Waste Site Reclassification Form

<b>Date Submitted:</b> 12/15/1998	<b>Operable Unit(s):</b> 300-FF-2	<b>Control Number:</b> 98-243
<b>Originator:</b> R. D. Haggard, H6-25	<b>Waste Site ID:</b> 300-112	
<b>Phone:</b> (509) 376-3723	<b>Type of Reclassification Action:</b> <b>Rejected</b> <input checked="" type="radio"/> <b>Closed-Out</b> <input type="radio"/> <b>No Action</b> <input type="radio"/>	

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

**Description of current waste site condition:**

The Pump Pit is an engineered structure with an entry hatch labeled "Non-Permit Confined Space". The drain is at the bottom of the pit. It has a perforated, circular cover that measures approximately 0.61 meters (2 feet) in diameter. The pumps and piping have been removed.

The pumps have been removed (1996). Although the pumps were disposed of as low level radioactive material because of possible internal contamination, the external casing was not contaminated. The piping has been removed and capped. The internal surfaces of the pump pit were surveyed and found to be less than detectable.

**Basis for reclassification:**

The drain received leakage and drainage from the pump. The pump was flushed with clean service water during routine freeze protection maintenance. The source of the water was nonradioactive/nondangerous potable water. The flow rate was less than 0.038 liters (0.01 gallons) per minute.
