<b>Originator:</b> R. A. Carlson	<b>Waste Site ID:</b> UPR-600-15	<b>Lead Agency:</b> EPA
<b>Phone:</b> 373-9759	<b>Type of Reclassification Action:</b>	
	Rejected <input type="checkbox"/> Closed Out <input type="checkbox"/> Interim Closed Out <input type="checkbox"/> No Action <input checked="" type="checkbox"/>	

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed out, interim closed out, or no action and authorizing backfill of the site, if appropriate. Final removal from the National Priorities List will occur at a future date.

**Description of current waste site condition:**

The current waste site condition is a relatively flat, revegetated soil surface that was contoured to match the surrounding grade as part backfill/regrading operations at the 618-4 Burial Ground. There are no radiological postings in the UPR-600-15 site area.

**Basis for reclassification:**

The UPR-600-15 site consisted of an area where depleted uranium fuel elements were reportedly discarded near the west entrance to the 618-4 Burial Ground. The waste was discovered in 1979. Twenty elements were put into plastic bags with some of the surrounding soil, delivered to United Nuclear Corporation Fuels Operations for analysis, and subsequently buried in the 218-W-3A Mixed Fission Product Trench.

The 618-4 Burial Ground was excavated between 1998 and 2003. Excavated soil and debris were transported to the Environmental Restoration Disposal Facility. Radiological surveys performed in vicinity of the west fence line as part of routine radiological control practices during remedial actions and removal of fence posts at the 618-4 Burial Ground identified no debris or areas of elevated contamination in the area. Consequently, No Action is required for the UPR-600-15 site.
