This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

Description of current waste site condition:

Contamination was identified on the roadway near the intersection of Dayton Avenue and 13th Street. The most likely source of the contamination was dripping from an earlier transport of temperature probes from 241-SX Tank Farm to the burial ground. The roadway was barricaded, follow up surveys were made, and the vehicle and roadway were decontaminated in 1972.

Basis for reclassification:

The road was decontaminated in 1972. The site is not physically marked or posted. Routine radiological surveys are done on the road surfaces inside 200 East and 200 West Areas. It is recommended this site be reclassified to No Action.
