

WASTE SITE RECLASSIFICATION FORM

Operable Unit: 300-FF-2

Control No.: 2013-110

Waste Site Code(s)/Subsite Code(s):

300-264; 327 Building; Demolished 327 Building; Post Irradiation Testing Laboratory (PTL)

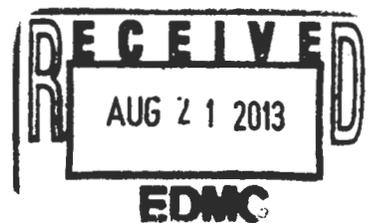

Reclassification Category:Interim Final **Reclassification Status:**Closed Out No Action Rejected RCRA Postclosure Consolidated None **Approvals Needed:**DOE Ecology EPA **Description of current waste site condition:**

The 300-264 waste site is synonymous with the 327 Post Irradiation Test Laboratory and is located within the 300-FF-2 Operable Unit. The 300-264 waste site was assigned to a physical structure and is not considered an unplanned release, nor does it otherwise represent contaminated media adjacent to or beneath the building. As such, the 327 Building was demolished in accordance with Action Memorandum #2 for the 300 Area and the Removal Action Work Plan (RAWP) for 300 Area Facilities, DOE/RL-2004-77, Rev. 2.

Demolition of the 327 Building and foundation was completed in May 2012 with residual soil contamination removal completed in early June 2012. Subsurface investigation of soils beneath the basement floor prior to demolition of that structure and subsequent evaluation of contaminated soils following basement removal confirmed no releases from the building occurred during past operations. The one exception was contaminated soils encountered during removal of 300 RRLWS and 300 RLWS piping from the basement layback. The balance of both piping waste sites and the contaminated soils associated with each will be addressed with those waste sites.

Basis for reclassification:

Initially, this waste site was reclassified as Interim Closed-Out in 2012. As per the 327 Facility Status Change Form (D4-300-062) completed in 2013, the 327 facility was covered by the *Comprehensive Environmental Response, Compensation, and Liability Act of 1980* removal action for the 327 Building itself and there was no unplanned release to underlying soils. TPA-MP-14 Rev. 2 dated 9/1/2011 states that buildings/facilities which do not contain a TSD unit shall not be documented in WIDS. This facility contained no TSD units and does not meet MP-14 criteria. Therefore, the 300-264 waste site has been reclassified as "Rejected".
