

Waste Site Reclassification Form

| | | |
|---------------------------------|--|---------------------------------|
| Date Submitted: 6/3/2004 | Operable Unit(s): 200-UR-1 | Control Number: 2004-085 |
| Originator: C. R. Webb | Waste Site ID: UPR-200-W-85 | |
| Phone: 373-5573 | Type of Reclassification Action: | |
| | Rejected: <input type="radio"/> | |
| | No Action: <input checked="" type="radio"/> | |
| | Interim Closed Out: <input type="radio"/> | |
| | Closed Out: <input type="radio"/> | |

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

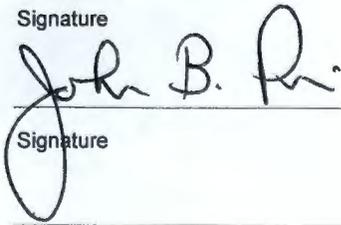

Description of current waste site condition:

In April 1982, a multi-purpose transfer box was moved from the 221-T railroad cut to the cement pad behind the 2706-T Building. While parked on the pad, liquid was observed dripping from the box. The apparent cause of the leak was a weld failure on the outside sheathing covering the concrete shell. Contamination levels up to 100,000 counts per minute were found on the ground. The contamination was cleaned up at the 2706-T pad area. The railroad track from the 2706-T Building to the 221-T railroad cut was surveyed and no contamination was detected.

A new building (2706-TA) has been built on top of the cement pad.

Basis for reclassification:

The cement pad was decontaminated in 1982. A new building (2706-TA) was constructed on top of the cement pad. The release is not physically marked or posted. It is recommended this site be reclassified to No Action.
