<b>Change Title</b> <p>Remove Double Asterisk (indicating a TSD unit) for the 216-A-10 Crib in Hanford Federal Facility Agreement and Consent Order (Tri-Party Agreement) Appendix C.</p>								
<b>Description/Justification of Change</b> <p>The 216-A-10 Crib Dangerous Waste Part A, Permit Application, Revision 5 (Part A form), identifies the crib was used to dispose of Plutonium-Uranium Extraction (PUREX) process distillate discharge (PDD) that was a corrosive mixed waste. This crib is documented to have received only PUREX PPD waste during operations. The Part A form states that this site received its last waste in March 1987. As agreed to by the U.S. Department of Energy and the State of Washington, Department of Ecology the date that the mixed waste rule applies is August 19, 1987, and any discharges occurring before this effective date would constitute a past practice activity. Documentation in the form of as-built drawings signed and dated April 1, 1987; verify the completion of piping modifications that physically isolated the 216-A-10 crib from further receipt of waste. Because the 216-A-10 Crib received only mixed waste and ceased operations before August 19, 1987, this unit never received waste after the date that the mixed waste rule applies.</p> <p style="text-align: right;"><i>Description/Justification of Change continued on page 2 of 2.</i></p>

*Description/Justification of Change continued*

Consequently, the 216-A-10 Crib is reclassified as a past practice waste site from that of a TSD. This modification of Tri-Party Agreement Action Plan Appendix C deletes the double asterisks (indicating a TSD unit) from the 216-A-10 Crib entry in Appendix C.

Modifications, made by this change form, to Tri-Party Agreement Action Plan Appendix C are displayed with ~~strikethrough~~ to indicate deleted text.
