p1. Approval of Past UMM Minutes

The Ecology Unit Manager (RE Cordts) and the RL Unit Manager (RN Krekel) had reviewed the minutes and concurred with the minutes as written. However, the minutes were not signed at this meeting.

2. Status Prior Action Items:

- 5-04-93:1 WHC and RL will submit a petition requesting approval of the sonification procedure for the determination of volatile organics in concrete by following the guidelines in WAC 173-303-110(5).

WHC (AL Prignano) reported that the information on the sonification procedure has not yet been sent to Ecology. RL and WHC have decided to perform additional experiments and include this with the information to be sent to Ecology. These experiments should be completed by the end of the month.

In response to a question from Ecology, RL (RN Krekel) stated that the request for additional experiments came from the Waste Management Division of RL during final review and sign-off. These experiments will support the equivalency aspect of the procedure.

3. Status Closure Activities

WHC (AL Prignano) reported that the data evaluation report for the soils characterization effort is complete and is currently undergoing final sign-off.

WHC (A. L. Prignano) also reported that the inorganic results from the concrete samples taken in May have been received by WHC. They are currently undergo validation. No evaluation of the results has been performed yet. The analyses for volatile organics have been completed by the WHC laboratories. The data is still with the chemists.

4. New Business

No additional new business was discussed.
