

o Facility Design. In a tour of the NRDWSF, Ecology noted that the facility was well designed and built, possibly one of the better storage facilities currently in operation.

o Schedule. Permit application comments are due from Ecology by the end of October. Upon receipt of the comments, WHC and DOE-RL will have 90 days to prepare a revision to the permit application and resubmit it to Ecology. Ecology will then have 60 days to review and provide comments. WHC and DOE-RL will have 60 days to provide a NOD response table. Changes to the permit application at this point will be made by changing pages. Ecology will identify target dates for these activities in their NOD's.

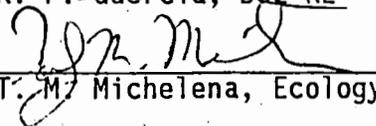

o General Comments. The NRDWSF permit application will contain general facility requirements applicable to all Hanford Site waste management units. A meeting between WHC, DOE-RL, and Ecology will be held on October 18, 1989, to discuss the requirements to be included in the permit application for the NRDWSF and other Hanford waste management units (See Action Item 2). Toby Michelena of Ecology will set the agenda for this meeting.

o Action Items. Key action items assigned during the meeting are summarized as follows:

1. Provide a Notice-of-Deficiency for the NRDWSF Dangerous Waste Permit Application by October 30, 1989. (Ecology)
2. Provide an agenda for the October 18, 1989, meeting on general facility requirements to be included in the Hanford Site Permit. (Ecology)

R. F. Guercia, DOE-RL

T. M. Michelena, Ecology

D. L. Duncan, DOE-RL

S. M. Price, WHC
