Waste Site Reclassification Form**

0559814

<p>Date Submitted: 07/26/04</p> <p>Originator: R. A. Carlson</p> <p>Phone: 373-9759</p>	<p>Operable Unit(s): 100-BC-2</p> <p>Waste Site ID: 118-C-2 Ball Storage Tank Burial Ground and Staging Pile Area</p> <p>Type of Reclassification Action:</p> <p>Rejected <input type="checkbox"/></p> <p>Closed Out <input type="checkbox"/></p> <p>Interim Closed Out <input checked="" type="checkbox"/></p> <p>No Action <input type="checkbox"/></p>	<p>Control Number: 2004-0019</p> <p align="center">RECEIVED OCT 06 2004 EDMC</p> <p align="right"><small>Lead Agency: EPA</small></p>
<p>This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed out, interim closed out, or no action and authorizing backfill of the site, if appropriate. Final removal from the National Priorities List of no action, interim closed out, or closed-out sites will occur at a future date.</p>		
<p>Description of current waste site condition:</p> <p>Remedial action at this site has been performed in accordance with remedial action objectives and goals established by the U.S. Environmental Protection Agency and the U.S. Department of Energy, Richland Operations Office, in concurrence with the Washington State Department of Ecology. The selected remedial action involved (1) excavating the site to the extent required to meet specified soil cleanup levels, (2) disposing of contaminated excavation materials at the Environmental Restoration Disposal Facility in the 200 Area of the Hanford Site, and (3) backfilling the site with clean soil to adjacent grade elevations. The excavation and disposal activities have been completed.</p> <p>Basis for reclassification:</p> <p>The 118-C-2 Ball Storage Tank Burial Ground and its associated staging pile area have been remediated to meet the cleanup standards specified in the <i>Interim Remedial Action Record of Decision for the 100-BC-1, 100-BC-2, 100-DR-1, 100-DR-2, 100-FR-2, 100-HR-2, and 100-KR-2 Operable Units</i>, U.S. Environmental Protection Agency, Region 10, Seattle, Washington. Remedial actions were performed so as to allow rural-residential use and to protect groundwater and the Columbia River. The cleanup verification package demonstrates the acceptability of unrestricted access to deep zone soils (i.e., below 4.6 m [15 ft]); therefore, deep zone institutional controls are not required. The basis for reclassification is described in detail in the <i>Cleanup Verification Package for the 118-C-2 Burial Ground (CVP-2004-00005)</i>, Bechtel Hanford, Inc., Richland, Washington.</p>
