tri-Party approval of the Supplement to the 100-HR-3 and 100-KR-4 Remedial Design Report and Remedial Action Workplan for the Expansion of the 100-KR-4 Pump-and-Treat System (DOE/RL-2006-75, Revision 0).</p>
