3. **Comment:**

The ERDF Lechate pipeline information had been previously documented with the TEDF pipeline information, in the same WIDS Sitecode (600-291-PL). The two systems have different operational scopes and different regulatory requirements. 600-401-PL has been created to represent the segment of pipeline that extends from the 6618C (inside the ERDF fence) to the UP1-5 Pit (located near Beloit Ave and 16th St inside 200 West Area)

4. **Is the site a Solid Waste Management Unit?**

Any discernible location at the Facility where solid wastes have been placed at any time, irrespective of whether the location was intended for the management of solid or dangerous waste, and includes any area at the Facility at which solid wastes have been routinely and systematically released (for example through spills), and includes dangerous waste treatment, storage, and disposal units.

Yes
 No

5. **Does the site need to be addressed under a regulatory program? Check first item that applies.**
