Attachment #1

Summary of Discussion

Unit Managers Meeting:
304 Concretion Facility

August 19, 1992

The meeting opened at 2:30 p.m.

Status of Ecology's review of the NOD response table: Ecology stated that the closure plan is still under review. Since Ecology and RL/WHC are deadlocked regarding several matters, Ecology suggested that the delivery of the NOD responses be delayed pending the upcoming issue resolution meeting between Ecology, EPA, and DOE. Attending unit managers agreed to delay the delivery of the NODs by Ecology.

Status of Equipment (cement mixer) removal letter: The status of the letter requested by Ecology from RL/WHC at the June 22, 1992 Unit Manager's Meeting concerning verification of decontamination and/or appropriate disposal of the cement mixer used in this facility for the concretion of hazardous wastes was discussed. The letter is circulating within the RL organization for review prior to release to Ecology.

New Business: There were no new items of business.

The meeting concluded at 3:00 p.m.

The next Unit Managers Meeting was scheduled for September 17, 1992, at 9:30 a.m., in Lacey, WA.
