Subject: Avoidance Study Comments/Responses

Hi Jamie:

Because of all of our busy schedules, and the fact that we are all trying to rap up the PNNL report, Aaron DeLonay and I decided to try one more round of written responses to your comments on the USGS Avoidance Report. We will be sending our responses to your recent comments early next week, with a proposed timeline of letting us know by May 18, 2001 if they are satisfactory. If they are satisfactory, then we will be able to finalize and distribute the Avoidance report. If there are some outstanding issues after this round, then let's have a conference call to resolve them.

Thanks for your thorough reviews. Look forward to finishing both reports.

Brad
