

Dear Mr. Faulk:

The Columbia River is one of our region's most precious natural resources. To protect it from Hanford contamination the USDOE must comply with all federal and state environmental laws, including Washington State's Cleanup Standards for carcinogens (MTCA.)

Additional Comments:

An environmental catastrophe is waiting to happen at Hanford. What will it take to get DOE to clean up Hanford & protect the health & safety of Northwest residents??

Signed Marianne Sullivan

Dear Mr. Faulk:

The Columbia River is one of our region's most precious natural resources. To protect it from Hanford contamination the USDOE must comply with all federal and state environmental laws, including Washington State's Cleanup Standards for carcinogens (MTCA.)

Additional Comments:

Why do we have to keep doing this?
Why are the obvious problems ignored or "explained away"??
We don't want to live with cancers (regardless of the %) so we can make bombs to destroy the rest of the planet -

Signed Melba Dlugonski

* Please help lower the high cancer rates around this area from fish air water etc

Dear Mr. Faulk:

The Columbia River is one of our region's most precious natural resources. To protect it from Hanford contamination the USDOE must comply with all federal and state environmental laws, including Washington State's Cleanup Standards for carcinogens (MTCA.)

It's wonderful that there are some people who use their free time to alert the public + its officials about this.

Additional Comments:

Listen to them!

This Hanford problem has gone on + on! I remember reading in the newspaper many years ago (15-20?) articles by environmentally concerned vs. Hanford scientists rebuttal articles + didn't know who to believe. Since my brother is (now retired) a nuclear
