Olympia, Washington 98504-7600

Dear Messrs. Day and Jansen:

HANFORD FEDERAL FACILITY AGREEMENT AND CONSENT ORDER (TRI-PARTY AGREEMENT)
MILESTONE M-30-01, "SAMPLING AND ANALYSIS OF 100 AREA SPRINGS"

Enclosed please find document DOE/RL-92-12, "Sampling and Analysis of 100 Area Springs." This report contains results and analysis of analytical laboratory chemical and radiological testing of water and sediment samples collected from springs, seeps, and the Columbia River in the vicinity of the 100 Areas and the Hanford townsite. The subject sampling activities were driven by Tri-Party Agreement milestone M-30-01: "Submit a report (secondary document) to EPA and Ecology evaluating the impact to the Columbia River from contaminated springs and seeps, as described in the operable unit Work Plans listed in M-30-03," due February 1992.

Validation of all chemical data contained in this report has been completed. Validation of all radiological data contained in this report has not been completed to date and it is expected to be completed in March 1992. Upon completion of radiological data validation, all affected data tables provided in this report will be updated and revised data analysis will be provided as necessary. No significant change to reported radiological data or data analysis is expected due to remaining data validation activities.

Transmittal of this document to EPA and Ecology completes the requirements of Tri-Party Agreement milestone M-30-01. Please address all comments and questions to Mr. E. D. Goller at (509) 376-7326.

Sincerely,

Steven H. Wishe's
Hanford Project Manager
