Change Title Revise Interim Milestone M-17-06K to Clarify Scope and Intent of Project L-070 Deliverables

Description/Justification of Change

This change control form revises interim milestone M-17-06K as shown below:

M-17-06K Replace the 300 Area Process Sewer Piping Beginning at Five Feet 6/30/1997
 Outside the Contributor Buildings (Unless Special Conditions Make This Impractical) and Replacing the Piping up to the Interface Point into the 300 Area Treated Effluent Disposal Facility by June 1997.
 Piping Installed Circa 1970 or More Recently, Which can be Justified for Continued Use, Need Not be Replaced. Exceptions Stated Above Will be Approved as if they are Class III Changes (Lead Agency Approval) on a Case-By-Case Basis

The revisions noted above are agreed to by the parties in an effort to reduce the scope of Project L-070 without adverse impact to the environment. It is recognized that in several instances it is not practical to replace the process sewer piping within five feet of the building due to obstructions, other buildings, etc. In addition, several thousand feet of process sewer piping could continue to be used for decades, based on confirmation of the piping integrity. These exceptions will be approved on a case-by-case basis throughout the Project life.

Impact of Change

This change will allow exceptions to the scope of Project L-070 to be approved on a case-by-case basis. Cases in which it is not practical to replace the piping within five feet of all buildings or where continued use of existing piping can be adequately justified will be allowed, provided there is no adverse impact to the environment. This change supports the parties cost efficiency initiatives.
