3. Comment:

Although several drawings show an 18 inch VCP pipe at this location, it is believed the pipeline does not exist. H-2-44501, sheet 91 shows this potential pipeline, but includes a note that states its "existence is doubtful, Hold for exploration".

A 1990, Westinghouse Internal Memo (82331-90-350) documents a field investigation to find the 18 inch VCP pipe shown on some drawings. A GPR scan found no evidence of the pipeline. Two exploratory trenches were dug across the location where the pipeline is shown on H-2-3329. The maximum depth of the trenches was 12 feet. No pipeline was found in the excavations. The conclusion from the field investigation was that this pipeline does not exist.
