Subject: B Reactor

B Reactor is an historical site that must be preserved.

It is certainly more important than Mary Hill Museum, the Whitman Museum, Ginko State Park or the Dry Falls Museum. It deserves the treatment afforded to the Oregon Trail Interpretive Center at Baker City, Oregon.

It is a technological achievement on par with Grand Coulee Dam and it influenced history more than "Old Ironsides."

With the proper promotion it will benefit the Columbia Basin by drawing visitors from around the world.

Preserve it. Develop it as an interpretive center. Do not allow it to be demolished or sealed.
