3. **Comment:**

The site is located approximately 150 meters (432 ft) southeast of the 107-H Retention Basin along the Columbia River embankment. The site consists of a small area that contained elevated radiological measurements during a Global Positioning Environmental Radiological Survey (GPERS) that was being performed in 2004. The identification of this area as a discovery site was requested by the Washington Department of Ecology in September 2008.

The area was re-surveyed and posted as a surface contamination area in May 2012.

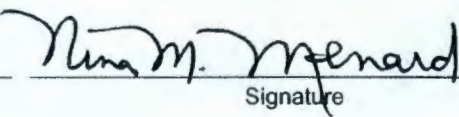

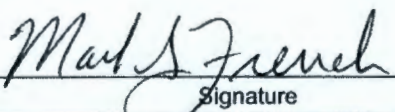

4. **Is the site a Solid Waste Management Unit?** Yes
 No

Any discernible location at the Facility where solid wastes have been placed at any time, irrespective of whether the location was intended for the management of solid or dangerous waste, and includes any area at the Facility at which solid wastes have been routinely and systematically released (for example through spills), and includes dangerous waste treatment, storage, and disposal units.

5. **Does the site need to be addressed under a regulatory program? Check first item that applies.**
