Control Number: 134	NPL Agreement/Change Control Form <input checked="" type="checkbox"/> Change <input type="checkbox"/> Agreement <input type="checkbox"/> Information Operable Unit(s):	Date Submitted: Date Approved:																												
Document Number/Title: DOE/RL-98-64, Rev 0, Surveillance and Maintenance Plan for the 100N Area Deactivated Facilities		Date Document Last Issued: November 1998																												
Originator: Stuart Kretzschmar		Phone: 373-5941																												
Summary Discussion: Two changes as follows: <ul style="list-style-type: none"> • The existing water treatment system located in structure 183-N was replaced with a new water treatment system that is located in new structure 186-N. Upon startup of the new treatment system, the 183-N structure was deactivated. The 183-N Building is identified as an active building and the 186-N Building is not mentioned in the 100-N Area S&M plan. Therefore, the plan needs to be updated to reflect the current as-built conditions. • The Fission Products Trap and the C-Elevator Pit levels at 100-N have been monitored for the last three years. This data has been analyzed and the trend clearly shows that the drop in the levels are associated with evaporation. Therefore, the frequency of monitoring will be reduced to semi-annually. Any level change different than expected will require additional monitoring until it can be determined the reason for the change. 																														
Justification and Impact of Change: With this request, minor changes need to be made to the existing S&M Plan for the 100N Area Deactivated Facilities (DOE/RL-98-64). These changes are documented below: <ol style="list-style-type: none"> 1. Table 1: Add the following buildings: <ul style="list-style-type: none"> • 183-N Water Treatment Plant, 183-NA Pump House, 183-NB Clear Well, 183-NC Filter Backwash Sump, 183-ND Clear Well Overflow Pond 2. Table 2: Remove the designation of 183-N that is located in front of the water treatment plant and replace with 186-N. Remove 183-NA through ND. 3. Figure 2: Update the figure by adding the 186-N building. 4. Table 3: Change the inspection frequency for the Fission Products Trap and the C-Elevator Pit from "monthly" to "semi-annual". 5. Section 3.8, second paragraph: Insert "186-N" in between "The" and "water" in the first sentence. 6. Figure 19: Add new figure with the 183-N, NA, NB, NC, and ND buildings. 7. Section 4.11, Table 4: Add the following: <table border="1" style="width: 100%; border-collapse: collapse; margin-top: 5px;"> <thead> <tr> <th style="text-align: left;">Inspection</th> <th style="text-align: left;">Frequency</th> <th style="text-align: left;">Building#</th> <th style="text-align: left;">Building Name/Facility</th> </tr> </thead> <tbody> <tr> <td colspan="4">General Inspection</td> </tr> <tr> <td>And Housekeeping</td> <td>A</td> <td>183-N</td> <td>Water Treatment Plant</td> </tr> <tr> <td>" "</td> <td>A</td> <td>183-NA</td> <td>Pump house</td> </tr> <tr> <td>" "</td> <td>A</td> <td>183-NB</td> <td>Clearwell</td> </tr> <tr> <td>" "</td> <td>A</td> <td>183-NC</td> <td>Filter Backwash Sump</td> </tr> <tr> <td>" "</td> <td>A</td> <td>183-ND</td> <td>Clearwell Overflow Pond</td> </tr> </tbody> </table> 8. Table A-1: add a note to the table as follows: "This list reflects the drawings for the 100-N at the time of Revision 0. For update of the list contact the surveillance and maintenance group".
