3. **Comment:**

100-K-117 is the footprint of the 183-KW Chlorine Vault Building. This site was added to WIDS based on an incorrect evaluation of selenium sample results from the debris of an analagous unit, the 183-KE Chlorine Vault. Selenium sample results do not exceed Remedial Action Goals (RAGs), and do not indicate presence of a waste site in the former 183-KW building footprint.

4. **Is the site a Solid Waste Management Unit?**

Any discernible location at the Facility where solid wastes have been placed at any time, irrespective of whether the location was intended for the management of solid or dangerous waste, and includes any area at the Facility at which solid wastes have been routinely and systematically released (for example through spills), and includes dangerous waste treatment, storage, and disposal units.

Yes  
 No

5. **Does the site need to be addressed under a regulatory program? Check first item that applies.**
