Summary of Discussion

**Unit Managers Meeting
304 Concretion Facility
Federal Building, Room 340
Richland, Washington
and
State of Washington Department of Ecology
Lacey, Washington**

Meeting Held By Teleconference

Meeting Held June 22, 1992

The meeting opened at 2:00 p.m.

The first item of business was the status of the NOD response table. The NOD response table was transmitted on schedule to Ecology June 8, 1992. However, Ecology (S. McKinney) had not seen the NOD table. Ecology (S. McKinney) and RL (R. Krekel) will check at their respective offices for the NOD table.

The second item of business was a discussion on Ecology's Soil Cleanup/Remediation Policy. At this time Ecology is attempting to meld the Soil Cleanup/Remediation Policy issued by the Nuclear and Mixed Waste Management Program with similar policy's issued by other Ecology programs. When completed this effort would produce a policy for state-wide application. Ecology (S. McKinney) stated that until changes were made the policy would be implemented as is.

The third item of business was a discussion on the removal of the cement mixer located in the 304 Concretion Facility. Ecology (S. McKinney) agreed that it would be a good idea to remove the cement mixer at this time. Ecology (S. McKinney) requested a letter be sent to Ecology outlining what would be done to remove the mixer, such as decontamination efforts, sampling, and disposal.

There were no new items of business.

The next Unit Managers Meeting was scheduled for the end of July 1992. The exact date, time, and location would be determined at a later date.

The meeting closed at 2:18 p.m.
