

WASTE SITE RECLASSIFICATION FORM

Operable Unit: 100-HR-1

Control Number: 2019-024

Waste Site Code(s)/Subsite Code(s):

116-H-5

Reclassification Category: Interim Final

Reclassification Status: Closed Out No Action Rejected
 RCRA Postclosure Consolidated None

Approvals Needed: DOE Ecology EPA

Description of Current Site Waste Condition:

(what is the current physical state of the site? what activities have been performed?)

The 116-H-5 waste site was previously remediated and reclassified as "interim closed out" under interim action decisions. No additional remediation has been performed at the site.

Basis for Reclassification:

(how does the site meet the reclassification status?)

The selected remedy for the 116-H-5 waste site in the Record of Decision, Hanford 100 Area Superfund Site, 100-DR-1, 100-DR-2, 100-HR-1, 100-HR-2 and 100-HR-3 Operable Units is institutional controls to restrict residential use and excavation into shallow zone soil (less than 4.6 m [15 ft] below ground surface) until 2016. Because the duration has expired, no remaining institutional controls are assigned to the site. No further remedial actions were identified for the site.

Project Manager Comments:

Waste Site Controls:

	Yes	No		Yes	No		Yes	No
Engineered Controls	<input type="radio"/>	<input checked="" type="radio"/>	Institutional Controls	<input type="radio"/>	<input checked="" type="radio"/>	O&M Requirements	<input type="radio"/>	<input checked="" type="radio"/>

If any of the Waste Site Controls are checked "Yes", specify control requirements including reference to the Record of Decision, TSD Closure Letter, or other relevant documents:
