### Waste Site Reclassification Form

<b>Date Submitted:</b> 12/12/1998	<b>Operable Unit(s):</b> 300-FF-2	<b>Control Number:</b> 98-237
<b>Originator:</b> R. D. Haggard, H6-25	<b>Waste Site ID:</b> 300-114	
<b>Phone:</b> (509) 376-3723	<b>Type of Reclassification Action:</b>	
	<b>Rejected</b> <input checked="" type="radio"/> <b>Closed-Out</b> <input type="radio"/> <b>No Action</b> <input type="radio"/>	

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

**Description of current waste site condition:**

Currently, there are no visual surface features. The drain area was backfilled with clean gravel when the steam system was removed from the 340A building. The gravel over the drain is slightly darker than the other gravel in the area.

**RECEIVED**  
 FEB 21 2008  
 EDMC

**Basis for reclassification:**

The "Inventory of Miscellaneous Streams", Revision 3, lists the site as inactive, source abandoned. When the site was active, it received less than 0.038 liters (0.01 gallons) per minute. This site received steam condensate only. Steam was produced from sanitary water that had been sent through a water softener system to remove minerals (calcium and magnesium). The treated water was introduced into boilers to produce steam. This steam was superheated before distribution to facilities for heating and process use. Disposal sites received steam condensate from the steam distribution lines. When used for heating purposes, this was a seasonal discharge. Non-regulated chemicals were added to dechlorinate the water, prevent scale, and control corrosion.
