ATTENTION: Mr. P.K. Brockman

RE: 200-BP-1 DATA VALIDATION, TASK ORDER S-92-19, TRANSMITTAL OF REPORT

Dear Mr. Brockman:

Enclosed are four copies of the data validation summary report for data packages 9111L276, 9111L286, 9111L317, 9111L353, 9111L511, 9112L781, and 9112L829 produced under the referenced task order. This report has been reviewed by Mr. Ken Ridgway and his comments have been incorporated. Please distribute this report as follows:

- One copy with the original data package (blue folder) is to be delivered to Mr. Brian Sprouse or Ms. Tami Tanning at the WHC/EDMC offices at 350 Hills Street.
- One copy each to Mark Buckmaster and Becky Bechtold of WHC at 450 Hills Street.

Please call if you have any questions.

Sincerely,

GOLDER ASSOCIATES INC.

Kent Angelos  
Task Manager

Donald M. Caldwell  
Project Director

## 1. INTRODUCTION

This report presents the results of data validation on the following sample delivery groups and sample numbers. The HEIS sample numbers and field QC associated with this group by SDG are:

<u>Data Package ID</u>	<u>HEIS Sample Numbers</u>	<u>Matrix</u>
9111L276	B01B27, B01B28, B019N5, B019N6, B019R3, B019R4, B019P7, B019P8, B019Q5, B019Q6, B019Q9, B019R0	Water
9111L286	B019H3, B019H4, B01B11, B01B12, B01B30	Water
9111L317	B019S1, B019S2, B01B13, B01B14, B01B17, B01B18, B019D9, B019F0, B01B31	Water
9111L353	B019J1, B019J2, B019F3, F019F4, F019H7, B019H8, B019G1, B01B34, B01B33, B019G2	Water
9111L511	B01B24	Water
9112L781	B01B35, B019J9, B019K0, B019N9, B019P0	Water
9112L829	B019D1, B019D2	Water

Sample identifications, locations and sample dates are provided in the tabular data summary provided in Appendix A. Data validation was conducted in accordance with the Westinghouse Hanford Company statement of work (WHC 1991) and validation procedures (WHC 1992).

## 2. DATA QUALITY OBJECTIVES

The data package was complete for all requested analyses and met the data quality objectives of the work plan. Data quality objectives for the project specified the use of CLP methods for the TCL organics and TAL metals/cyanide analytes and the use of standard methods for all other parameters.

Sample quantitation limits were met with the exception of minor differences due to sample volume and dilution factors.

In SDG 9111L286, samples B01B11 and B01B12 were identified as fourth quarter spike duplicate #2. However, the specific sample locations are not currently available, therefore, the recoveries were not calculated.

In SDG 9111L317, samples B01B13 and B01B14 were identified as fourth quarter duplicate #1. Samples B01B17 and B01B18 were identified as fourth quarter duplicate #2. However, the sample locations are not currently available, therefore the relative percent differences were not calculated.

Samples B01B27, B01B28, B01B30, B01B31, B01B34, B01B33, and B01B35 were identified as fourth quarter volatile trip blanks. No valid target compounds were detected in the samples with the exception of methylene chloride at 55 ppb in sample B01B33. The purpose for submittal of these samples is unclear, since they provide no useful field quality control data to compare with the metals and wet chemistry analyses. It is recommended that volatile organic trip blanks only be submitted with samples that are being collected and shipped for volatile organic analyses.

Sample B01B24 was identified as a method trip blank. No target analytes were detected in the sample with the exception of barium, calcium, magnesium, sodium, silicon, chloride, nitrate, and sulfate.

With the exception of the deficiencies identified in Section 3.0, the precision and accuracy goals of the work plan were met.

### 3. QUALIFIED DATA

This section presents a summary of the qualifications required based on validation of the subject data package.

#### 3.1 Major Deficiencies

The following presents a summary of the rejected data.

##### Volatile Organics

- 2-Butanone results in sample B01B35 from SDG 9112L781 have been rejected since the initial and continuing calibration RRF values are less than 0.05.

##### Semivolatile Organics

- No deficiencies were identified requiring rejection of data.

##### Pesticide/PCBs

- No deficiencies were identified requiring rejection of data.

##### Metals

- Silver results were rejected in samples B019J1, B019J2, B019F3, B019F4, B019H7, B019G1, B019G2 from SDG 9111L353 and B01B24 from SDG 9111L511 due to spike sample recoveries of less than 30% and results less than the IDL.
- Mercury results were rejected in all associated samples from SDG 9112L829 due to spike sample recoveries of less than 30% and results less than the IDL.

### Wet Chemistry

- Cyanide results were rejected in samples B019F3 and B019G1 from SDG 9111L353 due to spike sample recoveries of less than 30% and results less than the IDL.
- Nitrate+nitrite results in SDGs: 9111L276, 9111L286, 9111L317, 9111L353, 9112L781, and 9112L829 have been rejected since they do not compare favorably with the IC data. This may be due to inadequate pH adjustment during analysis. If the samples are not pH adjusted to between 5 and 9 prior to analysis, reduction of nitrate to nitrite during application of the hydrazine reagent may be inhibited, though sodium hydroxide reagent is applied during analysis.

### **3.2 Minor Deficiencies**

The following qualifications were required as a result of the validation. Appendices B through F provide supporting documentation and a summary of the samples affected.

#### **3.2.1 Volatile Organics**

##### Initial Calibrations

The following compounds and their associated SDGs exceeded the initial calibration RSD limits of 30%:

- SDG 9112L781: Acetone.

Sample results for the above compounds in their associated SDGs have been qualified as estimated (J for detects, UJ for non-detects).

##### Continuing Calibrations

The following compounds and their associated SDGs exceeded the continuing calibration %D limits of 25%:

- SDG 9111L276: Chloroethane.
- SDG 9111L286: Vinyl acetate, 4-methyl-2-pentanone, and 2-hexanone.
- SDG 9111L317: Acetone, vinyl acetate, 4-methyl-2-pentanone, and 2-hexanone.

- SDG 9111L353: Acetone, vinyl acetate, 4-methyl-2-pentanone, and 2-hexanone.

Sample results for the above compounds in their associated SDGs have been qualified as estimated (J for detects, UJ for non-detects).

#### Blanks

- Methylene chloride and acetone were detected in the laboratory blanks in the following SDGs: 9111L276, 9111L286, 9111L317, 9111L353, 9111L511.
- Methylene chloride and 1,1-dichloroethene were detected in the laboratory blank in SDG 9112L781.

All associated sample results for the above compounds in their respective SDGs have been qualified as undetected (U).

#### 3.2.2 Semivolatile Organics

##### Blanks

The following compounds were detected in the laboratory blanks.

- SDG 9111L511: Tentatively identified compounds - Hydrocarbon at a relative retention time (RRT) of 19.95 and an unknown at a RRT of 24.90.

Associated sample results for the above compounds have been qualified as non-detects.

#### 3.2.3 Pesticide/PCB Organics

- No deficiencies were identified requiring qualification of data.

#### 3.2.4 Metals

##### Holding Times

The following metals samples and analyses exceeded holding times.

- SDG 9112L829: All mercury samples were analyzed out of the holding time.

The associated mercury results were qualified as estimated (J for detects, UJ for non-detects).

##### Blanks

The following analytes were detected in the laboratory blanks.

- SDG 9111L286: Zinc.
- SDG 9111L317: Antimony, potassium, and vanadium.
- SDG 9111L353: Antimony, barium, and iron.
- SDG 9111L511: Copper and zinc.
- SDG 9112L829: Silver.

The associated sample results were qualified as undetected (U).

#### Spike Sample Recovery

The following spike results exceeded the QC limits of 75% to 125%.

- 9111L276: Arsenic, lead, and selenium.
- 9111L286: Selenium.
- 9111L317: Lead and selenium.
- 9111L353: Selenium, thallium, lead, silver (B019H8 only), and silicon.
- 9112L781: Lead.
- 9112L829: Arsenic and iron.

The associated sample results have been qualified as estimated (J for detects, UJ for non-detects).

#### Duplicates

The following duplicate results exceeded the RPD limits of 20%:

- SDG 9112L829: Iron.

The associated sample results have been qualified as estimated (J for detects, UJ for non-detects).

#### ICP Serial Dilutions

The following serial dilution results exceeded the QC limits of 10% for analyte concentrations >50X the IDL:

- SDG 9111L286: Calcium, magnesium, and sodium.
- SDG 9112L781: Calcium, magnesium, and sodium.
- SDG 9112L829: Calcium, magnesium, and sodium.

The associated sample results have been qualified as estimated (J for detects, UJ for non-detects).

#### Furnace AA Quality Control

The following GFAA analytical spikes exceeded the limits of 85% to 115% recovery:

- SDG 9111L276: Arsenic (B019Q6 only), lead, and selenium (B019N5, B019N6, B019R3, B019R4, B019P7, B019Q6, B019Q9, B019R0; however, sample B019N5 was analyzed by MSA and did not require qualification).
- SDG 9111L286: Lead and selenium, however, sample B019H3 was analyzed by MSA for selenium and did not require qualification.
- SDG 9111L317: Lead, selenium, and thallium (B019S2, B01B17, B019F0); however, sample B019S1 was analyzed by MSA for selenium and therefore did not require qualification.
- SDG 9111L353: Arsenic (B019F4, B019H7), lead (B019F3, B019F4, B019H7, B019H8, B019G1, B019G2, B019J1), thallium (B019H8, B019J1, B019J2), and selenium (B019H7, B019H8, B019F3, B019F4, B019J1). However, samples B019F3, B019G2, and B019J1 were analyzed by MSA for selenium and therefore did not require qualification.
- SDG 9112L781: Arsenic (B019J9 only), lead, selenium, and thallium (B019K0 only).
- SDG 9112L829: Lead, selenium, and thallium (B019D1). However, sample B019D2 was analyzed by MSA for selenium and therefore did not require qualification.

Except where noted above, the associated sample results have been qualified as estimated (UJ).

### 3.2.5 Wet Chemistry

#### Holding Times

The following analytes exceeded the holding times:

- SDG 9111L276: Nitrite, nitrate, phosphate, nitrate+nitrite (B019N5, B019R3, B019P7), pH, TDS (B019N5, B019R3, B019P7), and cyanide (B019R3, B019Q9).
- SDG 9111L286: Nitrite, nitrate, phosphate, and pH.
- SDG 9111L317: Nitrite, nitrate, phosphate, and TDS.
- SDG 9111L353: Nitrite, nitrate, phosphate, pH, and TDS.
- SDG 9111L511: Nitrite, nitrate, and phosphate.
- SDG 9112L781: Nitrate, nitrite, phosphate, and TDS.
- SDG 9112L829: Nitrite, nitrate, phosphate, TDS, and pH.

All associated sample results for the above analytes have been qualified as estimated (J for detects, UJ for non-detects).

#### Continuing Calibrations

The following compounds and their associated SDGs exceeded the continuing calibration %R limits of 90% to 100%:

- SDG 9111L286: Nitrite (B01B11 only).
- SDG 9111L353: Chloride (B019J1 only).

Sample results for the above compounds in their associated SDGs have been qualified as estimated (J for detects, UJ for non-detects).

#### Spike Recovery

The following spike recoveries were less than 75%:

- SDG 9111L317: Nitrate+nitrite.
- SDG 9111L353: Cyanide (B019J1 and B019H7).

All associated sample results for the above analytes have been qualified as estimated (J for detects, UJ for non-detects) with the exception of the nitrate+nitrite data. Nitrate+nitrite results have already been rejected due to the discrepancy with the IC data.

#### Laboratory Control Sample

The following laboratory control sample exceeded the limits of 80% to 120% recovery:

- SDG 9111L276: Cyanide.
- SDG 9111L317: Cyanide.
- SDG 9111L353: Cyanide

The associated sample results have been qualified as estimated (J for detects, UJ for non-detects) with the exception of samples B019F3 and B019G1 which have already been rejected due to the matrix spike %R.

#### 4. CONCLUSIONS

Sections 1 through 3 present a summary of the data quality for the subject data package. The results contained in this report are acceptable for use as qualified with the exception of the major deficiencies as reported in Section 3.1.

The appendices provide supporting documentation and tabular summary of the qualified data. The original, as-received data package is enclosed for submittal to the project QA record.

APPENDIX B

DATA VALIDATION DOCUMENTATION

SDG: 9111L276

SAMPLES: B01B27, B01B28, B019N5, B019N6, B019R3,  
B019R4, B019P7, B019P8, B019Q5, B019Q6, B019Q9, B019R0

CONTAINS:

ATTACHMENT 1 - GLOSSARY OF DATA REPORTING QUALIFIERS  
ATTACHMENT 2 - SUMMARY OF DATA QUALIFICATIONS  
ATTACHMENT 3 - AS QUALIFIED LABORATORY DATA  
ATTACHMENT 4 - DATA VALIDATION SUPPORTING DOCUMENTATION

## ATTACHMENT 1

## GLOSSARY OF DATA REPORTING QUALIFIERS

- B - Indicates the compound or analyte was analyzed for and detected. The value reported is less than the contract required quantitation limit (CRQL) but greater than the instrument detection limit (IDL).
- U - Indicates the compound or analyte was analyzed for and not detected. The value reported is the sample quantitation limit corrected for sample dilution and moisture content by the laboratory. The data are usable for decision making purposes.
- UJ - Indicates the compound or analyte was analyzed for and not detected. Due to identified quality control deficiency identified during data validation the value reported may not accurately reflect the sample quantitation limit. The data are usable for decision making purposes.
- J - Indicates the compound or analyte was analyzed for and detected. The associated value is estimated but the data are usable for decision making processes.
- R - Indicates the compound or analyte was analyzed for and due to an identified quality control deficiency the data are unusable.
- NJ - Indicates presumptive evidence of a compound at an estimated value.
- N - Indicates presumptive evidence of a compound.

2. HOLDING TIMES

Have all samples been analyzed within holding times?

Yes  No N/A

ACTION: If any holding times have been exceeded qualify all affected results as estimated (J for detects and UJ for nondetects).

3. INITIAL CALIBRATIONS

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?

Yes No N/A

Are the correlation coefficients  $\geq 0.995$ ?

Yes  No N/A

Was a midrange cyanide standard distilled?

Yes  No N/A

ACTION: Qualify all data as unusable if reported from an analysis in which an instrument was not calibrated or was calibrated with less than the minimum number of standards. Qualify associated sample results >IDL as estimated (J) and results <IDL as estimated (UJ), if the correlation coefficient is <0.995 or the laboratory did not distill the midrange cyanide standard.

4. INITIAL AND CONTINUING CALIBRATION VERIFICATION

Are ICV and CCV percent recoveries within control?

Yes No N/A

Are there calculation errors?

Yes  No N/A

ACTION: Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

5. ICP INTERFERENCE CHECK SAMPLE

Has an ICS sample been analyzed at the proper frequency?

Yes No N/A

Are the AB solution %R values within control?

Yes No N/A

Are there calculation errors?

Yes  No N/A

ACTION: Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

## WHC-SD-EN-SPP-002, Rev. 1

## 6. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

Yes  No  N/A

**ACTION:** Qualify all associated sample results for any analyte  $< 5$  times the amount in any laboratory blank as nondetected (U). If analyte concentrations in the blank are  $>$  CRDL or below the negative CRDL, verify the laboratory has redigested and reanalyzed associated samples with analyte concentrations  $< 10$  times the blank concentration. If the laboratory has not redigested and reanalyzed the samples, note in the validation narrative.

## 7. FIELD BLANKS

Are target analytes present in the field blanks?

Yes  No  N/A

**ACTION:** Qualify all sample results for any analyte  $< 5$  times the amount in any valid field blank as nondetected (U).

## 8. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the control limits?

Yes  No  N/A

**ACTION:** Qualify the affected sample data according to the following requirements:

If spike recovery is  $> 125\%$  and sample results are  $<$  IDL no qualification is required. If spike recovery is  $> 125\%$  or  $< 75\%$  qualify all positive results as estimated (J). If spike recovery is  $30\%$  to  $74\%$  qualify all nondetects as estimated (UJ). If spike recovery is  $< 30\%$ , reject all nondetects (R). If the field blank has been used for spike analysis, note in the validation narrative.

## 9. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits?

Yes  No  N/A

Are there calculation errors?

Yes  No  N/A

**ACTION:** Qualify the sample data according to the following requirements:

**AQUEOUS LCS** - Qualify as estimated (J), all sample results  $>$  IDL, for which the LCS %R falls within the range 50-79% or  $> 120\%$ . Qualify as estimated (UJ), all sample results  $<$  IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R  $< 50\%$ .

**SOLID LCS** - Qualify as estimated (J), all sample results  $>$  IDL for which the LCS result is outside the established control limits. Qualify as estimated (UJ), all sample results  $<$  IDL for which the LCS %R are lower than the established control limits.

## 10. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits?

Yes No  N/A

ACTION: Note the results of the performance audit sample analyses in the data validation narrative.

## 11. DUPLICATE SAMPLE ANALYSIS

Are RPD values acceptable?

Yes No N/A

ACTION: Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD results fall outside the appropriate control limits. If field blanks were used for laboratory duplicates, note in the validation narrative.

## 12. ICP SERIAL DILUTION

Are the serial dilution results acceptable?

Yes No N/A

Is there evidence of negative interference?

Yes  No N/A

ACTION: Qualify the associated data as estimated (J) for those analytes in which the %D is outside the control limits. If evidence of negative interference is found, use professional judgment to qualify the data.

## 13. FIELD DUPLICATE SAMPLES

Do the RPD values exceed the control limits?

Yes No  N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 14. FIELD SPLIT SAMPLES

Do the RPD values exceed the control limits?

Yes No  N/A

ACTION: Note the results of the field split samples in the validation narrative.

## 1516. FURNACE ATOMIC ABSORPTION QUALITY CONTROL

Do all applicable analyses have duplicate injections?

Yes No N/A

Are applicable duplicate injection RSD values within control?

Yes No N/A

If no, were samples rerun once as required?

Yes No  N/A

Does the RSD for the rerun fall within the control limits?

Yes No  N/A

Were analytical spike recoveries within the control limits?

Yes  No N/A

If no, were MSA analyses performed when required?

Yes No N/A

Are MSA correlation coefficients  $\geq 0.995$ ?

Yes No N/A

If no, was a second MSA analysis performed?

Yes No  N/A

**ACTION:** If duplicate injections are outside the acceptance limits and the sample has not been reanalyzed or the reanalysis is outside the acceptance limits, qualify the associated data as estimated (J for detects and UJ for nondetects). If the analytical spike recovery is  $< 40\%$  qualify detects as estimated (J). If the analytical spike recovery is  $\geq 10\%$  but  $< 40\%$ , qualify all nondetects as estimated (UJ) and if the analytical spike recovery is  $< 10\%$ , reject all nondetects (R). If the sample absorbance is  $< 50\%$  of the analytical spike absorbance and the analytical spike recovery is  $< 85\%$  or  $> 115\%$ , qualify all results as estimated (J for detects and UJ for nondetects). If method of standard additions (MSA) was required but was not performed, the MSA samples were spiked incorrectly, or the MSA correlation coefficient was  $< 0.995$ , qualify the associated detected results as estimated (J).

#### 17. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?

Yes No N/A

Are results within the calibrated range of the instruments and within the linear range of the ICP?

Yes No N/A

Are all detection limits below the CRQL?

Yes No N/A

**Action:** If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

#### 18. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes No N/A

Were project specific data quality objectives met for this analysis?

Yes No N/A

**ACTION:** Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

COMMENTS (attach additional sheets as necessary): \_\_\_\_\_

The cyanide results for samples B019NS and B019R3 were qualified as originally qualified as undetected however the concentrations are above the RQL and the qualification has been changed on the Form 1's.

2. HOLDING TIMES

Were all samples analyzed within holding times? Yes    No    N/A

Action: If any holding times were exceeded qualify all affected results as estimated (J for detects and UJ for nondetects).

## WHC-SD-EN-SPP-002, Rev. 1

## 3. INITIAL CALIBRATIONS

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?

Yes    No    N/A

Are the correlation coefficients  $\geq 0.995$ ?

Yes    No    N/A

Was a balance check conducted prior to the TDS analysis?

Yes    No    N/A

Was the titrant normality checked?

Yes    No    N/A

**ACTION:** Qualify all data as unusable (R) if reported from an analysis in which the above criteria were not met.

## 4. INITIAL AND CONTINUING CALIBRATION VERIFICATION

Have ICV and CCV been analyzed at the proper frequency?

Yes    No    N/A

Are ICV and CCV percent recoveries within control?

Yes    No    N/A

Are there calculation errors?

Yes     No    N/A

**ACTION:** Qualify all affected data in accordance with the validation requirements.

## 5. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

Yes     No    N/A

**ACTION:** Qualify all associated sample results for any analyte  $< 5$  times the amount in any laboratory blank as nondetected (U) and list the affected samples and analytes below.

## 6. FIELD BLANKS

Are target analytes present in the field blanks?

Yes    No     N/A

**ACTION:** Qualify all sample results for any analyte  $< 5$  times the amount in any valid field blank as nondetected (U).

## 7. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the acceptance limits?

Yes    No    N/A

**ACTION:** If the sample concentration exceeds the spike concentration by a factor of 4 or more, and spike recoveries are outside the acceptance limits, no qualification is necessary. If spike recovery is outside the control limits and the sample results are  $> CRQL$ , qualify the data as estimated (J). If the spike recovery is  $< 30\%$  and the sample results are less than the IDL qualify the data as unusable (R).

## 8. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits?

*OK only*

~~excluded~~  
 Yes  No N/A

Are there calculation errors?

Yes  No  N/A

ACTION: Qualify the affected results according to the following requirements:

AQUEOUS LCS - Qualify as estimated (J), all sample results >IDL, for which the LCS %R falls within the range 50-79% or >120%. Qualify as estimated (UJ), all sample results <IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R <50%.

SOLID LCS - Qualify as estimated (J), all sample results >IDL for which the LCS %R is outside the established control limits. Qualify as estimated (UJ), all sample results <IDL for which the LCS %R are lower than the established control limits.

## 9. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits?

Yes No  N/A

ACTION: Note the results of the performance audit samples in the validation narrative.

## 10. DUPLICATE SAMPLE ANALYSIS

Are RPD values within the acceptance limits?

Yes No N/A

Action: Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD falls outside the acceptance limits.

## 11. FIELD DUPLICATE SAMPLES

Do RPD values exceed the acceptance limits?

Yes No  N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 12. FIELD SPLIT SAMPLES

Do RPD values exceed the acceptance limits?

Yes No  N/A

ACTION: Note the results of the field split samples in the validation narrative.

## 13. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?

 Yes    No    N/A

Are instrument detection limits below the CRDL?

 Yes    No    N/A

Action: If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

## 14. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

 Yes    No    N/A

Were project specific data quality objectives met for this analysis?

 Yes    No    N/A

ACTION: Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

## VOLATILE ORGANIC DATA VALIDATION CHECKLIST - FORM A-1

PROJECT: 200-22-1	REVIEWER: G	DATE: 6/3/97
LABORATORY: Wistar	CASE: —	SDG: 9111L276
SAMPLES/MATRIX:		
B01B27, B01B28		
ali water		

## 1. DATA PACKAGE COMPLETENESS

Review the data package for completeness and check off the items below. If any data review elements are missing contact the laboratory for submittal.

Data Package Item	Present?:	Yes	No	N/A
Case Narrative		/	—	—
Data Summary		/	—	—
Chain-of-Custody		/	—	—
QC Summary		/	—	—
Surrogate report		/	—	—
MS/MSD report		/	—	—
Blank summary report		/	—	—
GC/MS tuning report		/	—	—
Internal standard summary report		/	—	—
Sample Data		/	—	—
Sample reports		/	—	—
TIC reports for each sample		/	—	—
RIC reports for all samples		/	—	—
Raw and corrected spectra for all detected results		/	—	—
Raw and corrected library search data for all reported TIC		/	—	—
Quantitation and calculation data for all TIC		/	—	—
Standards Data		/	—	—
Initial calibration report		/	—	—
RIC and quantitation reports for initial calibration		/	—	—
Continuing calibration reports		/	—	—
RIC and quantitation reports for cont. calibrations		/	—	—
Internal standard summary report		/	—	—
Raw QC Data		/	—	—
Tuning report, spectra and mass lists		/	—	—
Blank analysis reports		/	—	—
TIC reports for all blanks		/	—	—
RIC and quantitation reports for blanks		/	—	—
Raw and corrected spectra for all detected results in blanks		/	—	—
Raw and corrected library search data for all reported TIC		/	—	—

Data Package Item	Present?:	Yes	No	N/A
Quantitation and calculation data for all TIC MS/MSD report forms		/	—	/
RIC and quantitation reports for MS/MSD		/	—	—
Additional Data				
Moisture/% solids data sheets	6/14/92	/	X	X
Reduction formulae		X	X	X
Instrument time logs		X	X	X
Chemist notebook pages		/	—	/
Sample preparation sheets		/	—	—

2. HOLDING TIMES

Complete the holding time summary form listing all samples and dates of collection and analysis.

Were all samples analyzed within holding time?  Yes  No  N/A

ACTION: If any holding times were exceeded, but not by greater than a factor of two, qualify associated samples as estimated (J for detects or UJ for nondetects), otherwise reject all nondetects (R) and qualify all associated detects as estimated (J).

3. INSTRUMENT CALIBRATION, TUNING AND PERFORMANCE CHECKS

3.1 GC/MS TUNING AND PERFORMANCE CHECKS

Is a bromofluorobenzene tune report present for each applicable 12-h period?  Yes  No  N/A

Do all tunes on all instruments meet the tuning criteria?  Yes  No  N/A

Do all tunes on all instruments meet the expanded criteria?  Yes  No  N/A

Has the laboratory made any calculation or transcription errors?  Yes  No  N/A

Have the proper significant figures been reported?  Yes  No  N/A

ACTION: If the mass calibration is out of specification but within the expanded criteria, qualify associated data as estimated (J for detects or UJ for nondetects). If all tuning criteria are missed, qualify all associated data as unusable (R).

3.2 INITIAL CALIBRATION

Is an initial calibration report provided for all instruments?  Yes  No  N/A

Are all RSD values  $\leq 30\%$  (2/88 SOW)?  Yes  No  N/A

Are all RRF values  $\geq 0.05$  (2/88 SOW)?  Yes  No  N/A

Are all applicable RSD values $\leq 20.5\%$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all applicable RSD values $\leq 40\%$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all applicable RRF values within SOW limits (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all erratic performance compound RRF values $\geq 0.01$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to two TCL compounds, if any RRF value is out of specification qualify all detected results for the particular compound as estimated (J) and all nondetects as unusable (R). Making allowances for up to two TCL compounds, if any RSD value is out of specification qualify all associated data as estimated (J for detects or UJ for nondetects).

### 3.3. CONTINUING CALIBRATION

Is a continuing calibration report present for all 12-h periods in which associated samples were analyzed?	<input checked="" type="radio"/> Yes	No	N/A
Are all RRF values $\geq 0.05$ (2/88 SOW)?	<input checked="" type="radio"/> Yes	No	N/A
Are all %D values $\leq 25\%$ (2/88 or 3/90 SOW)?	Yes	<input checked="" type="radio"/> No	N/A
Are all %D values $\leq 40\%$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all RRF values within SOW limits (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all erratic performance compound RRF values $\geq 0.01$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to two TCL compounds, if any RRF value is out of specification qualify all associated detected results as estimated and all nondetects as unusable (R). Making allowances for up to two TCL compounds, if any %D is out of specification, qualify all associated results as estimated (J for detects or UJ for nondetects).

## 4. BLANKS

### 4.1 LABORATORY BLANKS

Has the laboratory conducted a method blank analysis per matrix for every 12-h period in which samples were analyzed?	<input checked="" type="radio"/> Yes	No	N/A
Are TCL compounds present in the laboratory blanks?	<input checked="" type="radio"/> Yes	No	N/A

**ACTION:** Qualify all sample results  $\leq 10$  times the highest blank concentration for the common laboratory contaminants, as nondetects (U) or at the SQL if the result is  $< CRQL$ . Qualify all remaining sample results  $\leq 5$  times the blank concentration in similar fashion.

## 4.2. FIELD BLANKS

Are TCL compounds present in the field blanks?

Yes

No

N/A

**ACTION:** Qualify all detected sample results  $\leq 5$  times the amount in any valid field blank as nondetects (U) and note the field blank results in the validation narrative.

## 5. ACCURACY

## 5.1 SURROGATE/SYSTEM MONITORING COMPOUND RECOVERY

Are any surrogate recoveries out of specification?

Yes

No

N/A

Are any surrogate recoveries  $< 10\%$ ?

Yes

No

N/A

Are any method blank surrogate recoveries out of specification?

Yes

No

N/A

**ACTION:** Qualify all associated sample results as estimated (J for detects or UJ for nondetects) for surrogates out of specification but  $> 10\%$ . Qualify all associated positive sample results as estimated (J) and all nondetect results as unusable (R) for all surrogates below 10%. If method blank surrogates are out of specification and the associated sample surrogates are acceptable no qualification is necessary, however, the laboratory should be contacted for an explanation.

## 5.2 MATRIX SPIKE RECOVERY

Has an MS/MSD analysis been conducted per matrix in the sample group?

Yes

No

N/A

Are MS/MSD recoveries within specification?

Yes

No

N/A

Are there any calculation errors?

Yes

No

N/A

**ACTION:** If an MS/MSD analysis has not been conducted contact the laboratory for an explanation. Review the MS/MSD recoveries in conjunction with other QC data such as surrogate recoveries and note the results in the validation narrative. If MS/MSD recoveries are out of specification and sample concentration is  $> 5$  times the spike concentration, no qualification is required, otherwise qualify results as follows: Qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J) in all samples if associated surrogates are also out of specification. The qualification shall only be done on samples of similar matrix as the MS/MSD samples. If it is determined from the review that only the spiked samples are affected by low recoveries, qualify only the results for the spiked sample as described above. If it is determined from the review that out of specification MS/MSD recoveries are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 5.3 PERFORMANCE AUDIT SAMPLES

Are the performance audit sample results within the acceptance limits?

Yes No  N/A

ACTION: Note the results of the performance audit sample in the validation narrative.

## 6. PRECISION

## 6.1 MATRIX SPIKE/MATRIX SPIKE DUPLICATES

Are RPD values within specification?

Yes No N/A

Are there any calculation errors?

Yes  No N/A

ACTION: Review the MS/MSD results in conjunction with other QC data such as field duplicates and note the results in the validation narrative. If MS/MSD RPDs are out of specification and sample results are  $> 5 \times \text{CRQL}$  qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J). If it is determined from the review that out of specification MS/MSD results are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 6.2 FIELD DUPLICATE SAMPLES

Are field duplicate RPD values acceptable?

Yes No  N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 6.3 FIELD SPLIT SAMPLES

Are field split RPD values acceptable?

Yes No  N/A

ACTION: Note the results of the field split samples in the validation narrative.

## 7. SYSTEM PERFORMANCE

## 7.1 INTERNAL STANDARDS PERFORMANCE

Are any internal standard area counts outside the acceptance limits?

Yes  No N/A

Are retention times for any internal standard outside the  $\pm 30$  second windows established by the most recent calibration check?

Yes  No N/A

ACTION: If the area counts are outside the acceptance limits qualify all associated results as estimated (J for detects or UJ for nondetects). If it is determined from the review that out of specification area counts and relative retention times are indicative of systematic problems within the laboratory the reviewer may consider rejection of all affected sample data (R).

## 8. COMPOUND IDENTIFICATION AND QUANTITATION

## 8.1 COMPOUND IDENTIFICATION

Are detected compounds within  $\pm 0.06$  relative retention time units of the associated calibration standard? *all results are ND* Yes No  N/A

Are all ions at a relative intensity of  $\geq 10\%$  in the standard spectra present in the sample spectra? Yes No  N/A

Do the relative intensities between the standard and sample spectra agree within 20%? Yes No  N/A

Have all ions  $> 10\%$  in the sample spectra that are not present in the standard spectra been reviewed for possible background contamination? Yes No  N/A

Are molecular ions present in the reference spectrum present in the sample spectrum? Yes No  N/A

**ACTION:** If compound identification is in error and retention time and mass spectral criteria are exceeded qualify all affected positive results as unusable (R). If cross-contamination between analyses is suspected, qualify affected data as unusable (R). Note the results in the validation narrative.

## 8.2 REPORTED RESULTS AND QUANTITATION LIMITS

Has the laboratory used the correct RRF values and internal standard(s) for quantitation? *all results are ND* Yes No  N/A

Are results and quantitation limits calculated properly?  Yes No N/A

Has the laboratory reported the sample quantitation limits within 5xCRQL values?  Yes No N/A

**ACTION:** If the results and quantitation limits are in error contact the laboratory for clarification and note in the validation narrative.

## 8.3 TENTATIVELY IDENTIFIED COMPOUNDS (TIC)

Has the laboratory conducted a spectral library search on all candidate TIC peaks in accordance with the analytical SOW? Yes No  N/A

Has the laboratory properly identified and coded all TIC? Yes No  N/A

**ACTION:** If the laboratory has failed to search the minimum number of TIC peaks in the chromatogram contact the laboratory for submittal of the required data. Qualify as nondetects (U) all TIC compounds present in samples and blanks using the review criteria specified in the validation requirements. If TIC identification is in error sample results should be qualified as nondetects (U) or unusable (R). If TIC identifications are judged valid, qualify the results as presumptive and estimated (JN).

## 9. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes    No    N/A

Were project specific data quality objectives met for this analysis?

Yes    No    N/A

**ACTION:** Summarize all the data qualifications recommended in the foregoing sections, and complete the data validation narrative according to the requirements of Section 10.0 of the data validation requirements.

APPENDIX C

DATA VALIDATION DOCUMENTATION

SDG: 9111L286

SAMPLES: B019H3, B019H4, B01B11, B01B12, B01530

CONTAINS:

- ATTACHMENT 1 - GLOSSARY OF DATA REPORTING QUALIFIERS
- ATTACHMENT 2 - SUMMARY OF DATA QUALIFICATIONS
- ATTACHMENT 3 - AS QUALIFIED LABORATORY DATA
- ATTACHMENT 4 - DATA VALIDATION SUPPORTING DOCUMENTATION

## ATTACHMENT 1

## GLOSSARY OF DATA REPORTING QUALIFIERS

- B - Indicates the compound or analyte was analyzed for and detected. The value reported is less than the contract required quantitation limit (CRQL) but greater than the instrument detection limit (IDL).
- U - Indicates the compound or analyte was analyzed for and not detected. The value reported is the sample quantitation limit corrected for sample dilution and moisture content by the laboratory. The data are usable for decision making purposes.
- UJ - Indicates the compound or analyte was analyzed for and not detected. Due to identified quality control deficiency identified during data validation the value reported may not accurately reflect the sample quantitation limit. The data are usable for decision making purposes.
- J - Indicates the compound or analyte was analyzed for and detected. The associated value is estimated but the data are usable for decision making processes.
- R - Indicates the compound or analyte was analyzed for and due to an identified quality control deficiency the data are unusable.
- NJ - Indicates presumptive evidence of a compound at an estimated value.
- N - Indicates presumptive evidence of a compound.

## 2. HOLDING TIMES

Have all samples been analyzed within holding times?  Yes No N/A

**ACTION:** If any holding times have been exceeded qualify all affected results as estimated (J for detects and UJ for nondetects).

## 3. INITIAL CALIBRATIONS

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?  Yes No N/A

Are the correlation coefficients  $\geq 0.995$ ?  Yes No N/A

Was a midrange cyanide standard distilled?  Yes No N/A

**ACTION:** Qualify all data as unusable if reported from an analysis in which an instrument was not calibrated or was calibrated with less than the minimum number of standards. Qualify associated sample results  $> IDL$  as estimated (J) and results  $< IDL$  as estimated (UJ), if the correlation coefficient is  $< 0.995$  or the laboratory did not distill the midrange cyanide standard.

## 4. INITIAL AND CONTINUING CALIBRATION VERIFICATION

Are ICV and CCV percent recoveries within control?  Yes No N/A

Are there calculation errors? Yes  No N/A

**ACTION:** Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

## 5. ICP INTERFERENCE CHECK SAMPLE

Has an ICS sample been analyzed at the proper frequency?  Yes No N/A

Are the AB solution %R values within control?  Yes No N/A

Are there calculation errors? Yes  No N/A

**ACTION:** Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

## 6. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

Yes    No    N/A

**ACTION:** Qualify all associated sample results for any analyte <5 times the amount in any laboratory blank as nondetected (U). If analyte concentrations in the blank are >CRDL or below the negative CRDL, verify the laboratory has redigested and reanalyzed associated samples with analyte concentrations < 10 times the blank concentration. If the laboratory has not redigested and reanalyzed the samples, note in the validation narrative.

## 7. FIELD BLANKS

Are target analytes present in the field blanks?

Yes    No     N/A

**ACTION:** Qualify all sample results for any analyte <5 times the amount in any valid field blank as nondetected (U).

## 8. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the control limits?

Yes     No    N/A

**ACTION:** Qualify the affected sample data according to the following requirements:

If spike recovery is > 125% and sample results are <IDL no qualification is required. If spike recovery is > 125% or < 75% qualify all positive results as estimated (J). If spike recovery is 30% to 74% qualify all nondetects as estimated (UJ). If spike recovery is < 30%, reject all nondetects (R). If the field blank has been used for spike analysis, note in the validation narrative.

## 9. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits?

Yes    No    N/A

Are there calculation errors?

Yes     No    N/A

**ACTION:** Qualify the sample data according to the following requirements:

**AQUEOUS LCS** - Qualify as estimated (J), all sample results > IDL, for which the LCS %R falls within the range 50-79% or > 120%. Qualify as estimated (UJ), all sample results < IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R < 50%.

**SOLID LCS** - Qualify as estimated (J), all sample results > IDL for which the LCS result is outside the established control limits. Qualify as estimated (UJ), all sample results < IDL for which the LCS %R are lower than the established control limits.

## 10. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits?

Yes No  N/A

ACTION: Note the results of the performance audit sample analyses in the data validation narrative.

## 11. DUPLICATE SAMPLE ANALYSIS

Are RPD values acceptable?

Yes No N/A

ACTION: Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD results fall outside the appropriate control limits. If field blanks were used for laboratory duplicates, note in the validation narrative.

## 12. ICP SERIAL DILUTION

Are the serial dilution results acceptable?

Yes  No N/A

Is there evidence of negative interference?

Yes  No N/A

ACTION: Qualify the associated data as estimated (J) for those analytes in which the %D is outside the control limits. If evidence of negative interference is found, use professional judgment to qualify the data.

## 13. FIELD DUPLICATE SAMPLES

Do the RPD values exceed the control limits?

Yes No  N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 14. FIELD SPLIT SAMPLES

Do the RPD values exceed the control limits?

Yes No  N/A

ACTION: Note the results of the field split samples in the validation narrative.

## 1516. FURNACE ATOMIC ABSORPTION QUALITY CONTROL

Do all applicable analyses have duplicate injections?

Yes No N/A

Are applicable duplicate injection RSD values within control?

Yes No N/A

If no, were samples rerun once as required?

Yes No  N/A

Does the RSD for the rerun fall within the control limits?

Yes No  N/A

Were analytical spike recoveries within the control limits?

Yes  No N/A

If no, were MSA analyses performed when required?	<input checked="" type="radio"/> Yes	No	N/A
Are MSA correlation coefficients $\geq 0.995$ ?	<input checked="" type="radio"/> Yes	No	N/A
If no, was a second MSA analysis performed?	Yes	No	<input checked="" type="radio"/> N/A

**ACTION:** If duplicate injections are outside the acceptance limits and the sample has not been reanalyzed or the reanalysis is outside the acceptance limits, qualify the associated data as estimated (J for detects and UJ for nondetects). If the analytical spike recovery is  $< 40\%$  qualify detects as estimated (J). If the analytical spike recovery is  $\geq 10\%$  but  $< 40\%$ , qualify all nondetects as estimated (UJ) and if the analytical spike recovery is  $< 10\%$ , reject all nondetects (R). If the sample absorbance is  $< 50\%$  of the analytical spike absorbance and the analytical spike recovery is  $< 85\%$  or  $> 115\%$ , qualify all results as estimated (J for detects and UJ for nondetects). If method of standard additions (MSA) was required but was not performed, the MSA samples were spiked incorrectly, or the MSA correlation coefficient was  $< 0.995$ , qualify the associated detected results as estimated (J).

#### 17. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?	<input checked="" type="radio"/> Yes	No	N/A
Are results within the calibrated range of the instruments and within the linear range of the ICP?	<input checked="" type="radio"/> Yes	No	N/A
Are all detection limits below the CRQL?	<input checked="" type="radio"/> Yes	No	N/A

**Action:** If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

#### 18. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?	<input checked="" type="radio"/> Yes	No	N/A
Were project specific data quality objectives met for this analysis?	<input checked="" type="radio"/> Yes	No	N/A

**ACTION:** Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

## 3. INITIAL CALIBRATIONS

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?

Yes    No    N/A

Are the correlation coefficients  $\geq 0.995$ ?

Yes    No    N/A

Was a balance check conducted prior to the TDS analysis?

Yes    No    N/A

Was the titrant normality checked?

Yes    No    N/A

**ACTION:** Qualify all data as unusable (R) if reported from an analysis in which the above criteria were not met.

## 4. INITIAL AND CONTINUING CALIBRATION VERIFICATION

Have ICV and CCV been analyzed at the proper frequency?

Yes    No    N/A

Are ICV and CCV percent recoveries within control?

Yes     No    N/A

Are there calculation errors?

Yes     No    N/A

**ACTION:** Qualify all affected data in accordance with the validation requirements.

## 5. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

Yes     No    N/A

**ACTION:** Qualify all associated sample results for any analyte  $< 5$  times the amount in any laboratory blank as nondetected (U) and list the affected samples and analytes below.

## 6. FIELD BLANKS

Are target analytes present in the field blanks?

Yes    No     N/A

**ACTION:** Qualify all sample results for any analyte  $< 5$  times the amount in any valid field blank as nondetected (U).

## 7. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the acceptance limits?

Yes    No    N/A

**ACTION:** If the sample concentration exceeds the spike concentration by a factor of 4 or more, and spike recoveries are outside the acceptance limits, no qualification is necessary. If spike recovery is outside the control limits and the sample results are  $> CRQL$ , qualify the data as estimated (J). If the spike recovery is  $< 30\%$  and the sample results are less than the IDL qualify the data as unusable (R).

## 8. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits? *In only*  Yes  No  N/A

Are there calculation errors?  Yes  No  N/A

**ACTION:** Qualify the affected results according to the following requirements:

**AQUEOUS LCS** - Qualify as estimated (J), all sample results >IDL, for which the LCS %R falls within the range 50-79% or >120%. Qualify as estimated (UJ), all sample results <IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R <50%.

**SOLID LCS** - Qualify as estimated (J), all sample results >IDL for which the LCS %R is outside the established control limits. Qualify as estimated (UJ), all sample results <IDL for which the LCS %R are lower than the established control limits.

## 9. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits?  Yes  No  N/A

**ACTION:** Note the results of the performance audit samples in the validation narrative.

## 10. DUPLICATE SAMPLE ANALYSIS

Are RPD values within the acceptance limits? *Imp. visible results*  Yes  No  N/A

**Action:** Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD falls outside the acceptance limits.

## 11. FIELD DUPLICATE SAMPLES

Do RPD values exceed the acceptance limits?  Yes  No  N/A

**ACTION:** Note the results of the field duplicate samples in the validation narrative.

## 12. FIELD SPLIT SAMPLES

Do RPD values exceed the acceptance limits?  Yes  No  N/A

**ACTION:** Note the results of the field split samples in the validation narrative.

Chemist notebook pages		<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sample preparation sheets		<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## 2. HOLDING TIMES

Complete the holding time summary form listing all samples and dates of collection and analysis.

Were all samples analyzed within holding time?  Yes  No  N/A

**ACTION:** If any holding times were exceeded, but not by greater than a factor of two, qualify associated samples as estimated (J for detects or UJ for nondetects), otherwise reject all nondetects (R) and qualify all associated detects as estimated (J).

## 3. INSTRUMENT CALIBRATION, TUNING AND PERFORMANCE CHECKS

## 3.1 GC/MS TUNING AND PERFORMANCE CHECKS

Is a bromofluorobenzene tune report present for each applicable 12-h period?  Yes  No  N/A

Do all tunes on all instruments meet the tuning criteria?  Yes  No  N/A

Do all tunes on all instruments meet the expanded criteria?  Yes  No  N/A

Has the laboratory made any calculation or transcription errors?  Yes  No  N/A

Have the proper significant figures been reported?  Yes  No  N/A

**ACTION:** If the mass calibration is out of specification but within the expanded criteria, qualify associated data as estimated (J for detects or UJ for nondetects). If all tuning criteria are missed, qualify all associated data as unusable (R).

## 3.2 INITIAL CALIBRATION

Is an initial calibration report provided for all instruments?  Yes  No  N/A

Are all RSD values  $\leq 30\%$  (2/88 SOW)?  Yes  No  N/A

Are all RRF values  $\geq 0.05$  (2/88 SOW)?  Yes  No  N/A

Are all applicable RSD values $\leq 20.5\%$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all applicable RSD values $\leq 40\%$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all applicable RRF values within SOW limits (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all erratic performance compound RRF values $\geq 0.01$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to two TCL compounds, if any RRF value is out of specification qualify all detected results for the particular compound as estimated (J) and all nondetects as unusable (R). Making allowances for up to two TCL compounds, if any RSD value is out of specification qualify all associated data as estimated (J for detects or UJ for nondetects).

### 3.3. CONTINUING CALIBRATION

Is a continuing calibration report present for all 12-h periods in which associated samples were analyzed?	<input checked="" type="radio"/> Yes	No	N/A
Are all RRF values $\geq 0.05$ (2/88 SOW)?	<input checked="" type="radio"/> Yes	No	N/A
Are all %D values $\leq 25\%$ (2/88 or 3/90 SOW)?	Yes	<input checked="" type="radio"/> No	N/A
Are all %D values $\leq 40\%$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all RRF values within SOW limits (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all erratic performance compound RRF values $\geq 0.01$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to two TCL compounds, if any RRF value is out of specification qualify all associated detected results as estimated and all nondetects as unusable (R). Making allowances for up to two TCL compounds, if any %D is out of specification, qualify all associated results as estimated (J for detects or UJ for nondetects).

## 4. BLANKS

### 4.1 LABORATORY BLANKS

Has the laboratory conducted a method blank analysis per matrix for every 12-h period in which samples were analyzed?	<input checked="" type="radio"/> Yes	No	N/A
Are TCL compounds present in the laboratory blanks?	<input checked="" type="radio"/> Yes	No	N/A

**ACTION:** Qualify all sample results  $\leq 10$  times the highest blank concentration for the common laboratory contaminants, as nondetects (U) or at the SQL if the result is  $< CRQL$ . Qualify all remaining sample results  $\leq 5$  times the blank concentration in similar fashion.

## 4.2. FIELD BLANKS

Are TCL compounds present in the field blanks?

Yes No  N/A

**ACTION:** Qualify all detected sample results  $\leq 5$  times the amount in any valid field blank as nondetects (U) and note the field blank results in the validation narrative.

## 5. ACCURACY

## 5.1 SURROGATE/SYSTEM MONITORING COMPOUND RECOVERY

Are any surrogate recoveries out of specification?

Yes  No N/A

Are any surrogate recoveries  $< 10\%$ ?

Yes  No N/A

Are any method blank surrogate recoveries out of specification?

Yes  No N/A

**ACTION:** Qualify all associated sample results as estimated (J for detects or UJ for nondetects) for surrogates out of specification but  $> 10\%$ . Qualify all associated positive sample results as estimated (J) and all nondetect results as unusable (R) for all surrogates below  $10\%$ . If method blank surrogates are out of specification and the associated sample surrogates are acceptable no qualification is necessary, however, the laboratory should be contacted for an explanation.

## 5.2 MATRIX SPIKE RECOVERY

Has an MS/MSD analysis been conducted per matrix in the sample group?

Yes No N/A

Are MS/MSD recoveries within specification?

Yes No N/A

Are there any calculation errors?

Yes  No N/A

**ACTION:** If an MS/MSD analysis has not been conducted contact the laboratory for an explanation. Review the MS/MSD recoveries in conjunction with other QC data such as surrogate recoveries and note the results in the validation narrative. If MS/MSD recoveries are out of specification and sample concentration is  $> 5$  times the spike concentration, no qualification is required, otherwise qualify results as follows: Qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J) in all samples if associated surrogates are also out of specification. The qualification shall only be done on samples of similar matrix as the MS/MSD samples. If it is determined from the review that only the spiked samples are affected by low recoveries, qualify only the results for the spiked sample as described above. If it is determined from the review that out of specification MS/MSD recoveries are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 5.3 PERFORMANCE AUDIT SAMPLES

Are the performance audit sample results within the acceptance limits?

Yes No  N/A

ACTION: Note the results of the performance audit sample in the validation narrative.

## 6. PRECISION

## 6.1 MATRIX SPIKE/MATRIX SPIKE DUPLICATES

Are RPD values within specification?

Yes No N/A

Are there any calculation errors?

Yes  No N/A

ACTION: Review the MS/MSD results in conjunction with other QC data such as field duplicates and note the results in the validation narrative. If MS/MSD RPDs are out of specification and sample results are  $> 5 \times \text{CRQL}$  qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J). If it is determined from the review that out of specification MS/MSD results are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 6.2 FIELD DUPLICATE SAMPLES

Are field duplicate RPD values acceptable?

Yes No  N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 6.3 FIELD SPLIT SAMPLES

Are field split RPD values acceptable?

Yes No  N/A

ACTION: Note the results of the field split samples in the validation narrative.

## 7. SYSTEM PERFORMANCE

## 7.1 INTERNAL STANDARDS PERFORMANCE

Are any internal standard area counts outside the acceptance limits?

Yes  No N/A

Are retention times for any internal standard outside the  $\pm 30$  second windows established by the most recent calibration check?

Yes  No N/A

ACTION: If the area counts are outside the acceptance limits qualify all associated results as estimated (J for detects or UJ for nondetects). If it is determined from the review that out of specification area counts and relative retention times are indicative of systematic problems within the laboratory the reviewer may consider rejection of all affected sample data (R).

## 8. COMPOUND IDENTIFICATION AND QUANTITATION

## 8.1 COMPOUND IDENTIFICATION

Are detected compounds within  $\pm 0.06$  relative retention time units of the associated calibration standard? *No detects in samples* Yes No  N/A

Are all ions at a relative intensity of  $\geq 10\%$  in the standard spectra present in the sample spectra?  Yes No N/A

Do the relative intensities between the standard and sample spectra agree within 20%?  Yes No N/A

Have all ions  $> 10\%$  in the sample spectra that are not present in the standard spectra been reviewed for possible background contamination?  Yes No N/A

Are molecular ions present in the reference spectrum present in the sample spectrum?  Yes No N/A

**ACTION:** If compound identification is in error and retention time and mass spectral criteria are exceeded qualify all affected positive results as unusable (R). If cross-contamination between analyses is suspected, qualify affected data as unusable (R). Note the results in the validation narrative.

## 8.2 REPORTED RESULTS AND QUANTITATION LIMITS

Has the laboratory used the correct RRF values and internal standard(s) for quantitation? *No detects in samples* Yes No  N/A

Are results and quantitation limits calculated properly?  Yes No N/A

Has the laboratory reported the sample quantitation limits within  $5 \times \text{CRQL}$  values?  Yes No N/A

**ACTION:** If the results and quantitation limits are in error contact the laboratory for clarification and note in the validation narrative.

## 8.3 TENTATIVELY IDENTIFIED COMPOUNDS (TIC)

Has the laboratory conducted a spectral library search on all candidate TIC peaks in accordance with the analytical SOW?  Yes No N/A

Has the laboratory properly identified and coded all TIC? Yes No  N/A

**ACTION:** If the laboratory has failed to search the minimum number of TIC peaks in the chromatogram contact the laboratory for submittal of the required data. Qualify as nondetects (U) all TIC compounds present in samples and blanks using the review criteria specified in the validation requirements. If TIC identification is in error sample results should be qualified as nondetects (U) or unusable (R). If TIC identifications are judged valid, qualify the results as presumptive and estimated (JN).

## 9. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes    No    N/A

Were project specific data quality objectives met for this analysis?

Yes    No    N/A

**ACTION:** Summarize all the data qualifications recommended in the foregoing sections, and complete the data validation narrative according to the requirements of Section 10.0 of the data validation requirements.

DATA VALIDATION DOCUMENTATION

SDG: 9111L317

SAMPLES: B019S1, B019S2, B01B13, B01B14,  
B01B17, B01B18, B019D9, B019F0, B01B31

CONTAINS:

- ATTACHMENT 1 - GLOSSARY OF DATA REPORTING QUALIFIERS
- ATTACHMENT 2 - SUMMARY OF DATA QUALIFICATIONS
- ATTACHMENT 3 - AS QUALIFIED LABORATORY DATA
- ATTACHMENT 4 - DATA VALIDATION SUPPORTING DOCUMENTATION

## ATTACHMENT 1

## GLOSSARY OF DATA REPORTING QUALIFIERS

- B - Indicates the compound or analyte was analyzed for and detected. The value reported is less than the contract required quantitation limit (CRQL) but greater than the instrument detection limit (IDL).
- U - Indicates the compound or analyte was analyzed for and not detected. The value reported is the sample quantitation limit corrected for sample dilution and moisture content by the laboratory. The data are usable for decision making purposes.
- UJ ~ Indicates the compound or analyte was analyzed for and not detected. Due to identified quality control deficiency identified during data validation the value reported may not accurately reflect the sample quantitation limit. The data are usable for decision making purposes.
- J - Indicates the compound or analyte was analyzed for and detected. The associated value is estimated but the data are usable for decision making processes.
- R - Indicates the compound or analyte was analyzed for and due to an identified quality control deficiency the data are unusable.
- NJ - Indicates presumptive evidence of a compound at an estimated value.
- N - Indicates presumptive evidence of a compound.

## 2. HOLDING TIMES

Have all samples been analyzed within holding times?  Yes No N/A

**ACTION:** If any holding times have been exceeded qualify all affected results as estimated (J for detects and UJ for nondetects).

## 3. INITIAL CALIBRATIONS

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?  Yes No N/A

Are the correlation coefficients  $\geq 0.995$ ?  Yes No N/A

Was a midrange cyanide standard distilled?  Yes No N/A

**ACTION:** Qualify all data as unusable if reported from an analysis in which an instrument was not calibrated or was calibrated with less than the minimum number of standards. Qualify associated sample results >IDL as estimated (J) and results <IDL as estimated (UJ), if the correlation coefficient is <0.995 or the laboratory did not distill the midrange cyanide standard.

## 4. INITIAL AND CONTINUING CALIBRATION VERIFICATION

Are ICV and CCV percent recoveries within control?  Yes No N/A

Are there calculation errors? Yes  No N/A

**ACTION:** Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

## 5. ICP INTERFERENCE CHECK SAMPLE

Has an ICS sample been analyzed at the proper frequency?  Yes No N/A

Are the AB solution %R values within control?  Yes No N/A

Are there calculation errors? Yes  No N/A

**ACTION:** Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

MUT  
4/25/92

## 6. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

Yes No N/A

**ACTION:** Qualify all associated sample results for any analyte < 5 times the amount in any laboratory blank as nondetected (U). If analyte concentrations in the blank are > CRDL or below the negative CRDL, verify the laboratory has redigested and reanalyzed associated samples with analyte concentrations < 10 times the blank concentration. If the laboratory has not redigested and reanalyzed the samples, note in the validation narrative.

## 7. FIELD BLANKS

Are target analytes present in the field blanks?

Yes No N/A

**ACTION:** Qualify all sample results for any analyte < 5 times the amount in any valid field blank as nondetected (U).

## 8. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the control limits?

Yes No N/A

**ACTION:** Qualify the affected sample data according to the following requirements:

If spike recovery is > 125% and sample results are < IDL no qualification is required. If spike recovery is > 125% or < 75% qualify all positive results as estimated (J). If spike recovery is 30% to 74% qualify all nondetects as estimated (UJ). If spike recovery is < 30%, reject all nondetects (R). If the field blank has been used for spike analysis, note in the validation narrative.

## 9. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits?

Yes No N/A

Are there calculation errors?

Yes No N/A

**ACTION:** Qualify the sample data according to the following requirements:

**AQUEOUS LCS** - Qualify as estimated (J), all sample results > IDL, for which the LCS %R falls within the range 50-79% or > 120%. Qualify as estimated (UJ), all sample results < IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R < 50%.

**SOLID LCS** - Qualify as estimated (J), all sample results > IDL for which the LCS result is outside the established control limits. Qualify as estimated (UJ), all sample results < IDL for which the LCS %R are lower than the established control limits.

## 10. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits?

Yes No  N/A

ACTION: Note the results of the performance audit sample analyses in the data validation narrative.

## 11. DUPLICATE SAMPLE ANALYSIS

Are RPD values acceptable?

Yes No N/A

ACTION: Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD results fall outside the appropriate control limits. If field blanks were used for laboratory duplicates, note in the validation narrative.

## 12. ICP SERIAL DILUTION

Are the serial dilution results acceptable?

Yes No N/A

Is there evidence of negative interference?

Yes  No N/A

ACTION: Qualify the associated data as estimated (J) for those analytes in which the %D is outside the control limits. If evidence of negative interference is found, use professional judgment to qualify the data.

## 13. FIELD DUPLICATE SAMPLES

Do the RPD values exceed the control limits?

Yes No  N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 14. FIELD SPLIT SAMPLES

Do the RPD values exceed the control limits?

Yes No  N/A

ACTION: Note the results of the field split samples in the validation narrative.

## 1516. FURNACE ATOMIC ABSORPTION QUALITY CONTROL

Do all applicable analyses have duplicate injections?

Yes No N/A

Are applicable duplicate injection RSD values within control?

Yes No N/A

If no, were samples rerun once as required?

Yes No  N/A

Does the RSD for the rerun fall within the control limits?

Yes No  N/A

Were analytical spike recoveries within the control limits?

Yes  No N/A

If no, were MSA analyses performed when required?

Yes No N/A

Are MSA correlation coefficients  $\geq 0.995$ ?

*g. 0.995*  Yes  No N/A

If no, was a second MSA analysis performed?

Yes No N/A

**ACTION:** If duplicate injections are outside the acceptance limits and the sample has not been reanalyzed or the reanalysis is outside the acceptance limits, qualify the associated data as estimated (J for detects and UJ for nondetects). If the analytical spike recovery is  $< 40\%$  qualify detects as estimated (J). If the analytical spike recovery is  $\geq 10\%$  but  $< 40\%$ , qualify all nondetects as estimated (UJ) and if the analytical spike recovery is  $< 10\%$ , reject all nondetects (R). If the sample absorbance is  $< 50\%$  of the analytical spike absorbance and the analytical spike recovery is  $< 85\%$  or  $> 115\%$ , qualify all results as estimated (J for detects and UJ for nondetects). If method of standard additions (MSA) was required but was not performed, the MSA samples were spiked incorrectly, or the MSA correlation coefficient was  $< 0.995$ , qualify the associated detected results as estimated (J).

#### 17. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?

Yes No N/A

Are results within the calibrated range of the instruments and within the linear range of the ICP?

Yes No N/A

Are all detection limits below the CRQL?

Yes No N/A

**Action:** If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

#### 18. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes No N/A

Were project specific data quality objectives met for this analysis?

Yes No N/A

**ACTION:** Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

## 3. INITIAL CALIBRATIONS

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?

Yes No N/A

Are the correlation coefficients  $\geq 0.995$ ?

Yes No N/A

Was a balance check conducted prior to the TDS analysis?

Yes No N/A

Was the titrant normality checked?

Yes No N/A

**ACTION:** Qualify all data as unusable (R) if reported from an analysis in which the above criteria were not met.

## 4. INITIAL AND CONTINUING CALIBRATION VERIFICATION

Have ICV and CCV been analyzed at the proper frequency?

Yes No N/A

Are ICV and CCV percent recoveries within control?

Yes No N/A

Are there calculation errors?

Yes  No N/A

**ACTION:** Qualify all affected data in accordance with the validation requirements.

## 5. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

*06/15/92*  
 Yes  No N/A

**ACTION:** Qualify all associated sample results for any analyte  $< 5$  times the amount in any laboratory blank as nondetected (U) and list the affected samples and analytes below.

## 6. FIELD BLANKS

Are target analytes present in the field blanks?

Yes No  N/A

**ACTION:** Qualify all sample results for any analyte  $< 5$  times the amount in any valid field blank as nondetected (U).

## 7. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the acceptance limits?

*06/15/92*  
 Yes  No N/A

**ACTION:** If the sample concentration exceeds the spike concentration by a factor of 4 or more, and spike recoveries are outside the acceptance limits, no qualification is necessary. If spike recovery is outside the control limits and the sample results are  $> CRQL$ , qualify the data as estimated (J). If the spike recovery is  $< 30\%$  and the sample results are less than the IDL qualify the data as unusable (R).

8. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits? *cu only* Yes  No N/A

Are there calculation errors? Yes  No N/A

ACTION: Qualify the affected results according to the following requirements:

AQUEOUS LCS - Qualify as estimated (J), all sample results >IDL, for which the LCS %R falls within the range 50-79% or > 120%. Qualify as estimated (UJ), all sample results <IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R < 50%.

SOLID LCS - Qualify as estimated (J), all sample results >IDL for which the LCS %R is outside the established control limits. Qualify as estimated (UJ), all sample results <IDL for which the LCS %R are lower than the established control limits.

9. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits? Yes No  N/A

ACTION: Note the results of the performance audit samples in the validation narrative.

10. DUPLICATE SAMPLE ANALYSIS

Are RPD values within the acceptance limits? *in study of 1/1/12* Yes No  N/A *06/15/12*

Action: Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD falls outside the acceptance limits.

11. FIELD DUPLICATE SAMPLES

Do RPD values exceed the acceptance limits?  Yes No N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

12. FIELD SPLIT SAMPLES

Do RPD values exceed the acceptance limits? Yes No  N/A

ACTION: Note the results of the field split samples in the validation narrative.

## 13. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?

 Yes    No    N/A

Are instrument detection limits below the CRDL?

 Yes    No    N/A

Action: If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

## 14. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

 Yes    No    N/A

Were project specific data quality objectives met for this analysis?

 Yes    No    N/A

ACTION: Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

## 2. HOLDING TIMES

Complete the holding time summary form listing all samples and dates of collection and analysis.

Were all samples analyzed within holding time?  Yes  No  N/A

**ACTION:** If any holding times were exceeded, but not by greater than a factor of two, qualify associated samples as estimated (J for detects or UJ for nondetects), otherwise reject all nondetects (R) and qualify all associated detects as estimated (J).

## 3. INSTRUMENT CALIBRATION, TUNING AND PERFORMANCE CHECKS

## 3.1 GC/MS TUNING AND PERFORMANCE CHECKS

Is a bromofluorobenzene tune report present for each applicable 12-h period?  Yes  No  N/A

Do all tunes on all instruments meet the tuning criteria?  Yes  No  N/A

Do all tunes on all instruments meet the expanded criteria?  Yes  No  N/A

Has the laboratory made any calculation or transcription errors?  Yes  No  N/A

Have the proper significant figures been reported?  Yes  No  N/A

**ACTION:** If the mass calibration is out of specification but within the expanded criteria, qualify associated data as estimated (J for detects or UJ for nondetects). If all tuning criteria are missed, qualify all associated data as unusable (R).

## 3.2 INITIAL CALIBRATION

Is an initial calibration report provided for all instruments?  Yes  No  N/A

Are all RSD values  $\leq 30\%$  (2/88 SOW)?  Yes  No  N/A

Are all RRF values  $\geq 0.05$  (2/88 SOW)?  Yes  No  N/A

## WHC-SD-EN-SPP-002, Rev. 1

Are all applicable RSD values $\leq 20.5\%$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all applicable RSD values $\leq 40\%$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all applicable RRF values within SOW limits (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all erratic performance compound RRF values $\geq 0.01$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to two TCL compounds, if any RRF value is out of specification qualify all detected results for the particular compound as estimated (J) and all nondetects as unusable (R). Making allowances for up to two TCL compounds, if any RSD value is out of specification qualify all associated data as estimated (J for detects or UJ for nondetects).

## 3.3. CONTINUING CALIBRATION

Is a continuing calibration report present for all 12-h periods in which associated samples were analyzed?	<input checked="" type="radio"/> Yes	No	N/A
Are all RRF values $\geq 0.05$ (2/88 SOW)?	<input checked="" type="radio"/> Yes	No	N/A
Are all %D values $\leq 25\%$ (2/88 or 3/90 SOW)?	Yes	<input checked="" type="radio"/> No	N/A
Are all %D values $\leq 40\%$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all RRF values within SOW limits (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all erratic performance compound RRF values $\geq 0.01$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to two TCL compounds, if any RRF value is out of specification qualify all associated detected results as estimated and all nondetects as unusable (R). Making allowances for up to two TCL compounds, if any %D is out of specification, qualify all associated results as estimated (J for detects or UJ for nondetects).

## 4. BLANKS

## 4.1 LABORATORY BLANKS

Has the laboratory conducted a method blank analysis per matrix for every 12-h period in which samples were analyzed?	<input checked="" type="radio"/> Yes	No	N/A
Are TCL compounds present in the laboratory blanks?	<input checked="" type="radio"/> Yes	No	N/A

**ACTION:** Qualify all sample results  $\leq 10$  times the highest blank concentration for the common laboratory contaminants, as nondetects (U) or at the SQL if the result is  $< CRQL$ . Qualify all remaining sample results  $\leq 5$  times the blank concentration in similar fashion.

## WHC-SD-EN-SPP-002, Rev. 1

## 4.2. FIELD BLANKS

Are TCL compounds present in the field blanks?

Yes  No  N/A

**ACTION:** Qualify all detected sample results  $\leq 5$  times the amount in any valid field blank as nondetects (U) and note the field blank results in the validation narrative.

## 5. ACCURACY

## 5.1 SURROGATE/SYSTEM MONITORING COMPOUND RECOVERY

Are any surrogate recoveries out of specification?

Yes  No  N/A

Are any surrogate recoveries  $< 10\%$ ?

Yes  No  N/A

Are any method blank surrogate recoveries out of specification?

Yes  No  N/A

**ACTION:** Qualify all associated sample results as estimated (J for detects or UJ for nondetects) for surrogates out of specification but  $> 10\%$ . Qualify all associated positive sample results as estimated (J) and all nondetect results as unusable (R) for all surrogates below  $10\%$ . If method blank surrogates are out of specification and the associated sample surrogates are acceptable no qualification is necessary, however, the laboratory should be contacted for an explanation.

## 5.2 MATRIX SPIKE RECOVERY

Has an MS/MSD analysis been conducted per matrix in the sample group?

Yes  No  N/A

Are MS/MSD recoveries within specification?

Yes  No  N/A

Are there any calculation errors?

Yes  No  N/A

**ACTION:** If an MS/MSD analysis has not been conducted contact the laboratory for an explanation. Review the MS/MSD recoveries in conjunction with other QC data such as surrogate recoveries and note the results in the validation narrative. If MS/MSD recoveries are out of specification and sample concentration is  $> 5$  times the spike concentration, no qualification is required, otherwise qualify results as follows: Qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J) in all samples if associated surrogates are also out of specification. The qualification shall only be done on samples of similar matrix as the MS/MSD samples. If it is determined from the review that only the spiked samples are affected by low recoveries, qualify only the results for the spiked sample as described above. If it is determined from the review that out of specification MS/MSD recoveries are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 5.3 PERFORMANCE AUDIT SAMPLES

Are the performance audit sample results within the acceptance limits?

Yes No  N/A

**ACTION:** Note the results of the performance audit sample in the validation narrative.

## 6. PRECISION

## 6.1 MATRIX SPIKE/MATRIX SPIKE DUPLICATES

Are RPD values within specification?

Yes No N/A

Are there any calculation errors?

Yes  No N/A

**ACTION:** Review the MS/MSD results in conjunction with other QC data such as field duplicates and note the results in the validation narrative. If MS/MSD RPDs are out of specification and sample results are  $> 5 \times \text{CRQL}$  qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J). If it is determined from the review that out of specification MS/MSD results are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 6.2 FIELD DUPLICATE SAMPLES

Are field duplicate RPD values acceptable?

Yes No  N/A

**ACTION:** Note the results of the field duplicate samples in the validation narrative.

## 6.3 FIELD SPLIT SAMPLES

Are field split RPD values acceptable?

Yes No  N/A

**ACTION:** Note the results of the field split samples in the validation narrative.

## 7. SYSTEM PERFORMANCE

## 7.1 INTERNAL STANDARDS PERFORMANCE

Are any internal standard area counts outside the acceptance limits?

Yes  No N/A

Are retention times for any internal standard outside the  $\pm 30$  second windows established by the most recent calibration check?

Yes  No N/A

**ACTION:** If the area counts are outside the acceptance limits qualify all associated results as estimated (J for detects or UJ for nondetects). If it is determined from the review that out of specification area counts and relative retention times are indicative of systematic problems within the laboratory the reviewer may consider rejection of all affected sample data (R).

## 8. COMPOUND IDENTIFICATION AND QUANTITATION

## 8.1 COMPOUND IDENTIFICATION

Are detected compounds within  $\pm 0.06$  relative retention time units of the associated calibration standard? *no detects* Yes No  N/A

Are all ions at a relative intensity of  $\geq 10\%$  in the standard spectra present in the sample spectra? Yes No  N/A

Do the relative intensities between the standard and sample spectra agree within 20%? Yes No  N/A

Have all ions  $> 10\%$  in the sample spectra that are not present in the standard spectra been reviewed for possible background contamination?  Yes No N/A

Are molecular ions present in the reference spectrum present in the sample spectrum? Yes No  N/A

**ACTION:** If compound identification is in error and retention time and mass spectral criteria are exceeded qualify all affected positive results as unusable (R). If cross-contamination between analyses is suspected, qualify affected data as unusable (R). Note the results in the validation narrative.

## 8.2 REPORTED RESULTS AND QUANTITATION LIMITS

Has the laboratory used the correct RRF values and internal standard(s) for quantitation?  Yes No N/A

Are results and quantitation limits calculated properly?  Yes No N/A

Has the laboratory reported the sample quantitation limits within  $5 \times \text{CRQL}$  values?  Yes No N/A

**ACTION:** If the results and quantitation limits are in error contact the laboratory for clarification and note in the validation narrative.

## 8.3 TENTATIVELY IDENTIFIED COMPOUNDS (TIC)

Has the laboratory conducted a spectral library search on all candidate TIC peaks in accordance with the analytical SOW?  Yes No N/A

Has the laboratory properly identified and coded all TIC? *no TICs* Yes No  N/A

**ACTION:** If the laboratory has failed to search the minimum number of TIC peaks in the chromatogram contact the laboratory for submittal of the required data. Qualify as nondetects (U) all TIC compounds present in samples and blanks using the review criteria specified in the validation requirements. If TIC identification is in error sample results should be qualified as nondetects (U) or unusable (R). If TIC identifications are judged valid, qualify the results as presumptive and estimated (JN).

9. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes    No    N/A

Were project specific data quality objectives met for this analysis?

Yes    No    N/A

**ACTION:** Summarize all the data qualifications recommended in the foregoing sections, and complete the data validation narrative according to the requirements of Section 10.0 of the data validation requirements.

APPENDIX E

DATA VALIDATION DOCUMENTATION

SDG: 9111L353

SAMPLES: B019J1, B019J2, B019F3, B019F4,  
B019H7, B019H8, B019G1, B01B34, B01B33, B019G2

CONTAINS:

- ATTACHMENT 1 - GLOSSARY OF DATA REPORTING QUALIFIERS
- ATTACHMENT 2 - SUMMARY OF DATA QUALIFICATIONS
- ATTACHMENT 3 - AS QUALIFIED LABORATORY DATA
- ATTACHMENT 4 - DATA VALIDATION SUPPORTING DOCUMENTATION

## ATTACHMENT 1

## GLOSSARY OF DATA REPORTING QUALIFIERS

- B - Indicates the compound or analyte was analyzed for and detected. The value reported is less than the contract required quantitation limit (CRQL) but greater than the instrument detection limit (IDL).
- U - Indicates the compound or analyte was analyzed for and not detected. The value reported is the sample quantitation limit corrected for sample dilution and moisture content by the laboratory. The data are usable for decision making purposes.
- UJ - Indicates the compound or analyte was analyzed for and not detected. Due to identified quality control deficiency identified during data validation the value reported may not accurately reflect the sample quantitation limit. The data are usable for decision making purposes.
- J - Indicates the compound or analyte was analyzed for and detected. The associated value is estimated but the data are usable for decision making processes.
- R - Indicates the compound or analyte was analyzed for and due to an identified quality control deficiency the data are unusable.
- NJ - Indicates presumptive evidence of a compound at an estimated value.
- N - Indicates presumptive evidence of a compound.

5/28/16/92

**2. HOLDING TIMES**

Have all samples been analyzed within holding times?  Yes No N/A

**ACTION:** If any holding times have been exceeded qualify all affected results as estimated (J for detects and UJ for nondetects).

**3. INITIAL CALIBRATIONS**

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?  Yes No N/A

Are the correlation coefficients  $\geq 0.995$ ?  Yes No N/A

Was a midrange cyanide standard distilled?  Yes No N/A

**ACTION:** Qualify all data as unusable if reported from an analysis in which an instrument was not calibrated or was calibrated with less than the minimum number of standards. Qualify associated sample results >IDL as estimated (J) and results <IDL as estimated (UJ), if the correlation coefficient is <0.995 or the laboratory did not distill the midrange cyanide standard.

**4. INITIAL AND CONTINUING CALIBRATION VERIFICATION**

Are ICV and CCV percent recoveries within control?  Yes No N/A

Are there calculation errors? Yes  No N/A

**ACTION:** Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

**5. ICP INTERFERENCE CHECK SAMPLE**

Has an ICS sample been analyzed at the proper frequency?  Yes No N/A

Are the AB solution %R values within control?  Yes No N/A

Are there calculation errors? Yes  No N/A

**ACTION:** Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

## 6. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

Yes No N/A

**ACTION:** Qualify all associated sample results for any analyte < 5 times the amount in any laboratory blank as nondetected (U). If analyte concentrations in the blank are > CRDL or below the negative CRDL, verify the laboratory has redigested and reanalyzed associated samples with analyte concentrations < 10 times the blank concentration. If the laboratory has not redigested and reanalyzed the samples, note in the validation narrative.

## 7. FIELD BLANKS

Are target analytes present in the field blanks?

Yes No  N/A

**ACTION:** Qualify all sample results for any analyte < 5 times the amount in any valid field blank as nondetected (U).

## 8. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the control limits?

Yes  No N/A

**ACTION:** Qualify the affected sample data according to the following requirements:

If spike recovery is > 125% and sample results are < IDL no qualification is required. If spike recovery is > 125% or < 75% qualify all positive results as estimated (J). If spike recovery is 30% to 74% qualify all nondetects as estimated (UJ). If spike recovery is < 30%, reject all nondetects (R). If the field blank has been used for spike analysis, note in the validation narrative.

## 9. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits?

Yes  No N/A

Are there calculation errors? *Does not affect data.*

Yes No N/A

**ACTION:** Qualify the sample data according to the following requirements:

**AQUEOUS LCS** - Qualify as estimated (J), all sample results > IDL, for which the LCS %R falls within the range 50-79% or > 120%. Qualify as estimated (UJ), all sample results < IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R < 50%.

**SOLID LCS** - Qualify as estimated (J), all sample results > IDL for which the LCS result is outside the established control limits. Qualify as estimated (UJ), all sample results < IDL for which the LCS %R are lower than the established control limits.

## 10. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits?

Yes No  N/A

ACTION: Note the results of the performance audit sample analyses in the data validation narrative.

## 11. DUPLICATE SAMPLE ANALYSIS

Are RPD values acceptable?

Yes No N/A

ACTION: Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD results fall outside the appropriate control limits. If field blanks were used for laboratory duplicates, note in the validation narrative.

## 12. ICP SERIAL DILUTION

Are the serial dilution results acceptable?

Yes No N/A

Is there evidence of negative interference?

Yes  No N/A

ACTION: Qualify the associated data as estimated (J) for those analytes in which the %D is outside the control limits. If evidence of negative interference is found, use professional judgment to qualify the data.

## 13. FIELD DUPLICATE SAMPLES

Do the RPD values exceed the control limits?

Yes No  N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 14. FIELD SPLIT SAMPLES

Do the RPD values exceed the control limits?

Yes No  N/A

ACTION: Note the results of the field split samples in the validation narrative.

## 1516. FURNACE ATOMIC ABSORPTION QUALITY CONTROL

Do all applicable analyses have duplicate injections?

Yes No N/A

Are applicable duplicate injection RSD values within control?

Yes No N/A

If no, were samples rerun once as required?

Yes No  N/A

Does the RSD for the rerun fall within the control limits?

Yes No  N/A

Were analytical spike recoveries within the control limits?

Yes  No N/A

WHC-SD-EN-SPP-002, Rev. 1

If no, were MSA analyses performed when required?

Yes No N/A

Are MSA correlation coefficients  $\geq 0.995$ ?

Yes No N/A

If no, was a second MSA analysis performed?

Yes No  N/A

**ACTION:** If duplicate injections are outside the acceptance limits and the sample has not been reanalyzed or the reanalysis is outside the acceptance limits, qualify the associated data as estimated (J for detects and UJ for nondetects). If the analytical spike recovery is  $< 40\%$  qualify detects as estimated (J). If the analytical spike recovery is  $\geq 10\%$  but  $< 40\%$ , qualify all nondetects as estimated (UJ) and if the analytical spike recovery is  $< 10\%$ , reject all nondetects (R). If the sample absorbance is  $< 50\%$  of the analytical spike absorbance and the analytical spike recovery is  $< 85\%$  or  $> 115\%$ , qualify all results as estimated (J for detects and UJ for nondetects). If method of standard additions (MSA) was required but was not performed, the MSA samples were spiked incorrectly, or the MSA correlation coefficient was  $< 0.995$ , qualify the associated detected results as estimated (J).

17. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?

*SD 6/16/92*  
*on transcription of cal*  
*list*  
 Yes  No N/A *6/16/92*

Are results within the calibrated range of the instruments and within the linear range of the ICP?

Yes No N/A

Are all detection limits below the CRQL?

Yes No N/A

**Action:** If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

18. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes No N/A

Were project specific data quality objectives met for this analysis?

Yes No N/A

**ACTION:** Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

WET CHEMISTRY DATA VALIDATION CHECKLIST - FORM A-7

PROJECT: 200-88-1	REVIEWER: G	DATE: 12/12/92
LABORATORY: W/Whew	CASE: 9111L353	SDG: 9111L353
SAMPLES/MATRIX: B019J1, B019F3, B019H7, B019G1		

1. DATA PACKAGE COMPLETENESS

Review the data package for completeness and check off the items below. If any data review elements are missing contact the laboratory for submittal of the omitted data.

Data Package Item	Present?:	Yes	No	N/A
Case Narrative		/		
Cover Page		/		
Traffic Reports/Chain-of-Custody		/		
Sample Analysis Data Report Forms		/		
Standards Data		/		
QC Summary				
Blanks Summary Report Forms		/		
Spike Sample Recovery Report Forms		/		
Duplicate Sample Analysis Report Forms		/		
Laboratory Control Sample Report Forms		/		
Raw Data				
Ion Chromatograph Chromatograms		/		
TOC and TOX Instrument Printouts			/	
Laboratory Bench Sheets		/		
Additional Data				
Laboratory Sample Preparation Logs		/		
Instrument Run Logs		X		
Internal Laboratory Chain-of-Custody			X	
Percent Solids Analysis Records				/
Reduction Formulae				/
Chemist Notebook Pages				/

2. HOLDING TIMES

Were all samples analyzed within holding times?

Yes  No  N/A

Action: If any holding times were exceeded qualify all affected results as estimated (J for detects and UJ for nondetects).

## WHC-SD-EN-SPP-002, Rev. 1

## 3. INITIAL CALIBRATIONS

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?

Yes    No    N/A

Are the correlation coefficients  $\geq 0.995$ ?

Yes    No    N/A

Was a balance check conducted prior to the TDS analysis?

Yes    No    N/A

Was the titrant normality checked?

Yes    No    N/A

**ACTION:** Qualify all data as unusable (R) if reported from an analysis in which the above criteria were not met.

## 4. INITIAL AND CONTINUING CALIBRATION VERIFICATION

Have ICV and CCV been analyzed at the proper frequency?

Yes    No    N/A

Are ICV and CCV percent recoveries within control?

Yes     No    N/A

Are there calculation errors?

Yes     No    N/A

**ACTION:** Qualify all affected data in accordance with the validation requirements.

## 5. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

Yes     No    N/A

**ACTION:** Qualify all associated sample results for any analyte  $< 5$  times the amount in any laboratory blank as nondetected (U) and list the affected samples and analytes below.

## 6. FIELD BLANKS

Are target analytes present in the field blanks?

Yes    No     N/A

**ACTION:** Qualify all sample results for any analyte  $< 5$  times the amount in any valid field blank as nondetected (U).

## 7. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the acceptance limits?

~~CE-617/92~~  
 Yes     No    N/A

**ACTION:** If the sample concentration exceeds the spike concentration by a factor of 4 or more, and spike recoveries are outside the acceptance limits, no qualification is necessary. If spike recovery is outside the control limits and the sample results are  $> CRQL$ , qualify the data as estimated (J). If the spike recovery is  $< 30\%$  and the sample results are less than the IDL qualify the data as unusable (R).

8. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits?

*CU only*  
*CU data not used*

Yes

No

N/A

*6/17/92*

Are there calculation errors?

Yes

No

N/A

*6/17/92*

ACTION: Qualify the affected results according to the following requirements:

AQUEOUS LCS - Qualify as estimated (J), all sample results >IDL, for which the LCS %R falls within the range 50-79% or >120%. Qualify as estimated (UJ), all sample results <IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R <50%.

SOLID LCS - Qualify as estimated (J), all sample results >IDL for which the LCS %R is outside the established control limits. Qualify as estimated (UJ), all sample results <IDL for which the LCS %R are lower than the established control limits.

9. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits?

Yes

No

N/A

ACTION: Note the results of the performance audit samples in the validation narrative.

10. DUPLICATE SAMPLE ANALYSIS

Are RPD values within the acceptance limits?

Yes

No

N/A

Action: Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD falls outside the acceptance limits.

11. FIELD DUPLICATE SAMPLES

Do RPD values exceed the acceptance limits?

Yes

No

N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

12. FIELD SPLIT SAMPLES

Do RPD values exceed the acceptance limits?

Yes

No

N/A

ACTION: Note the results of the field split samples in the validation narrative.

## WHC-SD-EN-SPP-002, Rev. 1

## 13. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?

 Yes

No

N/A

Are instrument detection limits below the CRDL?

 Yes

No

N/A

Action: If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

## 14. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

 Yes

No

N/A

Were project specific data quality objectives met for this analysis?

 Yes

No

N/A

ACTION: Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

VOLATILE ORGANIC DATA VALIDATION CHECKLIST - FORM A-1

PROJECT: 200-88-1	REVIEWER: CJ	DATE: 6/12/92
LABORATORY: Winton	CASE: 91112353	SDG: 91112353
SAMPLES/MATRIX: B01B33, B01B34 / water		

1. DATA PACKAGE COMPLETENESS

Review the data package for completeness and check off the items below. If any data review elements are missing contact the laboratory for submittal.

Data Package Item	Present?:	Yes	No	N/A
Case Narrative		/	—	—
Data Summary		/	—	—
Chain-of-Custody		/	—	—
QC Summary		/	—	—
Surrogate report		/	—	—
MS/MSD report		/	—	—
Blank summary report		/	—	—
GC/MS tuning report		/	—	—
Internal standard summary report		/	—	—
Sample Data		/	—	—
Sample reports		/	—	—
TIC reports for each sample		/	—	—
RIC reports for all samples		/	—	—
Raw and corrected spectra for all detected results		/	—	—
Raw and corrected library search data for all reported TIC		—	—	/
Quantitation and calculation data for all TIC		—	—	/
Standards Data		/	—	—
Initial calibration report		/	—	—
RIC and quantitation reports for initial calibration		/	—	—
Continuing calibration reports		/	—	—
RIC and quantitation reports for cont. calibrations		/	—	—
Internal standard summary report		/	—	—
Raw QC Data		/	—	—
Tuning report, spectra and mass lists		/	—	—
Blank analysis reports		/	—	—
TIC reports for all blanks		/	—	—
RIC and quantitation reports for blanks		/	—	—
Raw and corrected spectra for all detected results in blanks		/	—	—
Raw and corrected library search data for all reported TIC		—	—	/

<u>Data Package Item</u>	Present?:	Yes	No	N/A

2. HOLDING TIMES

Complete the holding time summary form listing all samples and dates of collection and analysis.

Were all samples analyzed within holding time?  Yes No N/A

**ACTION:** If any holding times were exceeded, but not by greater than a factor of two, qualify associated samples as estimated (J for detects or UJ for nondetects), otherwise reject all nondetects (R) and qualify all associated detects as estimated (J).

3. INSTRUMENT CALIBRATION, TUNING AND PERFORMANCE CHECKS

3.1 GC/MS TUNING AND PERFORMANCE CHECKS

Is a bromofluorobenzene tune report present for each applicable 12-h period?  Yes No N/A

Do all tunes on all instruments meet the tuning criteria?  Yes No N/A

Do all tunes on all instruments meet the expanded criteria? Yes No  N/A

Has the laboratory made any calculation or transcription errors? Yes  No N/A

Have the proper significant figures been reported?  Yes No N/A

**ACTION:** If the mass calibration is out of specification but within the expanded criteria, qualify associated data as estimated (J for detects or UJ for nondetects). If all tuning criteria are missed, qualify all associated data as unusable (R).

3.2 INITIAL CALIBRATION

Is an initial calibration report provided for all instruments?  Yes No N/A

Are all RSD values  $\leq 30\%$  (2/88 SOW)?  Yes No N/A

Are all RRF values  $\geq 0.05$  (2/88 SOW)?  Yes No N/A

## WHC-SD-EN-SPP-002, Rev. 1

Are all applicable RSD values $\leq 20.5\%$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all applicable RSD values $\leq 40\%$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all applicable RRF values within SOW limits (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all erratic performance compound RRF values $\geq 0.01$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to two TCL compounds, if any RRF value is out of specification qualify all detected results for the particular compound as estimated (J) and all nondetects as unusable (R). Making allowances for up to two TCL compounds, if any RSD value is out of specification qualify all associated data as estimated (J for detects or UJ for nondetects).

## 3.3. CONTINUING CALIBRATION

Is a continuing calibration report present for all 12-h periods in which associated samples were analyzed?	<input checked="" type="radio"/> Yes	No	N/A
Are all RRF values $\geq 0.05$ (2/88 SOW)?	<input checked="" type="radio"/> Yes	No	N/A
Are all %D values $\leq 25\%$ (2/88 or 3/90 SOW)?	Yes	<input checked="" type="radio"/> No	N/A
Are all %D values $\leq 40\%$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all RRF values within SOW limits (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A
Are all erratic performance compound RRF values $\geq 0.01$ (3/90 SOW)?	Yes	No	<input checked="" type="radio"/> N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to two TCL compounds, if any RRF value is out of specification qualify all associated detected results as estimated and all nondetects as unusable (R). Making allowances for up to two TCL compounds, if any %D is out of specification, qualify all associated results as estimated (J for detects or UJ for nondetects).

## 4. BLANKS

## 4.1 LABORATORY BLANKS

Has the laboratory conducted a method blank analysis per matrix for every 12-h period in which samples were analyzed?	<input checked="" type="radio"/> Yes	No	N/A
Are TCL compounds present in the laboratory blanks?	<input checked="" type="radio"/> Yes	No	N/A

**ACTION:** Qualify all sample results  $\leq 10$  times the highest blank concentration for the common laboratory contaminants, as nondetects (U) or at the SQL if the result is  $< CRQL$ . Qualify all remaining sample results  $\leq 5$  times the blank concentration in similar fashion.

## 4.2. FIELD BLANKS

Are TCL compounds present in the field blanks?

Yes No

6/16/92  
N/A

**ACTION:** Qualify all detected sample results  $\leq 5$  times the amount in any valid field blank as nondetects (U) and note the field blank results in the validation narrative.

## 5. ACCURACY

## 5.1 SURROGATE/SYSTEM MONITORING COMPOUND RECOVERY

Are any surrogate recoveries out of specification?

Yes No N/A

Are any surrogate recoveries  $< 10\%$ ?

Yes No N/A

Are any method blank surrogate recoveries out of specification?

Yes No N/A

**ACTION:** Qualify all associated sample results as estimated (J for detects or UJ for nondetects) for surrogates out of specification but  $> 10\%$ . Qualify all associated positive sample results as estimated (J) and all nondetect results as unusable (R) for all surrogates below  $10\%$ . If method blank surrogates are out of specification and the associated sample surrogates are acceptable no qualification is necessary, however, the laboratory should be contacted for an explanation.

## 5.2 MATRIX SPIKE RECOVERY

Has an MS/MSD analysis been conducted per matrix in the sample group?

Yes No N/A

Are MS/MSD recoveries within specification?

Yes No N/A

Are there any calculation errors?

Yes No N/A

**ACTION:** If an MS/MSD analysis has not been conducted contact the laboratory for an explanation. Review the MS/MSD recoveries in conjunction with other QC data such as surrogate recoveries and note the results in the validation narrative. If MS/MSD recoveries are out of specification and sample concentration is  $> 5$  times the spike concentration, no qualification is required, otherwise qualify results as follows: Qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J) in all samples if associated surrogates are also out of specification. The qualification shall only be done on samples of similar matrix as the MS/MSD samples. If it is determined from the review that only the spiked samples are affected by low recoveries, qualify only the results for the spiked sample as described above. If it is determined from the review that out of specification MS/MSD recoveries are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 5.3 PERFORMANCE AUDIT SAMPLES

Are the performance audit sample results within the acceptance limits?

Yes No

N/A

ACTION: Note the results of the performance audit sample in the validation narrative.

## 6. PRECISION

## 6.1 MATRIX SPIKE/MATRIX SPIKE DUPLICATES

Are RPD values within specification?

Yes No N/A

Are there any calculation errors?

Yes  No N/A

ACTION: Review the MS/MSD results in conjunction with other QC data such as field duplicates and note the results in the validation narrative. If MS/MSD RPDs are out of specification and sample results are  $> 5 \times \text{CRQL}$  qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J). If it is determined from the review that out of specification MS/MSD results are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 6.2 FIELD DUPLICATE SAMPLES

Are field duplicate RPD values acceptable?

Yes No

N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 6.3 FIELD SPLIT SAMPLES

Are field split RPD values acceptable?

Yes No

N/A

ACTION: Note the results of the field split samples in the validation narrative.

## 7. SYSTEM PERFORMANCE

## 7.1 INTERNAL STANDARDS PERFORMANCE

Are any internal standard area counts outside the acceptance limits?

Yes  No N/A

Are retention times for any internal standard outside the  $\pm 30$  second windows established by the most recent calibration check?

Yes  No N/A

ACTION: If the area counts are outside the acceptance limits qualify all associated results as estimated (J for detects or UJ for nondetects). If it is determined from the review that out of specification area counts and relative retention times are indicative of systematic problems within the laboratory the reviewer may consider rejection of all affected sample data (R).

## WHC-SD-EN-SPP-002, Rev. 1

## 8. COMPOUND IDENTIFICATION AND QUANTITATION

## 8.1 COMPOUND IDENTIFICATION

Are detected compounds within  $\pm 0.06$  relative retention time units of the associated calibration standard?  Yes No N/A

Are all ions at a relative intensity of  $\geq 10\%$  in the standard spectra present in the sample spectra?  Yes No N/A

Do the relative intensities between the standard and sample spectra agree within 20%?  Yes No N/A

Have all ions  $> 10\%$  in the sample spectra that are not present in the standard spectra been reviewed for possible background contamination?  Yes No N/A

Are molecular ions present in the reference spectrum present in the sample spectrum?  Yes No N/A

**ACTION:** If compound identification is in error and retention time and mass spectral criteria are exceeded qualify all affected positive results as unusable (R). If cross-contamination between analyses is suspected, qualify affected data as unusable (R). Note the results in the validation narrative.

## 8.2 REPORTED RESULTS AND QUANTITATION LIMITS

Has the laboratory used the correct RRF values and internal standard(s) for quantitation?  Yes No N/A

Are results and quantitation limits calculated properly?  Yes No N/A

Has the laboratory reported the sample quantitation limits within 5xCRQL values?  Yes No N/A

**ACTION:** If the results and quantitation limits are in error contact the laboratory for clarification and note in the validation narrative.

## 8.3 TENTATIVELY IDENTIFIED COMPOUNDS (TIC)

Has the laboratory conducted a spectral library search on all candidate TIC peaks in accordance with the analytical SOW?  Yes No N/A

Has the laboratory properly identified and coded all TIC? *no TICs detected* Yes No  N/A

**ACTION:** If the laboratory has failed to search the minimum number of TIC peaks in the chromatogram contact the laboratory for submittal of the required data. Qualify as nondetects (U) all TIC compounds present in samples and blanks using the review criteria specified in the validation requirements. If TIC identification is in error sample results should be qualified as nondetects (U) or unusable (R). If TIC identifications are judged valid, qualify the results as presumptive and estimated (JN).

9. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes    No    N/A

Were project specific data quality objectives met for this analysis?

Yes    No    N/A

**ACTION:** Summarize all the data qualifications recommended in the foregoing sections, and complete the data validation narrative according to the requirements of Section 10.0 of the data validation requirements.

WHC-SD-EN-SPP-002, Rev. 1

COMMENTS (attach additional sheets as necessary):

Both of these samples are identified  
as T.O. Blanks. Sample B01B33 contains  
MnCl<sub>2</sub> at 55 ppb. All other results are ND.

## ATTACHMENT 1

## GLOSSARY OF DATA REPORTING QUALIFIERS

- B - Indicates the compound or analyte was analyzed for and detected. The value reported is less than the contract required quantitation limit (CRQL) but greater than the instrument detection limit (IDL).
- U - Indicates the compound or analyte was analyzed for and not detected. The value reported is the sample quantitation limit corrected for sample dilution and moisture content by the laboratory. The data are usable for decision making purposes.
- UJ - Indicates the compound or analyte was analyzed for and not detected. Due to identified quality control deficiency identified during data validation the value reported may not accurately reflect the sample quantitation limit. The data are usable for decision making purposes.
- J - Indicates the compound or analyte was analyzed for and detected. The associated value is estimated but the data are usable for decision making processes.
- R - Indicates the compound or analyte was analyzed for and due to an identified quality control deficiency the data are unusable.
- NJ - Indicates presumptive evidence of a compound at an estimated value.
- N - Indicates presumptive evidence of a compound.

## 2. HOLDING TIMES

Have all samples been analyzed within holding times?  Yes No N/A

**ACTION:** If any holding times have been exceeded qualify all affected results as estimated (J for detects and UJ for nondetects).

## 3. INITIAL CALIBRATIONS

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?  Yes No N/A

Are the correlation coefficients  $\geq 0.995$ ?  Yes No N/A

Was a midrange cyanide standard distilled?  Yes No N/A

**ACTION:** Qualify all data as unusable if reported from an analysis in which an instrument was not calibrated or was calibrated with less than the minimum number of standards. Qualify associated sample results  $>$ IDL as estimated (J) and results  $<$ IDL as estimated (UJ), if the correlation coefficient is  $< 0.995$  or the laboratory did not distill the midrange cyanide standard.

## 4. INITIAL AND CONTINUING CALIBRATION VERIFICATION

Are ICV and CCV percent recoveries within control?  Yes No N/A

Are there calculation errors? Yes  No N/A

**ACTION:** Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

## 5. ICP INTERFERENCE CHECK SAMPLE

Has an ICS sample been analyzed at the proper frequency?  Yes No N/A

Are the AB solution %R values within control?  Yes No N/A

Are there calculation errors? Yes  No N/A

**ACTION:** Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

## 6. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

Yes No N/A

**ACTION:** Qualify all associated sample results for any analyte <5 times the amount in any laboratory blank as nondetected (U). If analyte concentrations in the blank are >CRDL or below the negative CRDL, verify the laboratory has redigested and reanalyzed associated samples with analyte concentrations <10 times the blank concentration. If the laboratory has not redigested and reanalyzed the samples, note in the validation narrative.

## 7. FIELD BLANKS

Are target analytes present in the field blanks?

Yes No N/A

**ACTION:** Qualify all sample results for any analyte <5 times the amount in any valid field blank as nondetected (U).

## 8. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the control limits?

Yes No N/A

**ACTION:** Qualify the affected sample data according to the following requirements:

If spike recovery is >125% and sample results are <IDL no qualification is required. If spike recovery is >125% or <75% qualify all positive results as estimated (J). If spike recovery is 30% to 74% qualify all nondetects as estimated (UJ). If spike recovery is <30%, reject all nondetects (R). If the field blank has been used for spike analysis, note in the validation narrative.

## 9. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits?

Yes No N/A

Are there calculation errors?

Yes  No N/A

**ACTION:** Qualify the sample data according to the following requirements:

**AQUEOUS LCS** - Qualify as estimated (J), all sample results >IDL, for which the LCS %R falls within the range 50-79% or >120%. Qualify as estimated (UJ), all sample results <IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R <50%.

**SOLID LCS** - Qualify as estimated (J), all sample results >IDL for which the LCS result is outside the established control limits. Qualify as estimated (UJ), all sample results <IDL for which the LCS %R are lower than the established control limits.

## WHC-SD-EN-SPP-002, Rev. 1

## 10. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits?

Yes No N/A

ACTION: Note the results of the performance audit sample analyses in the data validation narrative.

## 11. DUPLICATE SAMPLE ANALYSIS

Are RPD values acceptable?

Yes No N/A

ACTION: Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD results fall outside the appropriate control limits. If field blanks were used for laboratory duplicates, note in the validation narrative.

## 12. ICP SERIAL DILUTION

Are the serial dilution results acceptable?

Yes No N/A

Is there evidence of negative interference?

Yes No N/A

ACTION: Qualify the associated data as estimated (J) for those analytes in which the %D is outside the control limits. If evidence of negative interference is found, use professional judgment to qualify the data.

## 13. FIELD DUPLICATE SAMPLES

Do the RPD values exceed the control limits?

Yes No N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 14. FIELD SPLIT SAMPLES

Do the RPD values exceed the control limits?

Yes No N/A

ACTION: Note the results of the field split samples in the validation narrative.

## 1516. FURNACE ATOMIC ABSORPTION QUALITY CONTROL

Do all applicable analyses have duplicate injections?

Yes No N/A

Are applicable duplicate injection RSD values within control?

Yes No N/A

If no, were samples rerun once as required?

Yes No N/A

Does the RSD for the rerun fall within the control limits?

Yes No N/A

Were analytical spike recoveries within the control limits?

Yes No N/A

If no, were MSA analyses performed when required?	Yes	No	<input checked="" type="radio"/> N/A
Are MSA correlation coefficients $\geq 0.995$ ?	Yes	No	<input checked="" type="radio"/> N/A
If no, was a second MSA analysis performed?	Yes	No	<input checked="" type="radio"/> N/A

**ACTION:** If duplicate injections are outside the acceptance limits and the sample has not been reanalyzed or the reanalysis is outside the acceptance limits, qualify the associated data as estimated (J for detects and UJ for nondetects). If the analytical spike recovery is  $< 40\%$  qualify detects as estimated (J). If the analytical spike recovery is  $\geq 10\%$  but  $< 40\%$ , qualify all nondetects as estimated (UJ) and if the analytical spike recovery is  $< 10\%$ , reject all nondetects (R). If the sample absorbance is  $< 50\%$  of the analytical spike absorbance and the analytical spike recovery is  $< 85\%$  or  $> 115\%$ , qualify all results as estimated (J for detects and UJ for nondetects). If method of standard additions (MSA) was required but was not performed, the MSA samples were spiked incorrectly, or the MSA correlation coefficient was  $< 0.995$ , qualify the associated detected results as estimated (J).

#### 17. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?	<input checked="" type="radio"/> Yes	No	N/A
Are results within the calibrated range of the instruments and within the linear range of the ICP?	<input checked="" type="radio"/> Yes	No	N/A
Are all detection limits below the CRQL?	<input checked="" type="radio"/> Yes	No	N/A

**Action:** If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

#### 18. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?	<input checked="" type="radio"/> Yes	No	N/A
Were project specific data quality objectives met for this analysis?	<input checked="" type="radio"/> Yes	No	N/A

**ACTION:** Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

9713523.1448

WHC-SD-EN-SPP-002, Rev. 1

COMMENTS (attach additional sheets as necessary):

Risnath analysis was not performed on this sample.

This sample was identified as a Trio Blank, and contained low levels of barium, magnesium, sodium and a high level of calcium.

The sample ID recorded on the case and laboratory data is B01824. However, the sampling list supplied by WHC records B-24 in area B01824. The sample ID used in the validation report is B01824.

## 3. INITIAL CALIBRATIONS

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?

Yes No N/A

Are the correlation coefficients  $\geq 0.995$ ?

Yes No N/A

Was a balance check conducted prior to the TDS analysis?

Yes No  N/A

Was the titrant normality checked?

Yes No  N/A

**ACTION:** Qualify all data as unusable (R) if reported from an analysis in which the above criteria were not met.

## 4. INITIAL AND CONTINUING CALIBRATION VERIFICATION

Have ICV and CCV been analyzed at the proper frequency?

Yes No N/A

Are ICV and CCV percent recoveries within control?

Yes No N/A

Are there calculation errors?

Yes  No N/A

**ACTION:** Qualify all affected data in accordance with the validation requirements.

## 5. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

Yes  No N/A

**ACTION:** Qualify all associated sample results for any analyte  $< 5$  times the amount in any laboratory blank as nondetected (U) and list the affected samples and analytes below.

## 6. FIELD BLANKS

Are target analytes present in the field blanks?

Yes No N/A

**ACTION:** Qualify all sample results for any analyte  $< 5$  times the amount in any valid field blank as nondetected (U).

## 7. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the acceptance limits?

Yes No N/A

**ACTION:** If the sample concentration exceeds the spike concentration by a factor of 4 or more, and spike recoveries are outside the acceptance limits, no qualification is necessary. If spike recovery is outside the control limits and the sample results are  $> CRQL$ , qualify the data as estimated (J). If the spike recovery is  $< 30\%$  and the sample results are less than the IDL qualify the data as unusable (R).

## WHC-SD-EN-SPP-002, Rev. 1

## 8. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits?

Yes No N/A

Are there calculation errors?

Yes No N/A

ACTION: Qualify the affected results according to the following requirements:

AQUEOUS LCS - Qualify as estimated (J), all sample results >IDL, for which the LCS %R falls within the range 50-79% or >120%. Qualify as estimated (UJ), all sample results <IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R <50%.

SOLID LCS - Qualify as estimated (J), all sample results >IDL for which the LCS %R is outside the established control limits. Qualify as estimated (UJ), all sample results <IDL for which the LCS %R are lower than the established control limits.

## 9. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits?

Yes No N/A

ACTION: Note the results of the performance audit samples in the validation narrative.

## 10. DUPLICATE SAMPLE ANALYSIS

Are RPD values within the acceptance limits?

Yes No N/A

Action: Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD falls outside the acceptance limits.

## 11. FIELD DUPLICATE SAMPLES

Do RPD values exceed the acceptance limits?

Yes No N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 12. FIELD SPLIT SAMPLES

Do RPD values exceed the acceptance limits?

Yes No N/A

ACTION: Note the results of the field split samples in the validation narrative.

## WHC-SD-EN-SPP-002, Rev. 1

## 13. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?

 Yes No N/A

Are instrument detection limits below the CRDL?

 Yes No N/A

Action: If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

## 14. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

 Yes No N/A

Were project specific data quality objectives met for this analysis?

 Yes No N/A

ACTION: Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

## WHC-SD-EN-SPP-002, Rev. 1

COMMENTS (attach additional sheets as necessary):

The raw data for cyanide submitted in this package did not include the analysis of this sample (91111511-001). Therefore, the raw data (CN) from the metals package was used for validation.

This sample was identified as a trip blank - it contains low levels of chloride, nitrate, and sulfate.

The sample ID recorded on the CCA and laboratory data is EC1824. However, the sampling list supplied by WLC records EC1824 to read EC1824. The sample ID used in the validation report is EC1824.

## 2. HOLDING TIMES

Complete the holding time summary form listing all samples and dates of collection and analysis.

Were all samples analyzed within holding time?  Yes  No  N/A

**ACTION:** If any holding times were exceeded, but not by greater than a factor of two, qualify associated samples as estimated (J for detects or UJ for nondetects), otherwise reject all nondetects (R) and qualify all associated detects as estimated (J).

## 3. INSTRUMENT CALIBRATION, TUNING AND PERFORMANCE CHECKS

## 3.1 GC/MS TUNING AND PERFORMANCE CHECKS

Is a bromofluorobenzene tune report present for each applicable 12-h period?  Yes  No  N/A

Do all tunes on all instruments meet the tuning criteria?  Yes  No  N/A

Do all tunes on all instruments meet the expanded criteria?  Yes  No  N/A

Has the laboratory made any calculation or transcription errors?  Yes  No  N/A

Have the proper significant figures been reported?  Yes  No  N/A

**ACTION:** If the mass calibration is out of specification but within the expanded criteria, qualify associated data as estimated (J for detects or UJ for nondetects). If all tuning criteria are missed, qualify all associated data as unusable (R).

## 3.2 INITIAL CALIBRATION

Is an initial calibration report provided for all instruments?  Yes  No  N/A

Are all RSD values  $\leq 30\%$  (2/88 SOW)?  Yes  No  N/A

Are all RRF values  $\geq 0.05$  (2/88 SOW)?  Yes  No  N/A

## WHC-SD-EN-SPP-002, Rev. 1

Are all applicable RSD values $\leq 20.5\%$ (3/90 SOW)?	Yes	No	N/A
Are all applicable RSD values $\leq 40\%$ (3/90 SOW)?	Yes	No	N/A
Are all applicable RRF values within SOW limits (3/90 SOW)?	Yes	No	N/A
Are all erratic performance compound RRF values $\geq 0.01$ (3/90 SOW)?	Yes	No	N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to two TCL compounds, if any RRF value is out of specification qualify all detected results for the particular compound as estimated (J) and all nondetects as unusable (R). Making allowances for up to two TCL compounds, if any RSD value is out of specification qualify all associated data as estimated (J for detects or UJ for nondetects).

## 3.3. CONTINUING CALIBRATION

Is a continuing calibration report present for all 12-h periods in which associated samples were analyzed?	Yes	No	N/A
Are all RRF values $\geq 0.05$ (2/88 SOW)?	Yes	No	N/A
Are all %D values $\leq 25\%$ (2/88 or 3/90 SOW)?	Yes	No	N/A
Are all %D values $\leq 40\%$ (3/90 SOW)?	Yes	No	N/A
Are all RRF values within SOW limits (3/90 SOW)?	Yes	No	N/A
Are all erratic performance compound RRF values $\geq 0.01$ (3/90 SOW)?	Yes	No	N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to two TCL compounds, if any RRF value is out of specification qualify all associated detected results as estimated and all nondetects as unusable (R). Making allowances for up to two TCL compounds, if any %D is out of specification, qualify all associated results as estimated (J for detects or UJ for nondetects).

## 4. BLANKS

## 4.1 LABORATORY BLANKS

Has the laboratory conducted a method blank analysis per matrix for every 12-h period in which samples were analyzed?	Yes	No	N/A
Are TCL compounds present in the laboratory blanks?	Yes	No	N/A

**ACTION:** Qualify all sample results  $\leq 10$  time the highest blank concentration for the common laboratory contaminants, as nondetects (U) or at the SQL if the result is  $< CRQL$ . Qualify all remaining sample results  $\leq 5$  times the blank concentration in similar fashion.

## 4.2. FIELD BLANKS

Are TCL compounds present in the field blanks?

Yes  No  N/A

*Not after blank adjustment.*  
 ACTION: Qualify all detected sample results  $\leq 5$  times the amount in any valid field blank as nondetects (U) and note the field blank results in the validation narrative.

## 5. ACCURACY

## 5.1 SURROGATE/SYSTEM MONITORING COMPOUND RECOVERY

Are any surrogate recoveries out of specification?

Yes  No  N/AAre any surrogate recoveries  $< 10\%$ ?Yes  No  N/A

Are any method blank surrogate recoveries out of specification?

Yes  No  N/A

ACTION: Qualify all associated sample results as estimated (J for detects or UJ for nondetects) for surrogates out of specification but  $> 10\%$ . Qualify all associated positive sample results as estimated (J) and all nondetect results as unusable (R) for all surrogates below  $10\%$ . If method blank surrogates are out of specification and the associated sample surrogates are acceptable no qualification is necessary, however, the laboratory should be contacted for an explanation.

## 5.2 MATRIX SPIKE RECOVERY

Has an MS/MSD analysis been conducted per matrix in the sample group?

 Yes  No  N/A

Are MS/MSD recoveries within specification?

 Yes  No  N/A

Are there any calculation errors?

Yes  No  N/A

ACTION: If an MS/MSD analysis has not been conducted contact the laboratory for an explanation. Review the MS/MSD recoveries in conjunction with other QC data such as surrogate recoveries and note the results in the validation narrative. If MS/MSD recoveries are out of specification and sample concentration is  $> 5$  times the spike concentration, no qualification is required, otherwise qualify results as follows: Qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J) in all samples if associated surrogates are also out of specification. The qualification shall only be done on samples of similar matrix as the MS/MSD samples. If it is determined from the review that only the spiked samples are affected by low recoveries, qualify only the results for the spiked sample as described above. If it is determined from the review that out of specification MS/MSD recoveries are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 5.3 PERFORMANCE AUDIT SAMPLES

Are the performance audit sample results within the acceptance limits?

Yes No N/A

**ACTION:** Note the results of the performance audit sample in the validation narrative.

## 6. PRECISION

## 6.1 MATRIX SPIKE/MATRIX SPIKE DUPLICATES

Are RPD values within specification?

Yes No N/A

Are there any calculation errors?

Yes No N/A

**ACTION:** Review the MS/MSD results in conjunction with other QC data such as field duplicates and note the results in the validation narrative. If MS/MSD RPDs are out of specification and sample results are  $> 5 \times \text{CRQL}$  qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J). If it is determined from the review that out of specification MS/MSD results are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 6.2 FIELD DUPLICATE SAMPLES

Are field duplicate RPD values acceptable?

Yes No N/A

**ACTION:** Note the results of the field duplicate samples in the validation narrative.

## 6.3 FIELD SPLIT SAMPLES

Are field split RPD values acceptable?

Yes No N/A

**ACTION:** Note the results of the field split samples in the validation narrative.

## 7. SYSTEM PERFORMANCE

## 7.1 INTERNAL STANDARDS PERFORMANCE

Are any internal standard area counts outside the acceptance limits?

Yes No N/A

Are retention times for any internal standard outside the  $\pm 30$  second windows established by the most recent calibration check?

Yes No N/A

**ACTION:** If the area counts are outside the acceptance limits qualify all associated results as estimated (J for detects or UJ for nondetects). If it is determined from the review that out of specification area counts and relative retention times are indicative of systematic problems within the laboratory the reviewer may consider rejection of all affected sample data (R).

## 8. COMPOUND IDENTIFICATION AND QUANTITATION

## 8.1 COMPOUND IDENTIFICATION

Are detected compounds within  $\pm 0.06$  relative retention time units of the associated calibration standard?  Yes No N/A

Are all ions at a relative intensity of  $\geq 10\%$  in the standard spectra present in the sample spectra?  Yes No N/A

Do the relative intensities between the standard and sample spectra agree within 20%?  Yes No N/A

Have all ions  $> 10\%$  in the sample spectra that are not present in the standard spectra been reviewed for possible background contamination?  Yes No N/A

Are molecular ions present in the reference spectrum present in the sample spectrum?  Yes No N/A

**ACTION:** If compound identification is in error and retention time and mass spectral criteria are exceeded qualify all affected positive results as unusable (R). If cross-contamination between analyses is suspected, qualify affected data as unusable (R). Note the results in the validation narrative.

## 8.2 REPORTED RESULTS AND QUANTITATION LIMITS

Has the laboratory used the correct RRF values and internal standard(s) for quantitation?  Yes No N/A

Are results and quantitation limits calculated properly?  Yes No N/A

Has the laboratory reported the sample quantitation limits within 5xCRQL values?  Yes No N/A

**ACTION:** If the results and quantitation limits are in error contact the laboratory for clarification and note in the validation narrative.

## 8.3 TENTATIVELY IDENTIFIED COMPOUNDS (TIC)

Has the laboratory conducted a spectral library search on all candidate TIC peaks in accordance with the analytical SOW? <sup>SE 6/2/02</sup>  Yes No  N/A

Has the laboratory properly identified and coded all TIC?  Yes No  N/A

**ACTION:** If the laboratory has failed to search the minimum number of TIC peaks in the chromatogram contact the laboratory for submittal of the required data. Qualify as nondetects (U) all TIC compounds present in samples and blanks using the review criteria specified in the validation requirements. If TIC identification is in error sample results should be qualified as nondetects (U) or unusable (R). If TIC identifications are judged valid, qualify the results as presumptive and estimated (JN).

**9. OVERALL ASSESSMENT AND SUMMARY**

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes    No    N/A

Were project specific data quality objectives met for this analysis?

Yes    No    N/A

**ACTION:** Summarize all the data qualifications recommended in the foregoing sections, and complete the data validation narrative according to the requirements of Section 10.0 of the data validation requirements.

COMMENTS (attach additional sheets as necessary): \_\_\_\_\_

This sample was identified as a  
trip blank. All results are undetected.

The sample ID on the can and Form 1 is  
B01B24. However, the sampling list from  
WHC records B01B24 to read B01B24.

The sample ID used in the validation report  
is B01B24.

## 2. HOLDING TIMES

Were all samples extracted within holding time? Yes No N/A

Were all samples analyzed within holding time? Yes No N/A

**ACTION:** If any holding times were exceeded, but not by greater than a factor of two, qualify associated samples as estimated (J for detects or UJ for nondetects), otherwise reject all nondetects (R) and qualify all associated detects as estimated (J).

## 3. INSTRUMENT CALIBRATION, TUNING AND PERFORMANCE CHECKS

## 3.1 GC/MS TUNING AND PERFORMANCE CHECKS

Is a DFTPP tune report present for each applicable 12h period? Yes No N/A

Do all tunes on all instruments meet the tuning criteria? Yes No N/A

Do all tunes on all instruments meet the expanded criteria? Yes No N/A

Has the laboratory made any calculation or transcription errors? Yes No N/A

Have the proper significant figures been reported? Yes No N/A

**ACTION:** If the mass calibration is out of specification but within the expanded criteria, qualify associated data as estimated (J for detects and UJ for nondetects). If all tuning criteria are not met, qualify all associated data as unusable (R).

## 3.2 INITIAL CALIBRATION

Is an initial calibration report provided for all instruments? Yes No N/A

Are all RSD values  $\leq 30\%$  (2/88 SOW)? Yes No N/A

Are all RRF values  $\geq 0.05$  (2/88 SOW)? Yes No N/A

Are all applicable RSD values  $\leq 20.5\%$  (3/90 SOW)? Yes No N/A

Are all applicable RSD values  $\leq 40\%$  (3/90 SOW)? Yes No N/A

Are all applicable RRF values within SOW limits (3/90 SOW)?      Yes    No    N/A

Are all erratic performance compound RRF values  $\geq 0.01$  (3/90 SOW)?      Yes    No    N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to four TCL compounds or surrogates, if any RRF value is out of specification qualify all detected results for the particular compound as estimated (J) and all nondetects as unusable (R). Making allowances for up to four TCL compounds or surrogates, if any RSD value is out of specification qualify all associated data as estimated (J for detects or UJ for nondetects).

### 3.3. CONTINUING CALIBRATION

Is a continuing calibration report present for all 12-h periods in which associated samples were analyzed?      Yes    No    N/A

Are all RRF values  $\geq 0.05$  (2/88 SOW)?      Yes    No    N/A

Are all %D values  $\leq 25\%$  (2/88 or 3/90 SOW)?      Yes    No    N/A

Are all %D values  $\leq 40\%$  (3/90 SOW)?      Yes    No    N/A

Are all RRF values within SOW limits (3/90 SOW)?      Yes    No    N/A

Are all erratic performance compound RRF values  $\geq 0.01$  (3/90 SOW)?      Yes    No    N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to four TCL compounds or surrogates, if any RRF value is out of specification qualify all associated detected results as estimated and all nondetects as unusable (R). Making allowances for up to four TCL compounds or surrogates, if any %D is out of specification, qualify all associated results as estimated (J for detects or UJ for nondetects).

## 4. BLANKS

### 4.1 LABORATORY BLANKS

Has the laboratory conducted a method blank analysis per matrix for every extraction batch?      Yes    No    N/A

Are compounds reported in the laboratory blanks?      Yes    No    N/A

**ACTION:** Qualify all sample results  $< 10$  times the highest blank concentration for the common laboratory contaminants, as nondetects (U) or at the SQL if the result is  $< CRQL$ . Qualify all remaining sample results  $< 5$  times the blank concentration in similar fashion.

## 4.2. FIELD BLANKS

Are compounds reported in the field blanks?

Yes  No  N/A

*Not after blank adjustment*  
 ACTION: Qualify all detected sample results  $\leq 5$  times the amount in any valid field blank as nondetects (U) and note the results of the field blanks in the validation narrative.

## 5. ACCURACY

## 5.1 SURROGATE RECOVERY/SYSTEM MONITORING COMPOUND RECOVERY

Are any surrogate recoveries out of specification?

Yes  No  N/A

Are any surrogate recoveries  $< 10\%$ ?

Yes  No  N/A

Are any method blank surrogate recoveries out of specification?

Yes  No  N/A

ACTION: Qualify all associated data as estimated (J for detects and UJ for nondetects) if at least two semivolatile surrogates are out of specification. If any surrogate is below 10% recovery qualify associated detected results as estimated (J) and associated nondetect results as unusable (R). If method blank surrogates are out of specification and associated sample surrogates are acceptable no qualification is required, however, the laboratory should be contacted for an explanation.

## 5.2 MATRIX SPIKE RECOVERY

Has an MS/MSD analysis been conducted per matrix in the sample group?

Yes  No  N/A

Are MS/MSD recoveries within specification?

Yes  No  N/A

Are there any calculation errors?

Yes  No  N/A

ACTION: If an MS/MSD analysis has not been conducted contact the laboratory for an explanation. Review the MS/MSD recoveries in conjunction with other QC data such as surrogate recoveries and note the results in the validation narrative. If MS/MSD recoveries are out of specification and sample concentration is  $> 5$  times the spike concentration, no qualification is required, otherwise qualify results as follows: Qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J) in all samples if associated surrogates are also out of specification. The qualification shall only be done on samples of similar matrix as the MS/MSD samples. If it is determined from the review that only the spiked samples are affected by low recoveries, qualify only the results for the spiked sample as described above. If it is determined from the review that out of specification MS/MSD recoveries are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 5.3 PERFORMANCE AUDIT SAMPLES

Are the results for the performance audit samples within the acceptance limits?

Yes No N/A

**ACTION:** Note the results of the performance audit samples in the validation narrative.

## 6. PRECISION

## 6.1 MATRIX SPIKE/MATRIX SPIKE DUPLICATES

Are all RPD values within specification?

Yes No N/A

Are there any calculation errors?

Yes No N/A

**ACTION:** Review the MS/MSD results in conjunction with other QC data such as field duplicates and note the results in the validation narrative. If MS/MSD RPDs are out of specification and sample results are  $> 5 \times \text{CRQL}$  qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J). If it is determined from the review that out of specification MS/MSD results are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 6.2 FIELD DUPLICATE SAMPLES

Are field duplicate RPD values acceptable?

Yes No N/A

**ACTION:** Note the results of the field duplicate samples in the validation narrative.

## 6.3 FIELD SPLIT SAMPLES

Are field split RPD values acceptable?

Yes No N/A

**ACTION:** Note the results of the field split samples in the validation narrative.

## 7. SYSTEM PERFORMANCE

## 7.1 INTERNAL STANDARDS PERFORMANCE

Are any internal standard area counts outside the acceptance limits?

Yes No N/A

Are retention times for any internal standard outside the  $\pm 30$  second windows established by the most recent calibration check?

Yes No N/A

**ACTION:** If the area counts are outside the acceptance limits qualify all associated results as estimated (J for detects and UJ for nondetects). If it is determined from the review that out of specification area counts and relative retention times are indicative of systematic problems within the laboratory the reviewer may consider rejection of all affected sample data (R).

## 8. COMPOUND IDENTIFICATION AND QUANTITATION

## 8.1 COMPOUND IDENTIFICATION

Are detected compounds within  $\pm 0.06$  relative retention time units of the associated calibration standard?

Yes No **N/A**

Are all ions at a relative intensity of  $\geq 10\%$  in the standard spectra present in the sample spectra?

Yes No **N/A**

Do the relative intensities between the standard and sample spectra agree within 20%?

Yes No **N/A**

Have all ions  $> 10\%$  in the sample spectra that are not present in the standard spectra been reviewed for possible background contamination?

Yes No **N/A**

Are molecular ions in the reference spectrum present in the sample spectrum?

Yes No **N/A**

**ACTION:** If compound identification is in error and retention time and mass spectral criteria are exceeded qualify all affected positive results as unusable (R). If cross-contamination between analyses is suspected, qualify affected data as unusable (R).

## 8.2 REPORTED RESULTS AND QUANTITATION LIMITS

Has the laboratory used the correct RRF values and internal standards for quantitation?

**Yes** No N/A

Are results and quantitation limits calculated properly?

**Yes** No N/A

Has the laboratory reported the sample quantitation limits within  $5 \times \text{CRQL}$  values?

**Yes** No N/A

**ACTION:** If the quantitation limits are in error contact the laboratory for clarification and note in the validation narrative.

## 8.3 TENTATIVELY IDENTIFIED COMPOUNDS

Has the laboratory conducted a spectral library search on all candidate TIC peaks in accordance with the analytical SOW?

**Yes** No N/A

Has the laboratory properly identified and coded all TIC?

**Yes** No N/A

**ACTION:** If the laboratory has failed to search the minimum number of TIC peaks in the chromatogram contact the laboratory for submittal of the required data. Qualify as nondetects (U) all TIC compounds present in samples and blanks using the review criteria specified in the validation requirements. If TIC identification is in error sample results should be qualified as nondetects (U) or unusable (R). If TIC identifications are judged valid, qualify the results as presumptive and estimated (JN).

**9. OVERALL ASSESSMENT AND SUMMARY**

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes    No    N/A

Were project specific data quality objectives met for this analysis?

Yes    No    N/A

**ACTION:** Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

COMMENTS (attach additional sheets as necessary): \_\_\_\_\_

This sample was identified as a Trip Blank.  
All results are non-detects.

The sample ID on the cap and form is  
RC1824. However, the sampling list  
supplied by WHC corrects RC1824 to read  
RC1B24. The sample ID used in the  
validation report is RC1B24.

## 2. HOLDING TIMES

Were all samples extracted within holding time?  Yes No N/A

Were all samples analyzed within holding time?  Yes No N/A

**ACTION:** If any holding times were exceeded, but not by greater than a factor of two, qualify associated samples as estimated (J for detects or UJ for nondetects), otherwise reject all nondetects (R) and qualify all associated detects as estimated (J).

## 3. INSTRUMENT PERFORMANCE AND CALIBRATIONS

### 3.1 INSTRUMENT PERFORMANCE (2/88 SOW)

Are DDT retention times greater than 12 minutes?  Yes No N/A

**ACTION:** If DDT retention time is  $\leq 12$  minutes and resolution is  $< 25\%$  qualify associated data as unusable (R).

Is resolution between DDT peaks acceptable?  Yes No N/A

**ACTION:** If resolution between DDT peaks is unacceptable qualify associated data as unusable (R).

Do all pesticide standards elute within the established retention time windows? Yes  No N/A

**ACTION:** If the standards do not meet the retention time criteria and peaks are not present near or within the retention time windows no sample qualification is necessary. If peaks are near or within the retention time windows and the standards and matrix spikes do not fall within the expanded retention time windows calculated according to the validation requirements, qualify all associated sample results from the last in-control point as unusable (R).

Are DDT breakdowns  $\leq 20\%$ ?  Yes No N/A

**ACTION:** If the DDT percent breakdown exceeds 20%, qualify all detected results for DDT as estimated (J) and all nondetects as unusable (R) if DDD and DDE are detected. In addition qualify all results for DDD or DDE as presumptive and estimated (NJ).

Are endrin breakdowns  $\leq 20\%$ ?  Yes No N/A

## WHC-SD-EN-SPP-002, Rev. 1

**ACTION:** If the endrin breakdown exceeds 20%, qualify all detected results for endrin as estimated (J) and all nondetects as unusable (R) if endrin aldehyde or endrin ketone are detected. In addition, qualify all results for endrin ketone as presumptive and estimated (NJ).

Are DBC retention time differences within specification?

Yes No N/A

**ACTION:** If DBC %D values are outside the limits and the shift is occurring repeatedly in samples and standards, qualify affected sample results as unusable (R).

## 3.2 CALIBRATIONS (2/88 SOW)

Are RSD values for aldrin, endrin, DDT and DBC  $\leq 10\%$ ?

Yes No N/A

Have all standards been analyzed within 72 h of any sample?

Yes No N/A

Has a 3-point calibration been conducted for DDT or toxaphene?

Yes No  N/A

Have all standards been analyzed at the start of each 72-h sequence?

Yes No N/A

Have evaluation standards A, B, and C been analyzed within 72 h of any sample?

Yes No N/A

Has the confirmation standard mix been analyzed after every five samples?

Yes No N/A

Has evaluation standard B analyzed every 10 samples?

Yes No N/A

Are %D values for initial and subsequent standards  $\leq 15\%$  for quantitation standards and  $\leq 20\%$  for confirmation standards?

Yes  No N/A

**ACTION:** If the RSD criteria were exceeded or three point calibrations not conducted qualify associated detects as estimated (J). If all standards were not analyzed at the beginning of each 72-h sequence qualify associated data as unusable (R). If the confirmation standards were not analyzed properly qualify associated detects as estimated (J). If the continuing calibration criteria were not met qualify associated quantitation data as estimated (J).

## WHC-SD-EN-SPP-002, Rev. 1

## 3.3 INSTRUMENT PERFORMANCE AND INITIAL CALIBRATION (3/90 SOW)

Is peak resolution acceptable? Yes No **N/A**

**ACTION:** If the resolution criteria are not met, reject positive sample results generated after initial calibration (R).

Are DDT and endrin breakdowns  $\leq 20.0\%$  Yes No **N/A**

**ACTION:** If the breakdown criteria are not met qualify sample results as described in Section 5.3.1 of the validation requirements.

Are single component target compounds in the PEMs, INDA, INDB and the calibration standards within the retention time windows? Yes No **N/A**

**ACTION:** If the retention time criteria are not met and no peaks are present in the samples within two times the retention time windows ( $\pm 0.04$ ,  $\pm 0.05$  for methoxychlor), no qualification is necessary. If peaks are present in samples within the retention time window a review is made of the raw data to determine expanded retention time windows (see Section 5.3.1 of the validation requirements). If all standards and matrix spikes fall within the expanded windows then no qualification of sample results is necessary. If all standards and matrix spikes do not fall within the expanded windows then all affected sample results are qualified as unusable (R).

Are the RPDs acceptable for the PEMs? Yes No **N/A**

**ACTION:** If the RPD criteria are not met qualify associated positive sample results as estimated (J).

Are the RSDs for the calibration factors  $< 10.0\%$  ( $< 15.0\%$  for the BHC series, DDT, endrin, and methoxychlor)? Yes No **N/A**

**ACTION:** If the RSD criteria are not met qualify associated positive sample results as estimated (J).

## 3.4 CALIBRATION VERIFICATION (3/90 SOW)

Have the analytical sequence requirements been met for the analysis of instrument blanks, PEMs, INDA and INDB mixes? Yes No **N/A**

**ACTION:** If the analytical sequence requirements are not followed and any of the resolution or retention time criteria listed below are exceeded, reject associated positive results (R).

Is peak resolution acceptable for PEMs, INDA and INDB mixes? Yes No **N/A**

**ACTION:** If the resolution criteria are not met reject positive sample results generated after a noncompliant standard analysis (R).

Are single component target compounds in the PEMs, INDA and INDB mixes within the retention time windows? Yes No **N/A**

## WHC-SD-EN-SPP-002, Rev. 1

**ACTION:** If the retention time criteria are not met and no peaks are present in the samples analyzed after the noncompliant standard within two times the retention time windows ( $\pm 0.04$ ,  $\pm 0.05$  for methoxychlor), no qualification is necessary. If peaks are present in samples within the expanded windows rejected associated positive and nondetect results (R).

Are RPDs between the calculated and true amounts in the PEMs, INDA and INDB mixes  $\leq 25.0\%$ ?

Yes No **N/A**

**ACTION:** If the RPD criteria are not met qualify associated positive sample results as estimated (J).

Are DDT and endrin breakdowns in the PEMs  $\leq 20.0\%$  ( $\leq 30.0\%$  total combined)?

Yes No **N/A**

**ACTION:** If the breakdown criteria are not met qualify associated positive sample results in accordance with the criteria specified in Section 5.3.1.

#### 4. BLANKS

##### 4.1 LABORATORY BLANKS

Has the laboratory analyzed the method blanks at the required frequency?

**Yes** No N/A

Has the laboratory analyzed a sulfur clean-up blank if required?

Yes No **N/A**

Has the laboratory analyzed instrument blanks at the required frequency?

Yes No **N/A**

Are target compounds present in the blanks?

Yes **No** N/A

**ACTION:** Qualify all associated positive results as nondetects (U) that are  $< 5$  times the highest concentration in any acceptable blank.

##### 4.2 FIELD BLANKS

Are target compounds present in the field blanks?

Yes **No** N/A

**ACTION:** If target compounds are present in the field blanks qualify all positive sample results  $< 5$  times the highest valid field blank concentrations as nondetects (U) and note the results in the validation narrative.

## 5. ACCURACY

## 5.1 SURROGATE RECOVERY

- Are any surrogate recoveries out of specification? Yes  No N/A
- Do any samples show nondetects for surrogates? Yes  No N/A
- Are any method blank surrogates out of specification? Yes  No N/A

**ACTION:** Qualify all associated sample results as estimated (J for detects and UJ for nondetects) for surrogates out of specification. If the surrogate was not detected (0% recovery) in the sample qualify associated nondetects as unusable (R). If method blank surrogates are out of specification and sample surrogates are acceptable, no qualification is required however, the laboratory should be contacted for an explanation.

## 5.2 MATRIX SPIKE RECOVERY

- Has the laboratory analyzed a MS/MSD per matrix for the the sample group?  Yes No N/A
- Are MS/MSD recoveries within specification? Yes  No N/A
- Are there any calculation or transcription errors? Yes  No N/A

**ACTION:** If MS/MSD analyses have not been conducted contact the laboratory for clarification. Review the MS/MSD recoveries in conjunction with other QC data such as surrogate recoveries and note the results in the validation narrative. If MS/MSD recoveries are out of specification and sample concentration is > 5 times the spike concentration, no qualification is required, otherwise qualify results as follows: Qualify positive results as estimated (J) in all samples if associated surrogates are also out of specification. The qualification shall only be done on samples of similar matrix as the MS/MSD samples. If it is determined from the review that only the spiked samples are affected by the low recoveries, qualify only the results for the spiked sample as described above. If it is determined from the review that out of specification MS/MSD recoveries are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 5.3 PERFORMANCE AUDIT SAMPLES

- Are performance audit sample results within the acceptance limits? Yes No  N/A

**ACTION:** Note the results of the performance audit samples in the validation narrative.

## 6. PRECISION

## 6.1 MATRIX SPIKE/MATRIX SPIKE DUPLICATE SAMPLES

Are the RPD values within specification?

Yes No N/A

**ACTION:** Review the MS/MSD results in conjunction with other QC data such as field duplicates and note the results in the validation narrative. If MS/MSD RPD values are out of specification and sample results are  $> 5 \times \text{CRQL}$  qualify positive results as estimated (T). If it is determined from the review that out of specification MS/MSD results are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 6.2 FIELD DUPLICATE SAMPLES

Are field duplicate RPD values acceptable?

Yes No N/A

**ACTION:** Note the results of the field duplicate samples in the validation narrative.

## 6.3 FIELD SPLIT SAMPLES

Are field split RPD values acceptable?

Yes No N/A

**ACTION:** Note the results of the field split samples in the validation narrative.

## 7. COMPOUND IDENTIFICATION AND QUANTITATION

## 7.1 COMPOUND IDENTIFICATION

Do positive results meet the retention time window criteria?

Yes No N/A

Were positive results analyzed on dissimilar columns?

Yes No N/A

If dieldrin and DDE were reported was a 3% OV-1 column used for confirmation (2/88 SOW data only)?

Yes No N/A

Do retention times and relative peak height ratios match the expected patterns for multiplex compounds (PCB, toxaphene or chlordane)?

Yes No N/A

Has GC/MS confirmation been conducted on sample extract concentrations  $> 10$  ppm?

Yes No N/A

## WHC-SD-EN-SPP-002, Rev. 1

**ACTION:** If positive results do not meet the retention time criteria qualify all detected results as nondetects as follows: If the misidentified peak is outside the retention time windows and no interferences are noted report the CRQL and if the misidentified peak interferes with a target peak then the report value is qualified as estimated and nondetected (UJ). If positive results were not confirmed on dissimilar columns, reject affected results (R). If a 3% OV-1 was used to confirm dieldrin and DDE, reject the affected data (R). If PCB, chlordane or toxaphene identification is questionable qualify the results as presumptive and estimated (NJ). If GC/MS confirmation was not conducted contact the laboratory for explanation and note in the validation narrative.

## 7.2 REPORTED RESULTS AND QUANTITATION LIMITS

Are results and quantitation limits calculated properly?

Yes No N/A

Has the laboratory reported the sample quantitation limits within 5xCRQL values?

Yes No N/A

**ACTION:** If results and quantitation limits are in error contact the laboratory for clarification and note in the validation narrative.

## 8. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes No N/A

Were project specific data quality objectives met for this analysis?

Yes No N/A

**ACTION:** Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

COMMENTS (attach additional sheets as necessary): \_\_\_\_\_

( This sample was identified as a Trip Blank. All results are non-detect.

The sample ID on the case and laboratory data is B01824. However, the sampling list supplied by WHC corrects B01824 to read B01B24. The sample ID used in the validation report is B01B24.

Aroclor-1260	9.68	9.62	9.74	134868				

No quantification required

Under QNT Y/N: enter Y if quantitation was performed, N if not performed. %D must be less than or equal to 15.0% for quantitation, and less than or equal to 20.0% for confirmation.

Note: Determining that no compounds were found above the CRQL is a form of quantitation, and therefore at least one column must meet the 15.0% criteria.

For multicomponent analytes, the single largest peak that is characteristic of the component should be used to establish retention time and %D. Identification of such analytes is based primarily on pattern recognition.

DATA VALIDATION DOCUMENTATION

SDG: 9112L781

SAMPLES: B01B35, B019J9, B019K0, B019N9, B019P0

CONTAINS:

- ATTACHMENT 1 - GLOSSARY OF DATA REPORTING QUALIFIERS
- ATTACHMENT 2 - SUMMARY OF DATA QUALIFICATIONS
- ATTACHMENT 3 - AS QUALIFIED LABORATORY DATA
- ATTACHMENT 4 - DATA VALIDATION SUPPORTING DOCUMENTATION

## ATTACHMENT 1

## GLOSSARY OF DATA REPORTING QUALIFIERS

- B - Indicates the compound or analyte was analyzed for and detected. The value reported is less than the contract required quantitation limit (CRQL) but greater than the instrument detection limit (IDL).
- U - Indicates the compound or analyte was analyzed for and not detected. The value reported is the sample quantitation limit corrected for sample dilution and moisture content by the laboratory. The data are usable for decision making purposes.
- UJ -- Indicates the compound or analyte was analyzed for and not detected. Due to identified quality control deficiency identified during data validation the value reported may not accurately reflect the sample quantitation limit. The data are usable for decision making purposes.
- J - Indicates the compound or analyte was analyzed for and detected. The associated value is estimated but the data are usable for decision making processes.
- R - Indicates the compound or analyte was analyzed for and due to an identified quality control deficiency the data are unusable.
- NJ - Indicates presumptive evidence of a compound at an estimated value.
- N - Indicates presumptive evidence of a compound.

**2. HOLDING TIMES**

Have all samples been analyzed within holding times?  Yes No N/A

**ACTION:** If any holding times have been exceeded qualify all affected results as estimated (J for detects and UJ for nondetects).

**3. INITIAL CALIBRATIONS**

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?  Yes No N/A

Are the correlation coefficients  $\geq 0.995$ ?  Yes No N/A

Was a midrange cyanide standard distilled?  Yes No N/A

**ACTION:** Qualify all data as unusable if reported from an analysis in which an instrument was not calibrated or was calibrated with less than the minimum number of standards. Qualify associated sample results >IDL as estimated (J) and results <IDL as estimated (UJ), if the correlation coefficient is <0.995 or the laboratory did not distill the midrange cyanide standard.

**4. INITIAL AND CONTINUING CALIBRATION VERIFICATION**

Are ICV and CCV percent recoveries within control?  Yes No N/A

Are there calculation errors? Yes  No N/A

**ACTION:** Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

**5. ICP INTERFERENCE CHECK SAMPLE**

Has an ICS sample been analyzed at the proper frequency?  Yes No N/A

Are the AB solution %R values within control?  Yes No N/A

Are there calculation errors? Yes  No N/A

**ACTION:** Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

## WHC-SD-EN-SPP-002, Rev. 1

## 6. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

Yes    No    N/A

**ACTION:** Qualify all associated sample results for any analyte <5 times the amount in any laboratory blank as nondetected (U). If analyte concentrations in the blank are >CRDL or below the negative CRDL, verify the laboratory has redigested and reanalyzed associated samples with analyte concentrations <10 times the blank concentration. If the laboratory has not redigested and reanalyzed the samples, note in the validation narrative.

## 7. FIELD BLANKS

Are target analytes present in the field blanks?

Yes    No     N/A

**ACTION:** Qualify all sample results for any analyte <5 times the amount in any valid field blank as nondetected (U).

## 8. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the control limits?

Yes     No    N/A

**ACTION:** Qualify the affected sample data according to the following requirements:

If spike recovery is >125% and sample results are <IDL no qualification is required. If spike recovery is >125% or <75% qualify all positive results as estimated (J). If spike recovery is 30% to 74% qualify all nondetects as estimated (UJ). If spike recovery is <30%, reject all nondetects (R). If the field blank has been used for spike analysis, note in the validation narrative.

## 9. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits?

Yes    No    N/A

Are there calculation errors?

Yes     No    N/A

**ACTION:** Qualify the sample data according to the following requirements:

**AQUEOUS LCS** - Qualify as estimated (J), all sample results >IDL, for which the LCS %R falls within the range 50-79% or >120%. Qualify as estimated (UJ), all sample results <IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R <50%.

**SOLID LCS** - Qualify as estimated (J), all sample results >IDL for which the LCS result is outside the established control limits. Qualify as estimated (UJ), all sample results <IDL for which the LCS %R are lower than the established control limits.

## 10. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits?

Yes No  N/A

ACTION: Note the results of the performance audit sample analyses in the data validation narrative.

## 11. DUPLICATE SAMPLE ANALYSIS

Are RPD values acceptable?

Yes No N/A

ACTION: Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD results fall outside the appropriate control limits. If field blanks were used for laboratory duplicates, note in the validation narrative.

## 12. ICP SERIAL DILUTION

Are the serial dilution results acceptable?

Yes  No N/A

Is there evidence of negative interference?

Yes  No N/A

ACTION: Qualify the associated data as estimated (J) for those analytes in which the %D is outside the control limits. If evidence of negative interference is found, use professional judgment to qualify the data.

## 13. FIELD DUPLICATE SAMPLES

Do the RPD values exceed the control limits?

Yes No  N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 14. FIELD SPLIT SAMPLES

Do the RPD values exceed the control limits?

Yes No  N/A

ACTION: Note the results of the field split samples in the validation narrative.

## 1516. FURNACE ATOMIC ABSORPTION QUALITY CONTROL

Do all applicable analyses have duplicate injections?

Yes No N/A

Are applicable duplicate injection RSD values within control?

*injection*  Yes  No N/A

If no, were samples rerun once as required?

Yes No  N/A

Does the RSD for the rerun fall within the control limits?

Yes No  N/A

Were analytical spike recoveries within the control limits?

Yes  No N/A

If no, were MSA analyses performed when required?	Yes	No	<input checked="" type="radio"/> N/A
Are MSA correlation coefficients $\geq 0.995$ ?	Yes	No	<input checked="" type="radio"/> N/A
If no, was a second MSA analysis performed?	Yes	No	<input checked="" type="radio"/> N/A

**ACTION:** If duplicate injections are outside the acceptance limits and the sample has not been reanalyzed or the reanalysis is outside the acceptance limits, qualify the associated data as estimated (J for detects and UJ for nondetects). If the analytical spike recovery is  $< 40\%$  qualify detects as estimated (J). If the analytical spike recovery is  $\geq 10\%$  but  $< 40\%$ , qualify all nondetects as estimated (UJ) and if the analytical spike recovery is  $< 10\%$ , reject all nondetects (R). If the sample absorbance is  $< 50\%$  of the analytical spike absorbance and the analytical spike recovery is  $< 85\%$  or  $> 115\%$ , qualify all results as estimated (J for detects and UJ for nondetects). If method of standard additions (MSA) was required but was not performed, the MSA samples were spiked incorrectly, or the MSA correlation coefficient was  $< 0.995$ , qualify the associated detected results as estimated (J).

#### 17. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?	<input checked="" type="radio"/> Yes	No	N/A
Are results within the calibrated range of the instruments and within the linear range of the ICP?	<input checked="" type="radio"/> Yes	No	N/A
Are all detection limits below the CRQL?	<input checked="" type="radio"/> Yes	No	N/A

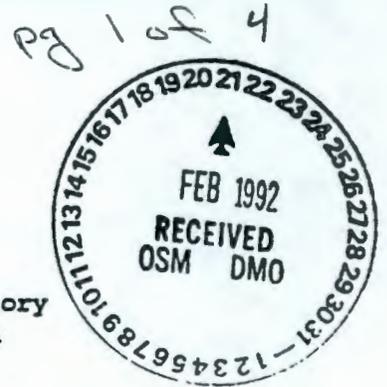

**Action:** If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

#### 18. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?	<input checked="" type="radio"/> Yes	No	N/A
Were project specific data quality objectives met for this analysis?	<input checked="" type="radio"/> Yes	No	N/A

**ACTION:** Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

WHC-SD-EN-SPP-002, Rev. 1

## WHC-SD-EN-SPP-002, Rev. 1

## 3. INITIAL CALIBRATIONS

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?

Yes    No    N/A

Are the correlation coefficients  $\geq 0.995$ ?

Yes    No    N/A

Was a balance check conducted prior to the TDS analysis?

Yes    No    N/A

Was the titrant normality checked?

Yes    No    N/A

**ACTION:** Qualify all data as unusable (R) if reported from an analysis in which the above criteria were not met.

## 4. INITIAL AND CONTINUING CALIBRATION VERIFICATION

Have ICV and CCV been analyzed at the proper frequency?

Yes    No    N/A

Are ICV and CCV percent recoveries within control?

Yes    No    N/A

Are there calculation errors?

Yes     No    N/A

**ACTION:** Qualify all affected data in accordance with the validation requirements.

## 5. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

Yes     No    N/A

**ACTION:** Qualify all associated sample results for any analyte  $< 5$  times the amount in any laboratory blank as nondetected (U) and list the affected samples and analytes below.

## 6. FIELD BLANKS

Are target analytes present in the field blanks?

Yes    No     N/A

**ACTION:** Qualify all sample results for any analyte  $< 5$  times the amount in any valid field blank as nondetected (U).

## 7. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the acceptance limits?

Yes    No    N/A

**ACTION:** If the sample concentration exceeds the spike concentration by a factor of 4 or more, and spike recoveries are outside the acceptance limits, no qualification is necessary. If spike recovery is outside the control limits and the sample results are  $> CRQL$ , qualify the data as estimated (J). If the spike recovery is  $< 30\%$  and the sample results are less than the IDL qualify the data as unusable (R).

## 8. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits? *Cur only*  Yes No N/A

Are there calculation errors? Yes  No N/A

**ACTION:** Qualify the affected results according to the following requirements:

**AQUEOUS LCS** - Qualify as estimated (J), all sample results > IDL, for which the LCS %R falls within the range 50-79% or > 120%. Qualify as estimated (UJ), all sample results < IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R < 50%.

**SOLID LCS** - Qualify as estimated (J), all sample results > IDL for which the LCS %R is outside the established control limits. Qualify as estimated (UJ), all sample results < IDL for which the LCS %R are lower than the established control limits.

## 9. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits? Yes No  N/A

**ACTION:** Note the results of the performance audit samples in the validation narrative.

## 10. DUPLICATE SAMPLE ANALYSIS

Are RPD values within the acceptance limits?  Yes No N/A

**Action:** Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD falls outside the acceptance limits.

## 11. FIELD DUPLICATE SAMPLES

Do RPD values exceed the acceptance limits? Yes No  N/A

**ACTION:** Note the results of the field duplicate samples in the validation narrative.

## 12. FIELD SPLIT SAMPLES

Do RPD values exceed the acceptance limits? Yes No  N/A

**ACTION:** Note the results of the field split samples in the validation narrative.

## WHC-SD-EN-SPP-002, Rev. 1

## 13. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?

Yes    No    N/A

Are instrument detection limits below the CRDL?

Yes    No    N/A

Action: If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

## 14. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes    No    N/A

Were project specific data quality objectives met for this analysis?

Yes    No    N/A

ACTION: Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

## 2. HOLDING TIMES

Complete the holding time summary form listing all samples and dates of collection and analysis.

Were all samples analyzed within holding time?

Yes     No     N/A

**ACTION:** If any holding times were exceeded, but not by greater than a factor of two, qualify associated samples as estimated (J for detects or UJ for nondetects), otherwise reject all nondetects (R) and qualify all associated detects as estimated (J).

## 3. INSTRUMENT CALIBRATION, TUNING AND PERFORMANCE CHECKS

## 3.1 GC/MS TUNING AND PERFORMANCE CHECKS

Is a bromofluorobenzene tune report present for each applicable 12-h period?  Yes     No     N/A

Do all tunes on all instruments meet the tuning criteria?  Yes     No     N/A

Do all tunes on all instruments meet the expanded criteria?  Yes     No     N/A

Has the laboratory made any calculation or transcription errors?  Yes     No     N/A

Have the proper significant figures been reported?  Yes     No     N/A

**ACTION:** If the mass calibration is out of specification but within the expanded criteria, qualify associated data as estimated (J for detects or UJ for nondetects). If all tuning criteria are missed, qualify all associated data as unusable (R).

## 3.2 INITIAL CALIBRATION

Is an initial calibration report provided for all instruments?  Yes     No     N/A

Are all RSD values  $\leq 30\%$  (2/88 SOW)?  Yes     No     N/A

Are all RRF values  $\geq 0.05$  (2/88 SOW)?  Yes     No     N/A

## WHC-SD-EN-SPP-002, Rev. 1

Are all applicable RSD values $\leq 20.5\%$ (3/90 SOW)?	Yes	No	N/A
Are all applicable RSD values $\leq 40\%$ (3/90 SOW)?	Yes	No	N/A
Are all applicable RRF values within SOW limits (3/90 SOW)?	Yes	No	N/A
Are all erratic performance compound RRF values $\geq 0.01$ (3/90 SOW)?	Yes	No	N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to two TCL compounds, if any RRF value is out of specification qualify all detected results for the particular compound as estimated (J) and all nondetects as unusable (R). Making allowances for up to two TCL compounds, if any RSD value is out of specification qualify all associated data as estimated (J for detects or UJ for nondetects).

## 3.3. CONTINUING CALIBRATION

Is a continuing calibration report present for all 12-h periods in which associated samples were analyzed?	Yes	No	N/A
Are all RRF values $\geq 0.05$ (2/88 SOW)?	Yes	No	N/A
Are all %D values $\leq 25\%$ (2/88 or 3/90 SOW)?	Yes	No	N/A
Are all %D values $\leq 40\%$ (3/90 SOW)?	Yes	No	N/A
Are all RRF values within SOW limits (3/90 SOW)?	Yes	No	N/A
Are all erratic performance compound RRF values $\geq 0.01$ (3/90 SOW)?	Yes	No	N/A

**ACTION:** With the exception of compounds that exhibit erratic performance and making allowances for up to two TCL compounds, if any RRF value is out of specification qualify all associated detected results as estimated and all nondetects as unusable (R). Making allowances for up to two TCL compounds, if any %D is out of specification, qualify all associated results as estimated (J for detects or UJ for nondetects).

## 4. BLANKS

## 4.1 LABORATORY BLANKS

Has the laboratory conducted a method blank analysis per matrix for every 12-h period in which samples were analyzed?	Yes	No	N/A
Are TCL compounds present in the laboratory blanks?	Yes	No	N/A

**ACTION:** Qualify all sample results  $\leq 10$  times the highest blank concentration for the common laboratory contaminants, as nondetects (U) or at the SQL if the result is  $< CRQL$ . Qualify all remaining sample results  $\leq 5$  times the blank concentration in similar fashion.

## 4.2. FIELD BLANKS

Are TCL compounds present in the field blanks?

Yes No  N/A

**ACTION:** Qualify all detected sample results  $\leq 5$  times the amount in any valid field blank as nondetects (U) and note the field blank results in the validation narrative.

## 5. ACCURACY

## 5.1 SURROGATE/SYSTEM MONITORING COMPOUND RECOVERY

Are any surrogate recoveries out of specification?

Yes  No N/A

Are any surrogate recoveries  $< 10\%$ ?

Yes  No N/A

Are any method blank surrogate recoveries out of specification?

Yes  No N/A

**ACTION:** Qualify all associated sample results as estimated (J for detects or UJ for nondetects) for surrogates out of specification but  $> 10\%$ . Qualify all associated positive sample results as estimated (J) and all nondetect results as unusable (R) for all surrogates below 10%. If method blank surrogates are out of specification and the associated sample surrogates are acceptable no qualification is necessary, however, the laboratory should be contacted for an explanation.

## 5.2 MATRIX SPIKE RECOVERY

Has an MS/MSD analysis been conducted per matrix in the sample group?

Yes No N/A

Are MS/MSD recoveries within specification?

Yes No N/A

Are there any calculation errors?

Yes  No N/A

**ACTION:** If an MS/MSD analysis has not been conducted contact the laboratory for an explanation. Review the MS/MSD recoveries in conjunction with other QC data such as surrogate recoveries and note the results in the validation narrative. If MS/MSD recoveries are out of specification and sample concentration is  $> 5$  times the spike concentration, no qualification is required, otherwise qualify results as follows: Qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J) in all samples if associated surrogates are also out of specification. The qualification shall only be done on samples of similar matrix as the MS/MSD samples. If it is determined from the review that only the spiked samples are affected by low recoveries, qualify only the results for the spiked sample as described above. If it is determined from the review that out of specification MS/MSD recoveries are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 5.3 PERFORMANCE AUDIT SAMPLES

Are the performance audit sample results within the acceptance limits?

Yes No  N/A

**ACTION:** Note the results of the performance audit sample in the validation narrative.

## 6. PRECISION

## 6.1 MATRIX SPIKE/MATRIX SPIKE DUPLICATES

Are RPD values within specification?

Yes No N/A

Are there any calculation errors?

Yes  No N/A

**ACTION:** Review the MS/MSD results in conjunction with other QC data such as field duplicates and note the results in the validation narrative. If MS/MSD RPDs are out of specification and sample results are  $> 5 \times \text{CRQL}$  qualify positive results for the specific class of compound (aromatics and non-aromatics) as estimated (J). If it is determined from the review that out of specification MS/MSD results are indicative of systematic problems in the laboratory such as sample preparation or sample-specific matrix interferences this must be noted in the validation narrative along with the potential affect on the sample results.

## 6.2 FIELD DUPLICATE SAMPLES

Are field duplicate RPD values acceptable?

Yes No  N/A

**ACTION:** Note the results of the field duplicate samples in the validation narrative.

## 6.3 FIELD SPLIT SAMPLES

Are field split RPD values acceptable?

Yes No  N/A

**ACTION:** Note the results of the field split samples in the validation narrative.

## 7. SYSTEM PERFORMANCE

## 7.1 INTERNAL STANDARDS PERFORMANCE

Are any internal standard area counts outside the acceptance limits?

Yes  No N/A

Are retention times for any internal standard outside the  $\pm 30$  second windows established by the most recent calibration check?

Yes  No N/A

**ACTION:** If the area counts are outside the acceptance limits qualify all associated results as estimated (J for detects or UJ for nondetects). If it is determined from the review that out of specification area counts and relative retention times are indicative of systematic problems within the laboratory the reviewer may consider rejection of all affected sample data (R).

## 8. COMPOUND IDENTIFICATION AND QUANTITATION

## 8.1 COMPOUND IDENTIFICATION

Are detected compounds within  $\pm 0.06$  relative retention time units of the associated calibration standard? *no TIC detected*

Yes No  N/A

Are all ions at a relative intensity of  $\geq 10\%$  in the standard spectra present in the sample spectra?

Yes No  N/A

Do the relative intensities between the standard and sample spectra agree within 20%?

Yes No  N/A

Have all ions  $> 10\%$  in the sample spectra that are not present in the standard spectra been reviewed for possible background contamination?

Yes No N/A

Are molecular ions present in the reference spectrum present in the sample spectrum?

Yes No  N/A

**ACTION:** If compound identification is in error and retention time and mass spectral criteria are exceeded qualify all affected positive results as unusable (R). If cross-contamination between analyses is suspected, qualify affected data as unusable (R). Note the results in the validation narrative.

## 8.2 REPORTED RESULTS AND QUANTITATION LIMITS

Has the laboratory used the correct RRF values and internal standard(s) for quantitation?

Yes No  N/A

Are results and quantitation limits calculated properly?

Yes No N/A

Has the laboratory reported the sample quantitation limits within  $5 \times \text{CRQL}$  values?

Yes No N/A

**ACTION:** If the results and quantitation limits are in error contact the laboratory for clarification and note in the validation narrative.

## 8.3 TENTATIVELY IDENTIFIED COMPOUNDS (TIC)

Has the laboratory conducted a spectral library search on all candidate TIC peaks in accordance with the analytical SOW?

*6/16/92*  
*See narrative*  
 Yes  No  N/A

Has the laboratory properly identified and coded all TIC?

Yes No  N/A

**ACTION:** If the laboratory has failed to search the minimum number of TIC peaks in the chromatogram contact the laboratory for submittal of the required data. Qualify as nondetects (U) all TIC compounds present in samples and blanks using the review criteria specified in the validation requirements. If TIC identification is in error sample results should be qualified as nondetects (U) or unusable (R). If TIC identifications are judged valid, qualify the results as presumptive and estimated (JN).

## 9. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes    No    N/A

Were project specific data quality objectives met for this analysis?

Yes    No    N/A

**ACTION:** Summarize all the data qualifications recommended in the foregoing sections, and complete the data validation narrative according to the requirements of Section 10.0 of the data validation requirements.

APPENDIX H

DATA VALIDATION DOCUMENTATION

SDG: 9112L829

SAMPLES: B019D1, B019D2

CONTAINS:

- ATTACHMENT 1 - GLOSSARY OF DATA REPORTING QUALIFIERS
- ATTACHMENT 2 - SUMMARY OF DATA QUALIFICATIONS
- ATTACHMENT 3 - AS QUALIFIED LABORATORY DATA
- ATTACHMENT 4 - DATA VALIDATION SUPPORTING DOCUMENTATION

## ATTACHMENT 1

## GLOSSARY OF DATA REPORTING QUALIFIERS

- B - Indicates the compound or analyte was analyzed for and detected. The value reported is less than the contract required quantitation limit (CRQL) but greater than the instrument detection limit (IDL).
- U - Indicates the compound or analyte was analyzed for and not detected. The value reported is the sample quantitation limit corrected for sample dilution and moisture content by the laboratory. The data are usable for decision making purposes.
- UJ - Indicates the compound or analyte was analyzed for and not detected. Due to identified quality control deficiency identified during data validation the value reported may not accurately reflect the sample quantitation limit. The data are usable for decision making purposes.
- J - Indicates the compound or analyte was analyzed for and detected. The associated value is estimated but the data are usable for decision making processes.
- R - Indicates the compound or analyte was analyzed for and due to an identified quality control deficiency the data are unusable.
- NJ - Indicates presumptive evidence of a compound at an estimated value.
- N - Indicates presumptive evidence of a compound.

## 2. HOLDING TIMES

Have all samples been analyzed within holding times? Yes  No  N/A

**ACTION:** If any holding times have been exceeded qualify all affected results as estimated (J for detects and UJ for nondetects).

## 3. INITIAL CALIBRATIONS

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?  Yes  No  N/A

Are the correlation coefficients  $\geq 0.995$ ?  Yes  No  N/A

Was a midrange cyanide standard distilled?  Yes  No  N/A

**ACTION:** Qualify all data as unusable if reported from an analysis in which an instrument was not calibrated or was calibrated with less than the minimum number of standards. Qualify associated sample results  $>IDL$  as estimated (J) and results  $<IDL$  as estimated (UJ), if the correlation coefficient is  $<0.995$  or the laboratory did not distill the midrange cyanide standard.

## 4. INITIAL AND CONTINUING CALIBRATION VERIFICATION

Are ICV and CCV percent recoveries within control?  Yes  No  N/A

Are there calculation errors? Yes  No  N/A

**ACTION:** Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

## 5. ICP INTERFERENCE CHECK SAMPLE

Has an ICS sample been analyzed at the proper frequency?  Yes  No  N/A

Are the AB solution %R values within control?  Yes  No  N/A

Are there calculation errors? Yes  No  N/A

**ACTION:** Qualify all affected data in accordance with Section 8.3 of the validation requirements. If calculation errors are noted, contact the laboratory for clarification.

## 6. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

 Yes No N/A

ACTION: Qualify all associated sample results for any analyte <5 times the amount in any laboratory blank as nondetected (U). If analyte concentrations in the blank are > CRDL or below the negative CRDL, verify the laboratory has redigested and reanalyzed associated samples with analyte concentrations < 10 times the blank concentration. If the laboratory has not redigested and reanalyzed the samples, note in the validation narrative.

## 7. FIELD BLANKS

Are target analytes present in the field blanks?

Yes No  N/A

ACTION: Qualify all sample results for any analyte <5 times the amount in any valid field blank as nondetected (U).

## 8. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the control limits?

Yes  No N/A

ACTION: Qualify the affected sample data according to the following requirements:

If spike recovery is > 125% and sample results are <IDL no qualification is required. If spike recovery is > 125% or < 75% qualify all positive results as estimated (J). If spike recovery is 30% to 74% qualify all nondetects as estimated (UJ). If spike recovery is < 30%, reject all nondetects (R). If the field blank has been used for spike analysis, note in the validation narrative.

## 9. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits?

 Yes No N/A

Are there calculation errors?

Yes  No N/A

ACTION: Qualify the sample data according to the following requirements:

AQUEOUS LCS - Qualify as estimated (J), all sample results > IDL, for which the LCS %R falls within the range 50-79% or > 120%. Qualify as estimated (UJ), all sample results < IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R < 50%.

SOLID LCS - Qualify as estimated (J), all sample results > IDL for which the LCS result is outside the established control limits. Qualify as estimated (UJ), all sample results < IDL for which the LCS %R are lower than the established control limits.

## WHC-SD-EN-SPP-002, Rev. 1

## 10. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits?

Yes No N/A

ACTION: Note the results of the performance audit sample analyses in the data validation narrative.

## 11. DUPLICATE SAMPLE ANALYSIS

Are RPD values acceptable?

Yes No N/A

ACTION: Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD results fall outside the appropriate control limits. If field blanks were used for laboratory duplicates, note in the validation narrative.

## 12. ICP SERIAL DILUTION

Are the serial dilution results acceptable?

Yes No N/A

Is there evidence of negative interference?

Yes No N/A

ACTION: Qualify the associated data as estimated (J) for those analytes in which the %D is outside the control limits. If evidence of negative interference is found, use professional judgment to qualify the data.

## 13. FIELD DUPLICATE SAMPLES

Do the RPD values exceed the control limits?

Yes No N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 14. FIELD SPLIT SAMPLES

Do the RPD values exceed the control limits?

Yes No N/A

ACTION: Note the results of the field split samples in the validation narrative.

## 1516. FURNACE ATOMIC ABSORPTION QUALITY CONTROL

Do all applicable analyses have duplicate injections?

Yes No N/A

Are applicable duplicate injection RSD values within control?

Yes No N/A

If no, were samples rerun once as required?

Yes No N/A

Does the RSD for the rerun fall within the control limits?

Yes No N/A

Were analytical spike recoveries within the control limits?

Yes No N/A

If no, were MSA analyses performed when required?  Yes  No  N/A

Are MSA correlation coefficients  $\geq 0.995$ ?  Yes  No  N/A

If no, was a second MSA analysis performed?  Yes  No  N/A

**ACTION:** If duplicate injections are outside the acceptance limits and the sample has not been reanalyzed or the reanalysis is outside the acceptance limits, qualify the associated data as estimated (J for detects and UJ for nondetects). If the analytical spike recovery is  $< 40\%$  qualify detects as estimated (J). If the analytical spike recovery is  $\geq 10\%$  but  $< 40\%$ , qualify all nondetects as estimated (UJ) and if the analytical spike recovery is  $< 10\%$ , reject all nondetects (R). If the sample absorbance is  $< 50\%$  of the analytical spike absorbance and the analytical spike recovery is  $< 85\%$  or  $> 115\%$ , qualify all results as estimated (J for detects and UJ for nondetects). If method of standard additions (MSA) was required but was not performed, the MSA samples were spiked incorrectly, or the MSA correlation coefficient was  $< 0.995$ , qualify the associated detected results as estimated (J).

#### 17. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?  Yes  No  N/A

Are results within the calibrated range of the instruments and within the linear range of the ICP?  Yes  No  N/A

Are all detection limits below the CRQL?  Yes  No  N/A

**Action:** If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

#### 18. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?  Yes  No  N/A

Were project specific data quality objectives met for this analysis?  Yes  No  N/A

**ACTION:** Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

WET CHEMISTRY DATA VALIDATION CHECKLIST - FORM A-7

PROJECT: 200-8P-1	REVIEWER: [Signature]	DATE: 6/15/92
LABORATORY: Weston	CASE: 9112L829	SDG: 829
SAMPLES/MATRIX: 801901 / water		

1. DATA PACKAGE COMPLETENESS

Review the data package for completeness and check off the items below. If any data review elements are missing contact the laboratory for submittal of the omitted data.

Data Package Item	Present?:	Yes	No	N/A
Case Narrative		X	—	—
Cover Page		X	—	—
Traffic Reports/Chain-of-Custody		X	—	—
Sample Analysis Data Report Forms		X	—	—
Standards Data		X	—	—
QC Summary				
Blanks Summary Report Forms		X	—	—
Spike Sample Recovery Report Forms		X	—	—
Duplicate Sample Analysis Report Forms		X	—	—
Laboratory Control Sample Report Forms		X	—	—
Raw Data				
Ion Chromatograph Chromatograms		X	—	—
TOC and TOX Instrument Printouts		—	TOC	TOX
Laboratory Bench Sheets		X	—	—
Additional Data				
Laboratory Sample Preparation Logs		X	—	—
Instrument Run Logs		X	—	—
Internal Laboratory Chain-of-Custody		—	X	—
Percent Solids Analysis Records		—	—	X
Reduction Formulae		—	X	—
Chemist Notebook Pages		—	X	—

2. HOLDING TIMES

Were all samples analyzed within holding times? Yes No N/A

Action: If any holding times were exceeded qualify all affected results as estimated (J for detects and UJ for nondetects).

## 3. INITIAL CALIBRATIONS

Were all instruments calibrated daily, each set-up time and were the proper number of standards used?

Yes No N/A

Are the correlation coefficients  $\geq 0.9957$ ?

Yes No N/A

Was a balance check conducted prior to the TDS analysis?

Yes No N/A

Was the titrant normality checked?

Yes No N/A

**ACTION:** Qualify all data as unusable (R) if reported from an analysis in which the above criteria were not met.

## 4. INITIAL AND CONTINUING CALIBRATION VERIFICATION

Have ICV and CCV been analyzed at the proper frequency?

Yes No N/A

Are ICV and CCV percent recoveries within control?

Yes No N/A

Are there calculation errors?

Yes  No N/A

**ACTION:** Qualify all affected data in accordance with the validation requirements.

## 5. LABORATORY BLANKS

Are target analytes present in the laboratory blanks?

Yes  No N/A

**ACTION:** Qualify all associated sample results for any analyte  $< 5$  times the amount in any laboratory blank as nondetected (U) and list the affected samples and analytes below.

## 6. FIELD BLANKS

Are target analytes present in the field blanks?

Yes No  N/A

**ACTION:** Qualify all sample results for any analyte  $< 5$  times the amount in any valid field blank as nondetected (U).

## 7. MATRIX SPIKE SAMPLE ANALYSIS

Are spike recoveries within the acceptance limits?

Yes No N/A

**ACTION:** If the sample concentration exceeds the spike concentration by a factor of 4 or more, and spike recoveries are outside the acceptance limits, no qualification is necessary. If spike recovery is outside the control limits and the sample results are  $> CRQL$ , qualify the data as estimated (J). If the spike recovery is  $< 30\%$  and the sample results are less than the IDL qualify the data as unusable (R).

## 8. LABORATORY CONTROL SAMPLE

Are percent recoveries within the acceptance limits?

 Yes No N/A

Are there calculation errors?

Yes  No N/A

ACTION: Qualify the affected results according to the following requirements:

AQUEOUS LCS - Qualify as estimated (J), all sample results >IDL, for which the LCS %R falls within the range 50-79% or >120%. Qualify as estimated (UJ), all sample results <IDL, for which the LCS falls within the range of 50-79%. Qualify as unusable (R) all sample results, for which the LCS %R <50%.

SOLID LCS - Qualify as estimated (J), all sample results >IDL for which the LCS %R is outside the established control limits. Qualify as estimated (UJ), all sample results <IDL for which the LCS %R are lower than the established control limits.

## 9. PERFORMANCE AUDIT ANALYSES

Are the performance audit sample results within the acceptance limits?

Yes No  N/A

ACTION: Note the results of the performance audit samples in the validation narrative.

## 10. DUPLICATE SAMPLE ANALYSIS

Are RPD values within the acceptance limits?

 Yes No N/A

Action: Qualify the results for all associated samples of the same matrix as estimated (J) if the RPD falls outside the acceptance limits.

## 11. FIELD DUPLICATE SAMPLES

Do RPD values exceed the acceptance limits?

Yes No  N/A

ACTION: Note the results of the field duplicate samples in the validation narrative.

## 12. FIELD SPLIT SAMPLES

Do RPD values exceed the acceptance limits?

Yes No  N/A

ACTION: Note the results of the field split samples in the validation narrative.

## WHC-SD-EN-SPP-002, Rev. 1

## 13. ANALYTE QUANTITATION AND DETECTION LIMITS

Have results been reported and calculated correctly?

Yes    No    N/A

Are instrument detection limits below the CRDL?

Yes    No    N/A

Action: If analyte quantitation is in error, contact the laboratory for explanation. If errors or deficiencies can not be resolved with the laboratory, qualify associated data as unusable (R).

## 14. OVERALL ASSESSMENT AND SUMMARY

Has the laboratory conducted the analysis in accordance with the analytical SOW?

Yes    No    N/A

Were project specific data quality objectives met for this analysis?

Yes    No    N/A

ACTION: Summarize all the data qualifications and complete the data validation narrative as specified in Section 10.0 of the data validation requirements.

9713523.1563

WHC-SD-EN-SPP-002, Rev. 1

COMMENTS (attach additional sheets as necessary): \_\_\_\_\_

The sample results for nitrate and sulfate exceed the spike concentration by a factor greater than 4. and The MS% recoveries were still within the limits of 75 to 125%
