Ms. J. A. Hedges, Program Manager
 Nuclear Waste Program
 State of Washington
 Department of Ecology
 3100 Port of Benton
 Richland, Washington 99354

Dear Ms. Hedges:

INTEGRATED 100 AREA REMEDIAL INVESTIGATION/FEASIBILITY STUDY WORK PLAN, ADDENDUM 5: 100-NR-1 AND 100-NR-2 OPERABLE UNITS, DOE/RL-2008-46-ADD5, REVISION 0

This letter transmits the Integrated 100 Area Remedial Investigation/Feasibility Study Work Plan, Addendum 5: 100-NR-1 AND 100-NR-2 Operable Units, DOE/RL-2008-46-ADD5, Revision 0 (work plan). The work plan was developed through a cooperative effort between the U.S. Department of Energy Richland Operations Office and the State of Washington Department of Ecology (Ecology) and reflects input provided by Ecology, Tribes, Hanford Advisory Board and stakeholders.

The purpose of a work plan is to explain the Remedial Investigation/Feasibility Study (RI/FS) project background and rationale, and to present detailed plans for investigation of 100-N soils and groundwater under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. The work is also intended to address the Resource Conservation and Recovery Act of 1976 corrective action requirements. The work plan addresses groundwater contamination, soil contamination, and facilities in geographic areas. The work plan, in concert with the Integrated 100 Area Remedial Investigation/Feasibility Study Work Plan, DOE/RL-2008-46, Revision 0, implements an approach designed to reach remediation decisions, describes key features of the planning process to support implementation of this approach, and provides important key regulatory and risk assessment assumptions.

The schedule for completing the work scope and delivering the RI/FS Report and Proposed Plan is defined by the Hanford Federal Facility Agreement and Consent Order Target Date M-016-62-T01, September 17, 2012.

The sampling and analysis plan implementing the scope of work described in the work plan was approved January 3, 2011 and transmitted to Ecology February 2, 2011 via letter 11-AMCP-0078. This document is "Sampling and Analysis Plan for the 100-NR-1 and 100-NR-2 Operable Units Remedial Investigation/Feasibility Study, DOE-RL-2009-42, Revision 0".
