Subject: 100-NR-1 Description of Work

100 Area Remedial Investigation *AD Krug* 6-5634
 Department AD Krug Telephone #

Summary of Conference

Steve Cross called with a new comment on the 100-NR-1 Description of Work (WHC-SD-EN-AP-084). He requested we make the following change to the document:

Page 9, paragraph 2, line 10

1. End Paragraph 2 after the sentence ending "...placed on the ground."
2. Start a new paragraph with the following - "As strict compliance with the requirements of WAC-170-160 is impractical, this DOW constitutes a request for variance, thereunder. Approval of this DOW, by the Washington Department of Ecology constitutes approval of the variance. The 5 day notification given to the lead agency at Hanford will satisfy the notification requirement of WAC-173-160-(055)."
3. End this paragraph with the last two sentences of the old paragraph.

Steve indicated that Ecology would be coming out with something in writing saying that WAC-170-160-(g) was applicable to test pits.
