Waste Site Reclassification Form

<b>Date Submitted:</b> 8/3/1998	<b>Operable Unit(s):</b> 300-FF-2	<b>Control Number:</b> 98-046
<b>Originator:</b> C. E. Corriveau, Jr., MSIN HO-17	<b>Waste Site ID:</b> 300-99	
<b>Phone:</b> 372-9565	<b>Type of Reclassification Action:</b> Rejected <input checked="" type="radio"/> Closed-Out <input type="radio"/> No Action <input type="radio"/>	

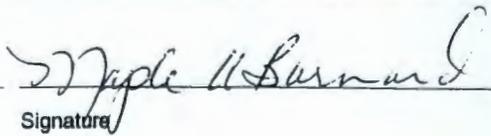

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

**Description of current waste site condition:**

The site is not visible without entering the confined space under the compressed gas storage dock. A limited field walkdown was performed for this site. No access could be gained to the site. The site is listed in the "Inventory of Miscellaneous Streams", Revision 3, as stream #265. The site is listed as a steam condensate injection well. However, according to Brad Atencio, PNNL Effluent Management, the site received blowdown from a liquid nitrogen tank. The site is no longer active.

**Basis for reclassification:**

The site received blowdown from a liquid nitrogen tank. No other waste streams were disposed of through this structure.
