- I request that USDOE fund the CRCIA as it is the only way we will know the true risks to the Columbia River from Hanford.
- Please use maximum reasonable exposure scenarios, not recreational or limited-use exposures in the CRCIA.
- Also, the CRCIA should be consistent with the American Treaty of 1855.
- CRCIA must not freezing decisions along the Columbia River without such as from airborne radiation + trash wastes being disposed, and without applying WA State cleanup standard for carcinogens to Hanford's radiation and rad-wastes.
