**Summary of Discussion and Commitments/Agreements****1. Approval of January 4, 1995 200-BP-11 OU RCRA UMM Minutes**

The January 4, 1995 Unit Manager Meeting minutes were approved by Ecology, EPA and DOE-RL.

**2. Status of January 4, 1995 200-BP-11 OU RCRA UMM Action Items**

**Action item 01-04-95:1**, RL will provide Ecology and EPA a project baseline assumptions status at the next UMM.

Mr. B. Foley (RL) provided Ms. J. Wallace (Ecology) a copy of the 200-BP Project baseline assumptions, which was presented to the regulators on December 21, 1994, closing this action item. At the December meeting, RL requested comments regarding the project baseline assumptions, and Mr. Foley extended the request to Ms. Wallace and Mr. P. Beaver (EPA). Ms. Wallace agreed to provide comments by February 10, 1995, which generated a new action item.

Ms. Wallace inquired about baseline cost estimates for the 200-BP-11 Project. Mr. Foley stated that RL is in the process of determining the cost estimates, and he took an action to inform Ms. Wallace when that information would be available.

**Action item 01-04-95:2**, ERC will provide a presentation to Ecology regarding cone penetrometer and sonic push technologies before the next UMM.

A presentation was provided January 30, 1995, closing this action item.

**3. Status 200-BP-11 Operable Unit RFI/CMS and 216-B-3 Main Pond, 216-B-63 Trench, and 216-A-29 Ditch Work/Closure Plan, Draft B, Volume 1**

Mr. R. Tranbarger (ERC) stated that RL comments have been received and are being dispositioned. The tentative schedule is to submit the work/closure plan to RL in mid-March 1995. Ecology is scheduled to receive the document March 22, 1995.

4. **Status of TPA Change Request M-20-94-06: 200-BP-11 Boundary Changes to Incorporate the 216-B-63 Trench, 216-A-29 Ditch and 216-B-2-1, 216-B-2-2, and 216-B-2-3 Ditches**

Mr. Foley reported that TPA change request M-20-94-06 was approved at the last TPA project managers meeting (January 24, 1995).

5. **New Business**

Mr. Foley requested Ecology approval to perform cone penetrometer testing, which was discussed during the data quality objective meetings. Ms. Wallace requested clarification regarding the use of the cone penetrometer. Mr. Tranbarger explained that the purpose of the cone penetrometer is to explore the radionuclide concentrations across the ditches in an effort to optimize the borehole location in the area of the highest radionuclide contamination. The cone penetrometer would be utilized as a logging device, not as a sampling device. Mr. G. Kazsa (ERC) added that the cone penetrometer is an optimizing tool for locating radionuclide signatures. Ms. Wallace inquired if the cone penetrometer will be used at locations other than the three ditches (216-B-3-1, -3-2 and -3-3). Mr. Tranbarger responded that the only activity planned is to use the cone penetrometer across the head end of the three ditches. Mr. Kazsa indicated RL/Bechtel may consider use of the cone penetrometer in the future, depending on the results received from the three ditches. Ms. Wallace conferred approval to proceed with the cone penetrometer.

6. **Set Next Meeting Date**

The next Unit Managers Meeting was scheduled for March 7, 1995, from 1 to 2 p.m.
