

## DISCOVERY SITE EVALUATION CHECKLIST

1.	<b>WIDS Site Code/Subsite Code:</b> 100-D-107, Soil Beneath the 1713-DA Essential Materials Warehouse																																		
2.	<b>Prepared and Reviewed By:</b>

3.	<p><b>Comment:</b></p> <p>The site consists of the soil beneath and surrounding the demolished 1713-DA Essential Materials Warehouse. The 1713-DA Building was used as the "Essential Materials Warehouse" and may have been used to store solid sodium dichromate.</p> <p>Waste site 100-B-27 was discovered in the former location of the analogous building in the 100BC Area, the 1713-BA Essential Materials Warehouse. It is suspected that the contamination in the 100-B-27 site originated from spillage and/or dumping of solid sodium dichromate at the 1713-BA Building. Since the two buildings were intended for the same purpose, there is the potential that soils adjacent to the 1713-DA Building may also have been contaminated with solid sodium dichromate.</p> <div style="text-align: right; margin-top: 20px;">  </div>																																		
4.	<p><b>Is the site a Solid Waste Management Unit?</b></p> <p>Any discernible location at the Facility where solid wastes have been placed at any time, irrespective of whether the location was intended for the management of solid or dangerous waste, and includes any area at the Facility at which solid wastes have been routinely and systematically released (for example through spills), and includes dangerous waste treatment, storage, and disposal units.</p>		<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
