Subject: ERDF Leachate Delisting

Pam,

I've not commented on cleanup matters before but his one seems so obvious... The ERDF Leachate De-Listing Proposal is right on target. I encourage you to continue supporting this change. It is inappropriate to spend government funds to treat liquids that have inconsequential quantities of hazardous materials, regardless of the source of the liquid. As long as there are sufficient controls to provide reasonable assurance that the leachate is not hazardous, I feel that these liquids should be delisted and treated in a cost-effective manner. Let's save our funds for the real hazards.

...Bill
